Dewey's Empirical Theory of Knowledge and Reality - John R. Shook 2000

The ongoing revival of interest in the work of American philosopher and pragmatist John Dewey has given rise to a burgeoning flow of commentaries, critical editions, and reevaluations of Dewey's writings. While previous studies of Dewey's work have taken either a historical or a topical focus, Shook offers an innovative, organic approach to understanding Dewey and eloquently shows that

Dewey's instrumentalism grew seamlessly out of his idealism. He argues that most current scholarship operates under a mistaken impression of Dewey's early philosophical positions and convincingly demonstrates a number of key points: that Dewey's metaphysical empiricism remained more indebted to Kant and Hegel than is commonly supposed; that Dewey owed more to the influence of Wundt than is commonly believed; that the influence of Peirce and James was not as significant for the development of Dewey's theories of mind and truth as has been argued in the past; and that Dewey's pragmatic theory of knowledge never really abandoned idealism. Shook's exposition of the unity of Dewey's thought challenges a large scholarly industry devoted to suppressing or explaining away the consistency between Dewey's early thought and his later work. In every respect, Dewey's *Empirical Theory of Knowledge and Reality* is a provocative and engaging study that will occupy a unique niche

in this field. It is certain to stimulate discussion and controversy, forcing Dewey traditionalists out of habitual modes of thought and transforming our conventional understanding of the development of classical American philosophy.

The History of Modern Science - Stephen G. Brush 1988

The Emotional Mind - Stephen T. Asma
2019-04-15

For 200 million years before humans developed a capacity to reason, the emotional centers of the brain were hard at work. Stephen Asma and Rami Gabriel help us understand the evolution of the mind by exploring this more primal

capability that we share with other animals: the power to feel, which is the root of so much that makes us uniquely human.

Science and Technology in World History -

A History of Psychology - Eric Shiraev

2014-02-04

Offering a fresh, accessible, and global approach to the history of psychology, the fully revised Second Edition of Eric B. Shiraev's *A History of Psychology: A Global Perspective*, provides a thorough view of psychology's progressive and evolving role in society and how its interaction with culture has developed throughout history,

from ancient times through the Middle Ages and the modern period to the current millennium.

Taking an inclusive approach, the book addresses contemporary and classic themes and theories with discussion of psychology's applications and its development in many cultures and countries. High-interest topics, including the validity of psychological knowledge and volunteerism, offer readers the opportunity to apply the history of psychology to their own lives.

What is Psychology? - Andrew Colman

2016-01-28

This clear and lively introduction to psychology assumes no prior knowledge of the subject. Extensively revised and updated, this third edition describes psychology as it is taught at universities. Examples are used throughout to illustrate fundamental ideas, with a self-assessment quiz focusing readers' minds on a number of intriguing psychological problems. The differences between psychology, psychiatry

and psychoanalysis are explained, and the professions and careers associated with psychology are explored. Suggestions for further reading and useful internet sites are included.

Sounds of the Pandemic - Maurizio

Agamennone 2022-12-06

Sounds of the Pandemic offers one of the first critical analyses of the changes in sonic environments, artistic practice, and listening behaviour caused by the Coronavirus outbreak. This multifaceted collection provides a detailed picture of a wide array of phenomena related to sound and music, including soundscapes, music production, music performance, and mediatisation processes in the context of COVID-19. It represents a first step to understanding how the pandemic and its by-products affected sound domains in terms of experiences and practices, representations, collective imaginaries, and socio-political manipulations. This book is essential reading for students, researchers, and practitioners working

in the realms of music production and performance, musicology and ethnomusicology, sound studies, and media and cultural studies.

Awesome Creations and Evolution - Kamran Pirnahad 2005-07

Awesome Creations and Evolution: New Age Book of Revelations is a journey through different phases of the natural, cultural, religious, and historic evolution of mankind. Author Kamran Pirnahad provides insight into major concepts that have affected the human species throughout its course of evolution in an effort to make everyone feel purposeful and worthy as living beings. The concepts discussed have been developed on the basis of a universal conscience, and, therefore, most views can be understood and adapted by other languages within their specific cultural environments. Perception and meaning have been derived from pure concepts that define the creation and, henceforth, the evolution of the species and in particular, the human species. Pirnahad's goal is

to empower readers with the proper knowledge, wisdom, and spirituality to overcome the sense of lack of values and emptiness, which deprives mankind from reaching a state of freedom and happiness in this world. *Awesome Creations and Evolution* attempts to explain the worthy concept of human existence, based on truthful, spiritual, and actual observations.

