Cut and Fold Techniques for Pop-Up Designs - Paul Jackson
2014-02-17

Introducing techniques for making pop-ups from one sheet of card, the third title in this series on paper engineering takes folding techniques into the third dimension. Each chapter introduces a new technical idea and shows how that technique can be adapted in many different ways, or combined with techniques from earlier chapters. These 3-D techniques can be incorporated into any design where typography and/or

illustration are used, including mail-shots, personal publicity, invitations, business cards and greetings cards. With their emphasis on surface design over complex cutting, the pop-ups have an instant appeal for designers. Following the elegant, easy-to-follow style of Paul Jackson's other titles for Laurence King, *Cut and Fold Techniques for Pop-Up Designs* is an essential resource for marketing professionals and design students.

Paper Sculpture - Richard Sweeney
2021-11-28

Paper is readily available and inexpensive in comparison to other sculptural media, and can be manipulated with a set of

simple tools. It is a tactile medium, which can be formed into three-dimensional shapes quickly and immediately through folding and cutting. This hands-on element is something I feel is important -- it allows the artist to engage immediately with the material, resulting in something physical and tangible. It is, perhaps, these factors that make it so appealing, not only as a tool to apply in different fields, such as model making for architecture, but as an activity for its own sake. A section of this book is dedicated to a selection of the techniques I use in the creation of my work, and which I demonstrate in my workshops. My aim is to show

the basic principles of form-making in paper, which can then be expanded on and explored as the reader wishes. Also included are my sources of inspiration and details of my working practice, which shows the evolution of an initial idea into a final artwork. I hope this book offers an insight into my work, while offering inspiration to those who wish to explore the creative potential of paper.
