Fluency in Native and Nonnative English Speech - Sandra Götz 2013

This book takes a new and holistic approach to fluency in English speech and differentiates between productive, perceptive, and nonverbal fluency. The in-depth corpus-based description of productive fluency points out major differences of how fluency is established in native and nonnative speech. It also reveals areas in which even highly advanced learners of English still deviate strongly from the native target norm and in which they have already approximated to it. Based on these findings, selected learners are subjected to native speakers' ratings of seven perceptive fluency variables in order to test which variables are most responsible

for a perception of oral proficiency on the sides of the listeners. Finally, language-pedagogical implications derived from these findings for the improvement of fluency in learner language are presented. This book is conceptually and methodologically relevant for corpus-linguistics, learner corpus research and foreign language teaching and learning.

Developing Oral Fluency in English - Faruk Türk 2022-12-24

To know a language is to speak and write in it as well as to understand what is spoken. However, it is one of the most important problems in some countries not to be able to speak and write in the target language despite taking foreign language classes for years from kindergarten to university. The reason for this problem may be due to the problems caused by the learners themselves, as well as doing something wrong in language teaching. In this book, our main concern is the second. In addition to what can be done to improve speaking a foreign language, practices that prevent speaking a language are also mentioned. We hope that it will be useful for everyone interested in foreign language learning and teaching...

Process and Experience in the Language Classroom - Michael Legutke 2014-06-06
Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process. The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice. They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice, incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources. Building on a critical review of recent language teaching principles and practice, they provide selection criteria for classroom activities

based on a typology of communicative tasks drawn from classroom experience. The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum.

Intelligibility, Oral Communication, and the Teaching of Pronunciation - John M. Levis 2018-08-31

A proper understanding of intelligibility is at the heart of effective pronunciation teaching, and with it, successful teaching of speaking and listening. Far from being an optional 'add-it-on-if-we-have-time' language feature, pronunciation is essential because of its tremendous impact on speech intelligibility. Pronunciation dramatically affects the ability of language learners to make themselves understood and to understand the speech of others. But not all elements of pronunciation are

equally important. Some affect intelligibility a great deal, while others do not. With a strong emphasis on classroom practice and how pronunciation teaching can be more effectively approached in different teaching contexts, this book provides an important resource for pronunciation researchers, with a distinctly practical focus. It shows how intelligibility research informs pronunciation teaching within communicative classrooms, enabling language teachers to incorporate intelligibility findings into their teaching. Professionals interested in oral communication, pronunciation, and speech perception will find the book fascinating.

Language Teachers' Narratives of Practice - Lesley Harbon 2014-08-26

Language Teachers' Narratives of Practice is a collection of seventeen essays that examine personal and professional stories of, and by, language teachers in diverse Australian contexts. The voices of twenty-one Australian language teachers in all, describe teachers' own linguistic and cultural, personal and professional narratives, and how each narrative has informed the construction of their classroom language teaching practice to suit their teaching contexts. We see how teachers make individual responses to emerging pedagogies, developed through the lens of their personal experience and understanding of language and culture. In our invitations to these teachers to contribute chapters to the book, we have encouraged them to make visible the diversity within the Australian language teaching context. This is a new resource for use in a professional development context, for pre-service teachers, in-service teachers, tertiary teacher educators and researchers. This resource will serve as a practical text for teachers to draw on, to extend their own professional knowledge and classroom practice in relevant, useful and diverse areas. The narratives can be examined as case studies of teacher identity and life-worlds, development of pedagogies, intercultural learning, and the differentiation and adaptation needed in particular environments, within a diverse environment such as Australia.

Fluent Forever - Gabriel Wyner 2014-08-05

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire

your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

ENGLISH FOR EVERYDAY SPEAKING -
Sutanto Leo

It is said that school leavers in Indonesia are not able to speak English confidently. They have no courage to speak, even though they actually feel that they have

something to say in their mind. They are afraid to make mistakes when speaking because they never feel happy with their English grammar and vocabulary at school. English for Everyday Speaking is directed at those who have learned English and have no courage to speak but want to practice their spoken English. This book is not only suitably used by high school students, university students, language centers, English course learners and English speaking club members as a main course book for speaking, but also for employees, workers, staff, teachers, employers or members of a family as a core handbook for language practice during their leisure time. This book covers very common daily topics which everyone is familiar with, such as Daily Activities, Personal Information, Family Life, Culture, Sport, Housemaids, Hobbies and Interests, Smoking and Drinking, Music, Health, Education, School Life, Love, Holiday, Food and Drink, Marriage, Sex, Demonstrations & Strikes, Terrorism, Crime and Prisons, Debates, etc. The questions, which are intended to arouse learners to speak, are generally simple to answer for ordinary learners. They need practical ideas or knowledge but do not need deep academic or scientific knowledge to answer them. However, if the group of learners have more advanced knowledge about the topics and are interested to delve deeper on the topics, there are also some possibilities to do so. English for Everyday Speaking is designed by an experienced English teacher. In addition, these materials have been tried out at STP Bandung, STBA, Maranatha University, the Center at Jl. Setiabudhi, Bandung and some other language centers. □□□□□□□□□□ - 1995