Leadership for the Future - Thomas Mengel
2021-06-29

Paradigm Shift in Urban Mobility - Tomasz Janasz 2017-11-30

Tomasz Janasz demonstrates that digital technologies and new mobility concepts can lead to a reduction of the automobiles in urban areas by a factor of 10. The book features two vivid case studies of such digital mobility concepts: TwoGo by SAP and smexx. The author proposes six prototypes of business models for 'Shared Automobility Services'. Janasz offers also the 'Transformative Literacy' for designing sustainable urban mobility systems of the future. The author elaborates on the socio-political patterns of urban mobility by presenting the case of the City of Basel (Switzerland). He proposes the framework of 'Integrated Sustainable Urban Mobility' to explain how to

overcome car dependence in cities.

Mass Communication Theories - Melvin L. DeFleur 2022-05-03

The second edition of this innovative textbook provides a comprehensive overview of mass communication theories, as well as their origins and empirical supports in psychology, sociology, political science, and philosophy. Each chapter presents a specific theory, describing its basic structure in simple formal terms and providing an accessible summary of the research studies and scholarly writings from which it developed. It breaks each complex theory down into five or six interlinked basic propositions, making them easily digestible for students. This new edition includes up-to-date research; improved coverage of all theories presented; expanded treatments of theories such as cultivation theory, the spiral of silence, and framing; contemporary and social media examples; chapter discussion questions; and informative charts and figures. This textbook serves as an accessible core text for

undergraduate and graduate Mass Communication, Communication Theory, and Communication and Society courses.

Metaphysics Through Semantics: The Philosophical Recovery of the Medieval Mind -

Joshua P. Hochschild 2023-04-27

“More than any other living scholar of medieval philosophy, Gyula Klima has influenced the way we read and understand philosophical texts by showing how the questions they ask can be placed in a modern context without loss or distortion. The key to his approach is a respect for medieval authors coupled with a commitment to regarding their texts as a genuine source of insight on questions in metaphysics, theology, psychology, logic, and the philosophy of language—as opposed to assimilating what they say to modern doctrines, or using medieval discussions as a foil for ‘new and improved’ conceptual schemes.” Jack Zupko, University of Alberta “Gyula Klima is widely recognized as one of the world’s leading experts on thirteenth and

fourteenth-century Latin philosophy, with his own, distinctive analytic approach, which brings out both the similarities and differences between medieval and contemporary logic and semantics.” John Marenbon, Trinity College, University of Cambridge “Gyula Klima has been a towering figure in the field of medieval philosophy for decades. His influence comprises not only the scholarly results of his work, but also intense and generous mentorship of students and junior colleagues. This volume is a perfect reflection of the esteem that he enjoys around the world, collecting excellent pieces by established as well as up-and-coming scholars of medieval philosophy.” Catarina Dutilh Novaes, Vrije Universiteit Amsterdam “For four decades now, Gyula Klima has been setting the standard among medievalists for philosophical sophistication and historical rigor. This collection of wide-ranging studies from leading scholars in the field offers a worthy tribute to that legacy.” Robert Pasnau, University of

Colorado Boulder Gyula Klima is Professor of Philosophy at Fordham University, and Senior Research Fellow, Consultant, and the Director of Institute for the History of Ideas of the Hungarian Research Institute in Budapest. In 2022, the President of Hungary awarded him the Knight's Cross of the Hungarian Order of Merit, "in recognition of his outstanding academic career, significant research work and exemplary leadership." In this volume, colleagues, collaborators, and students celebrate Klima's project with new essays on Plotinus, Anselm, Aquinas, Buridan, Ockham and others, exploring specific questions in philosophy of mind, philosophy of language, metaphysics, and logic. No contemporary surpasses Kripke and Klima in semantics and metaphysics, but only Gyula Klima's thought ranges flawlessly over classical philosophy as well. The volume is a fitting tribute to the master. David Twetten, Marquette University
Beyond the Unconscious - Mark S. Micale

2014-07-14

Henri F. Ellenberger, the Swiss medical historian, is best remembered today as the author of *The Discovery of the Unconscious* (1970), a brilliant, encyclopedic study of psychiatric theory and therapy from primitive times to the mid-twentieth century. However, in addition to this well-known work, Ellenberger has written over thirty essays in the history of the mental sciences. This collection unites fourteen of Ellenberger's most interesting and methodologically innovative historical essays, many of which draw on new and rich bodies of primary materials. Several of the articles appear here in English translation for the first time. The essays deal with subjects such as the intellectual origins of psycho-analysis, the work of the French psychological school of Jean-Martin Charcot and Pierre Janet, the role of the "great patients" in the history of psychiatry, and the cultural history of psychiatry. The publication of these writings, which corresponds with the

opening in Paris of the Institut Henri Ellenberger, truly establishes Ellenberger as the founding figure of the historiography of psychiatry. Accompanying the essays are an extensive interpretive introduction and a detailed bibliographical essay by the editor. Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Nuwaubian Pan-Africanism - Emeka C.

