The Nutshell Guide to Fluent English - Bill McCann 2015-08-19

This book is part of a series which aims to help English Language Learners to become fluent in Spoken English. It is the first in a planned series of three and caters for those Learners who are ready to move up to the ESL (English as a Second Language) Pre-Intermediate level in Spoken English. We

begin here because, in terms of the spoken language, the leap from the Elementary to the Pre-Intermediate level is one of the biggest hurdles faced by English Language Learners. It is one of the greatest hurdles because it is at this stage that the Learner must move from simple spoken forms to a degree of fluency that begins to use more complex forms of the language. It is the first major hurdle that very many Learners cannot get over. As a result, it is at this point that a Learner can become stuck and either give up trying to become fluent in Spoken English or fail to make any real progress in comparison to their writing and reading skills. There are two main reasons why this happens. The first is that native English speakers do not speak the language in the same way that they write it. The spoken word very often bears little or no resemblance to the written word. The second is that a Spoken language must be

learnt - it cannot be taught. By this we mean that, while all learning is a two-way process between the instructor and the learner, when it comes to learning to speak a language, something more than 80% of the work must be done by the Learner on their own. One of the obvious areas where this is true is in the need to learn vocabulary. To become fluent in a spoken language, a great many new words must be learnt - and only the Learner can do that. The instructor cannot learn them for him. How that vocabulary is learnt is a large issue. By far, the vast majority of Learners try to do this by memorising list of English words and their equivalent meanings in their native language. This does not. In this book you will discover a new way to learn the vocabulary that you need, and how to make it fun to learn. The emphasis in this book is on practical use of the language. In each Unit, Learners are given the opportunity to

extend their vocabulary and to practice speaking the language of the native speakers. We have called this Idiomatic Spoken English, or everyday English. All of the examples and dialogues in this book use this language. It is not slang (or street language) but a language that uses all the shortcuts and tricks that native speakers use to keep a fluent and rhythmic flow of words when they speak. Successfully reproducing the rhythm of English (Enunciation) is one of the main secrets of being able to speak the language fluently. In this book we describe how that rhythm is actually built up and use the work of some of the great English poets to help the Learner to get a feel for the very beautiful cadences that English is capable of. Each Unit includes a full poem (or occasionally an extract from a very long poem) with notes about the rhythm (metre) of the poem together with its meaning and background.

Of no less importance than Enunciation is Pronunciation. All Learners, no matter what their native language might be, have some difficulty in pronouncing English correctly. For this reason, great emphasis is placed on the Sounds of English, and each Unit includes examples and rigorous exercises for two of the 44 sounds that make up the English language. The first three Units of the book set out the essential foundations of The Nutshell Way to learn to speak English fluently. Some of the six basic principles (introduced in Unit One) on which this is based may well surprise many Learners (and not a few Instructors). But our experiences as Instructor and Learner have shown us that this radical approach is not only workable but absolutely necessary if A Learner is to clear the hurdle and Learn to speak fluent English with confidence.

IELTS Target 5. 0: Preparation for IELTS General Training - Leading to Academic

IELTS - Chris Gough 2010

IELTS Target 5.0: Preparation for IELTS General Training - Leading to IELTS Academic IELTS Target 5.0 is aimed at students wishing to prepare for the IELTS exam while studying at pre-intermediate level. The main focus of preparation is IELTS General Training, as this is more appropriate for this level of student. Additional bridging material is incorporated later in the course for those students wishing to continue with IELTS Academic. The IELTS General Training section consists of three five-unit sections that take the student from a strong elementary to intermediate level. The earlier units focus on basic skills and basic language, including sentence structure and spelling. The IELTS Academic section consists of five units that prepare students for the academic content of reading passages and the more challenging writing tasks. By the end of the course, students

will be working with text and language that is close to that found in the exam. Exam tips are provided throughout the course to familiarize students with the various exam tasks and to provide advice on how to obtain the highest score possible. Each unit consists of five modules: Speaking and Vocabulary: This prepares students for the type of interaction they can expect with the examiner. The vocabulary selected is that most frequently encountered during the speaking exam. Listening: This module is in two parts. The first part engages students in a topic and pre-teaches key vocabulary, before focusing on a key skill or particular IELTS exam technique. The second part practises the skill. Reading: As with the Listening module. Writing: This deals with both parts of the writing exam, each unit focusing on a different writing skill or writing technique. There is a focus on guided writing, with model compositions for all

writing tasks. Consolidation and Exam Practice: The first part revises the speaking focus and vocabulary in the first module. The second part practises listening, reading or writing skills under something closer to exam conditions. Each Academic unit consists of Reading and Writing Modules only. The course also includes end-of-section review material, mock tests and an accompanying workbook. The Strategy Factor in Successful Language Learning - Carol Griffiths 2013-05-09

This book addresses fundamental questions regarding the relationships between successful language learning and strategy use and development according to learner, situational or target variables. It considers strategy effectiveness from an individual point of view and discusses pedagogical issues, especially relating to teacher perceptions and training, classroom and learner factors, methodology and content. The book begins by discussing underlying theoretical issues and then presents evidence from empirical studies; in addition to presenting a quantitative view, the book also takes a qualitative look at strategy use by individuals. Rather than focusing on strategies divorced from the 'real world' of

the classroom, this book explores the issues from the teaching/learning point of view.

Just Reading and Writing - 2004

Englishes in English Language Teaching -

Marzieh Sadeghpour 2019-07-23

The unprecedented growth and recognition of new world Englishes, call for English language teaching programs to consider the place and relevance of the paradigm of World Englishes to the content and delivery of their curricula. This concern is particularly compelling in the multi-varietal contexts such as Australia where speakers from different Kachruvian Circles interact frequently with one another. Investigating the place and pertinence of World Englishes in English language teaching in Australia this book explores the perceptions of English language teachers from culturally and linguistically diverse backgrounds working in Australia. Looking at the effect on

teachers' confidence when dealing with different varieties of English, the pedagogical implications and the causes of varying degrees of perception among teachers. The author highlights the possible changes that could take place that would pave the ground for the development of World Englishes-informed curriculum and pedagogy for English as an International Language, which would in turn provide opportunities for learners to develop requisite competencies for intercultural communication. These are the skills which enable learners to successfully interact with speakers of various Englishes and negotiate and navigate with their interlocutors the differing cultural conceptualisations associated with the varieties of English during international and intercultural communication. Vital reading for anyone researching English language teaching or varieties of English and those teaching

English as an international language

anywhere in the world.
