*Atomic Highway* - Colin Chapman 2010-06-22  
Civilization came crashing down. Billions died. A new Dark Age has begun. The descendants of the

apocalypse's survivors scavenge the remnants of the Before Times, struggling to build a new life amidst the ruins of the old. In a savage world

where the strong ravage and exploit the weak, the survivors' settlements are oases, connected only by convoys of armed and armoured vehicles that run the gauntlet of raiders... and worse. Though the threats of chemical and biological agents and radiation have all but faded, their taint lingers on in every mutant born to man and beast. This is the world of Atomic Highway. Atomic Highway is a complete roleplaying game. All you need to play it is this book, a few friends, paper and pencils, and a few ordinary dice.

Jupiter's Travels - Ted Simon 2007-01-25

Jupiter's Travels - Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGreggor - it provides an inspiration they will never forget. This classic text, which has

informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of *Riding Home* and *The Gypsy in Me*.

**Motorcyclist's Guide to Travel** - Mario Orsini  
2017-03-16

Have you ever dreamed about getting on your motorcycle and traveling across the country? Are you envious when you see motorcyclists with far away out-of-state plates and wish that could be you? Are you tired of fantasizing about taking that dream motorcycle trip and want to turn that dream into a reality? Since I began sharing my motorcycle travel photos and videos on social media, I've received countless emails and questions from people interested in motorcycle

touring but with no idea where to begin. That's why I decided to write *Motorcyclist's Guide to Travel*. I want to be able to share this information with as many motorcyclists as possible. This book isn't about motorcycle travel theory or philosophy. I share with you the exact same methods and steps I use to plan and execute my own motorcycle trips all throughout the US. I cover how to plan and prepare for the trip, what to do during the trip as well as what to do after you return home. I go over different types of bikes and modifications you can make to them to make them more "touring worthy." I also cover all the different types of riding safety gear and what to look for when purchasing. And finally for those of you who don't know where you want to ride; that's ok. I also show you how come up with your own travel ideas. *Motorcyclist's Guide to Travel* will give you all the information you'll need to finally take that epic trip you've been dreaming about.

*Electrical Contracting* - Michael Neidle  
2013-10-22

*Electrical Contracting, Second Edition* is a nine-chapter text guide for the greater efficiency in planning and completing installations for the design, installation and control of electrical contracts. This book starts with a general overview of the efficient cabling and techniques that must be employed for safe wiring design, as well as the cost estimation of the complete electrical contract. The subsequent chapters are devoted to other electrical contracting requirements, including electronic motor control, lighting, and electricity tariffs. A chapter focuses on the IEE Wiring Regulations and Statutory Regulations to ensure compliance to the fundamental requirements for safety. The discussion then shifts to visual inspection and testing in accordance with the IEE Wiring Regulations. The last chapter describes the special role of the Joint Industrial Council for Electrical Installation Contracting in introducing a rational and equitable incomes policy into the industry. This text includes many worked

examples and illustrations to demonstrate how the technical and commercial aspects are put into practice.

Joseph Campbell: "The airplane has replaced the bird in the imagination as the symbol of the release of spirit from the bonds of earth." Hence, Invisible Sea. Part critique, part celebration of technology, these poems explore the symbolic and mythical associations of the historical moment when human beings took flight and, in a

sense, became Godlike. The opening section is in the voice of Wilbur Wright as he unlocks the mysteries of human flight and, consequently, pays a heavy price. The next section examines the stories of other early aeronauts, both legendary and real, from Daedalus to John Glenn, orbiting the earth. The title poem of the collection, a serial poem, scans the major discoveries of aeronautics, beginning with Da Vinci's study of fluids and ending with trans-sonic flight.

**Formula 1 Car by Car 1990-99** - Peter Higham  
2021-05-18

The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated, from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined Cooper playing the starring roles, and

BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 11/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrolled the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into

Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).

Winter Tourism - Ulrike Pröbstl-Haider  
2019-10-03

Winter tourism has seen increased levels of investment in recent times, in an effort to reduce economic risk, address environmental concerns and adapt to the effects of global warming. New ski destinations are developing and merging with traditional ones to increase spatial distribution, while many established leading resorts are adapting their management models. Climate change adaptation processes are supported by the reduction of CO2 emissions and energy consumption in ski resorts. Current planning challenges include the increasing importance of

scenic beauty, nature and sustainable development, as well as snow reliability, snow management and safety issues.

*The Black Opal* - Katharine Susannah Prichard  
2021-03-21T16:58:09Z

Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining

community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for his knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of

outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.
