Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

HOTEL REVIEW: SENTIMENT ANALYSIS USING MACHINE LEARNING AND DEEP LEARNING WITH PYTHON GUI - Vivian Siahhaan 2022-03-15

The data used in this project is the data published by Anurag Sharma about hotel reviews that were given by costumers. The data is given in two files, a train and test.

The train.csv is the training data, containing unique User_ID for each entry with the review entered by a costumer and the browser and device used. The target variable is Is_Response, a variable that states whether the costumers was happy or not happy while staying in the hotel. This type of variable makes the project to a classification problem. The test.csv is the testing data, contains similar headings as the train data, without the target variable. The models used in this project are K-Nearest Neighbor, Random Forest, Naive Bayes, Logistic Regression, Decision Tree, Support Vector Machine, Adaboost, LGBM classifier, Gradient Boosting, and XGB classifier, and LSTM. Three vectorizers used in machine learning are Hashing Vectorizer, Count Vectorizer, and TFID Vectorizer. Finally, you will develop a GUI using PyQt5 to plot cross validation score, predicted values versus true values, confusion matrix,

learning curve, performance of the model, scalability of the model, training loss, and training accuracy.

Special Edition Using Visual Basic .Net - Brian Siler 2001

Microsoft's .NET initiative created drastic changes in the Visual Studio line of products, and as a result a lot of Visual Basic developers feel like they are beginners all over again. Special Edition Using Visual Basic.NET will offer in-depth explorations of new features so that both experienced programmers and novices will feel comfortable making the transition to .NET. Although a major portion of the book is devoted to Internet applications, the book covers more general topics than many other books. Features of Visual Basic that will be

explained include database access, controls, and best coding and practices. These features will be explored in detail, with extensive use of example programs and screen captures.

SAP R/3 Implementation - Hans-Jürgen Appelrath 2013-03-09

Before use, standard ERP systems such as SAP R/3 need to be customized to meet the concrete requirements of the individual enterprise. This book provides an overview of the process models, methods, and tools offered by SAP and its partners to support this complex and time-consuming process. It begins by characterizing the foundations of the latest ERP systems from both a conceptual and technical viewpoint, whereby the most important components and functions of SAP R/3 are described. The

main part of the book then goes on to present the current methods and tools for the R/3 implementation based on newer process models (roadmaps).

Head First EJB - Kathy Sierra 2003-10-28
A guide to JavaBeans provides more than two hundred questions and answers to help readers pass the Sun Certified Business Component Developer exam.