Anaodozie 2019-12-03

This book examines the contemporary

operational and theoretical parameters of Pan-Africanism and black nationalism in the post-civil rights era. It uses the Nuwaubian movement as a case study to explore this essential strand in African Diasporan history, culture, and tradition. The author argues that the Nuwaubian Nation, like their contemporaries such as the Nation of Islam, represents contemporary efforts of African descendants to dialectically and culturally fight oppression. He argues that unlike the classical Back to Africa movements, the contemporary ones do not seek to primarily relocate to Africa, but to go to Africa culturally and bring back Africa to the diaspora. This effort can be seen in the Nuwaubian attempts at unearthing and importing classical African traditions, mores, and values in their various communities across the United States, especially in Eatonton, Georgia. Their aim was to chart an identity for their adherents and inspire racial pride for people of African descent.

The Proceedings of the 19th Annual History of Medicine Days Conference 2010 - Beth Cusitar
2014-07-18

This volume is the second in a peer-reviewed series of Proceedings Volumes from the Calgary History of Medicine Days conferences, produced by Cambridge Scholars Publishing. The History of Medicine Days is a two day, national conference held annually at the University of Calgary, Canada, where undergraduate and early graduate students from across Canada, the US, the UK and Europe give paper and poster presentations on a wide variety of topics from the history of medicine and health care. The selected 2010 conference papers assembled in this volume particularly comprise the history of Applications of Science to Medicine, Nursing, Public Health, Illness and Disease, Stigma and Gender, Neurology and Psychiatry, and Eugenics. The 2010 keynote address was delivered by Distinguished Professor of the History of Nursing and Public Health, Dr Geertje

Boschma from the University of British Columbia, Vancouver, and is reprinted in the current volume. This volume also includes the abstracts of all 2010 conference presentations and is well-illustrated with diagrams and images pertaining to the history of medicine.

The Meaning of Being Illuminati - Nicolas Laos
2019-05-23

This book articulates a new research program, called "Ur-Illuminism," which consists in an integrated and systematic study of humanity's

quest for "illumination," namely, for the highest and noblest possible mode of being. Thus, it takes on the challenge of revising widely accepted ways of understanding and interpreting the ontological underpinnings of civilization and the ontological potential of humanity. It allows the reader to delve into a creative "rediscovery" of Platonism, medieval Christian mystics' and scholars' writings, and various "illuminist" systems, from the Orphic mystical cult to the European Enlightenment and thence to the eighteenth-century Illuminati fraternities and beyond. Moreover, the book studies major issues in the history of philosophy, politology, and esoteric systems (such as Hermeticism, the Kabbalah, alchemy, the Rosicrucian movement, Freemasonry, and the Bavarian Illuminati). It maintains that a postmodern "rediscovery" of premodern metaphysics, specifically, a postmodern esoteric theocracy (as distinct from old sacerdotalism and religious formalism), is the best bulwark

against oppression and the ontological degradation of humanity, as well as the best path to the attainment of that wisdom and spiritual self-knowledge which constitute the existential integration and completion of the human being. In this context, it proposes a peculiar and intellectually fecund synthesis between Tory Anarchism, Libertarianism, Platonism, and Byzantine Hesychasm, as they are elucidated here.

Methexiology - Nicolas Laos 2016-05-19
Methexiology is not a particular theory, but rather a general philosophical orientation. Therefore, in *Methexiology: Philosophical Theology and Theological Philosophy for the Deification of Humanity*, Nicolas Laos elucidates the significance of methexiology for the study of ontology, epistemology, ethics, philosophical psychology, theory of justice, philosophy of history, and philosophy of religion. Laos argues that, faced with the modern and the postmodern crises of meaning, we need a new myth, a new

spiritual formula, for the resacralization of humanity and the cosmos, without restoring defunct totems, without using tales as "cheap" substitutes for the lack of a life-giving myth, and without negating history. In his *Methexiology*, Laos studies the "genealogy" of the modern and the postmodern crises of meaning, and, based on his new interpretation of classical Greek philosophy and Hesychasm, proposes methexiology as a way of overcoming the crises of meaning and as a way of resacralizing humanity and the cosmos through a new metaphysically grounded humanism.

Blow Your Little Tin Whistle - Peggy A. Pittas
1992

This book is a biography of Richard Clarke Sommerville, an educator, amateur actor, and artist, whose life spanned the last quarter of the nineteenth century and six decades of the twentieth century. His dedication to the fine arts was not just a passing interest, but was central to his definition of the right way to live.

Education was the key to his positive attitude. He held definite views about what an education should do for the individual. His education within the home environment, his experiences within the educational settings of his day, and his ultimate acceptance of his own lot in life helped him, in part, to formulate these views. Many of his views are as timely today as they were then. His message is to all students from a

very special teacher. Contents: 'The Jewel on the South Branch'; The Hampden-Sydney Years; The Restless Young Man; A Return to the Classroom; A Return to Virginia; 'As a Man Thinketh...'; The Professional and the Employee; 'Friend of the Student'; The Man and His Art; The Emeritus Years.

Actualization of Thought - Chandra Mouli M S
2019-12-03

Making one understand the existing realities at the basic level is an enormous task, and when it comes to the thought process, it appears to be abstract for the common man. For those who are seekers of truth and reality, Actualization of Thought can take them to a different world. Chandra Mouli M S has undertaken the most challenging journey of comparative study of the Vedic science, philosophy and psychology, through the Bruhati Shahasra. There have been several studies trying to bring out the contents of the Vedas in different contexts suitable for the contemporary audience. But so far we have not

come across anything that has Vedic science, philosophy and psychology on one platform. This unique, successful effort has been definitely a strenuous, time consuming one of several years. Apart from citing several authorities on the subjects right from Vedic time to contemporary, a proper perspective is projected to realize what happens while actualization of thoughts takes place. One will find physiological and pathological explanation, which enable the neurotransmitters right from Patanalis Yoga Sutras to Dr. Deepak Chopra's clinical studies. The book will be of great help to future seekers and researchers as there is no alternative substructure material available. - Prasad Parichaya Foundation, Bangalore.

The Story of Psychology - Morton Hunt
2009-09-16

Socrates, Plato, Descartes, Spinoza, Mesmer, William James, Pavlov, Freud, Piaget, Erikson, and Skinner. Each of these thinkers recognized that human beings could examine, comprehend,

and eventually guide or influence their own thought processes, emotions, and resulting behavior. The lives and accomplishments of these pillars of psychology, expertly assembled by Morton Hunt, are set against the times in which the subjects lived. Hunt skillfully presents dramatic and lucid accounts of the techniques and validity of centuries of psychological research, and of the methods and effectiveness of major forms of psychotherapy. Fully revised, and incorporating the dramatic developments of the last fifteen years, *The Story of Psychology* is a graceful and absorbing chronicle of one of the great human inquiries—the search for the true causes of our behavior.

The Oxford Handbook of the History of Psychology: Global Perspectives - David B. Baker
2012-01-13

The science and practice of psychology has evolved around the world on different trajectories and timelines, yet with a convergence on the recognition of the need for a

human science that can confront the challenges facing the world today. Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others, but in today's global culture, there is a greater need in psychology for international understanding. This volume describes the historical development of psychology in countries throughout the world. Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies. Each unique story adds another element to our understanding of the history of psychology. The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives. Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight, as well as a better understanding of the human

condition.

Dictionary of World Biography: The 20th century, O-Z - Frank Northern Magill 1999-11
Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

Matters of the Heart - Fay Bound Alberti
2010-01-14

The heart is the most symbolic organ of the human body. Across cultures it is seen as the site of emotions, as well as the origin of life. We feel emotions in the heart, from the heart-stopping sensation of romantic love to the crushing sensation of despair. And yet since the nineteenth century the heart has been redefined in medical terms as a pump, an organ responsible for the circulation of the blood. Emotions have been removed from the heart as an active site of influence and towards the brain. It is the brain that is the organ most commonly associated with emotion in the modern West. So why, then, do the emotional meanings of the heart linger? Why do many transplantation patients believe that the heart, for instance, can transmit memories and emotions and why do we

still refer to emotions as 'heartfelt'? We cannot answer these questions without reference to the history of the heart as both physical organ and emotional symbol. *Matters of the Heart* traces the ways emotions have been understood between the seventeenth and nineteenth centuries as both physical entities and spiritual experiences. With reference to historical interpretations of such key concepts as gender, emotion, subjectivity and the self, it also addresses the shifting relationship from heart to brain as competing centres of emotion in the West..
