Handbook of Nutrition and Pregnancy - Carol J. Lammi-Keefe 2018-08-03

□ This easy to use text provides practitioners and researchers with a global view of current and emerging issues concerned with successful pregnancy outcomes and approaches that have been successful or show promise in ensuring a successful pregnancy. The fully updated and revised second edition expands its scope with topics not covered in the first edition including pregnancy and military service; sleep disorders during pregnancy; the gut microbiome during pregnancy and the newborn; requirement for vitamin D in pregnancy; the environment—contaminants and pregnancy; preeclampsia and new approaches to treatment; health disparities for

whites, blacks, and teen pregnancies; depression in pregnancy—role of yoga; safe food handling for successful pregnancy outcome; relationship of epigenetics and diet in pregnancy; caffeine during pregnancy; polycystic ovary syndrome; US Hispanics and preterm births; celiac disease and pregnancy; cannabis use during pregnancy. The second edition of Handbook of Nutrition and Pregnancy will be a valuable resource for clinicians and other healthcare professionals who treat and counsel women of child-bearing age and pregnant women. *World Malaria Report 2018* - World Health Organization 2019-02-12 This year's report shows that after an unprecedented period of success in global malaria control progress has stalled. Data from 2015-2017 highlight that

no significant progress in reducing global malaria cases was made in this period. There were an estimated 219 million cases and 435 000 related deaths in 2017. The World malaria report 2018 draws on data from 90 countries and areas with ongoing malaria transmission. The information is supplemented by data from national household surveys and databases held by other organizations.

School Breakfast Program

- Judi Bartfeld 2010-02
Participation in the School Breakfast Program (SBP) is much less common than participation in the Nat. School Lunch Program, even among children with access to both programs. This report examines participation in the SBP among 3rd grade public school students, as well as the impacts of the

program on food insecurity and children's risk of skipping breakfast. Students are more likely to participate when breakfast is served in the classroom, when time available for breakfast in school is longer, and when they come from lower income or time-constrained households. Children with access to the SBP are more likely to eat breakfast in the morning and that program access may enhance food security among families at the margin of food insecurity. Illus. Gender and Transport - 2007

The Bulletin is an annual peer-reviewed journal of the Transport and Tourism Division of the Economic and Social Commission for Asia and the Pacific (ESCAP). It provides a medium for the sharing of knowledge, experience, ideas, policy options

and information on the development of transport infrastructure and services in the Asia-Pacific region. This edition is devoted to issue related to women and transport. Six articles included in the publication share views on gender issues in transport based on the outcome of research and analytical studies and experiences from a number of countries, and discuss important policy issues related to the subject.

Assessment of Higher Order Thinking Skills - Gregory Schraw
2011-10-01

This volume examines the

assessment of higher order thinking skills from the perspectives of applied cognitive psychology and measurement theory. The volume considers a variety of higher order thinking skills, including problem solving, critical thinking, argumentation, decision making, creativity, metacognition, and self-regulation. Fourteen chapters by experts in learning and measurement comprise four sections which address conceptual approaches to understanding higher order thinking skills, cognitively oriented assessment models, thinking in the content domains, and practical assessment issues. The volume discusses models of thinking skills, as well as applied issues related to the construction, validation,

administration and scoring of performancebased, selected-response, and constructed-response assessments. The goal of the volume is to promote a better theoretical understanding of higher order thinking in order to facilitate instruction and assessment of those skills among students in all K-12 content domains, as well as professional licensure and certification settings.

Buku ini memuat 4 bab materi kesehatan lingkungan yang kami ajarkan kepada mahasiswa di fakultas kedokteran, yakni yang terkait dengan masalah air,

perumahan, pengelolaan dampak lingkungan dan pengelolaan makanan. Buku ini disertai dengan soal latihan agar mahasiswa diberi kesempatan untuk melatih pemahaman mereka terhadap materi yang diberikan pada setiap bab. Jawaban atas soal latihan ini kami sertakan pada akhir buku ini. Buku ini juga disertai dengan daftar pustaka yang relevan yang berguna sebagai tambahan wawasan mengenai bab-bab yang dipelajari tersebut.

pH of the Skin: Issues and Challenges - C.

Surber 2018-08-21

The concept of expressing acidity as the negative logarithm of the hydrogen ion concentration was defined and termed pH in the beginning of the 20th century. The general usefulness of the pH concept for life science was recognized

and later gained importance to analytical research. Reports on results of pH measurements from living skin established the term acid mantle - the skin's own protective shield that maintains a naturally acid pH. It is invisible to the eye but crucial to the overall wellbeing of skin. Chronic alkalization can throw this acid mantle out of balance, leading to inflammation, dermatitis, and atopic skin diseases. It is therefore no surprise, that skin pH shifts have been observed in various skin pathologies. It is also obvious that the pH in topically applied preparations may play an important role. Optimal pH and buffer capacity within topical preparations not only support stability of active ingredients and auxiliary materials, but may also increase

absorption of the non-ionized species of an acidic or a basic active ingredient. They may even open up opportunities to modify and "correct" skin pH and hence accelerate barrier recovery and maintain or enhance barrier integrity. Further efforts are needed to standardize and improve pH measurements in biological media or pharmaceutical/cosmetic vehicles to increase and ensure quality, comparability, and relevance of research data. In this volume, we present a unique collection of papers that address past, present and future issues of the pH of healthy and diseased skin. It is hoped that this collection will foster future efforts in clinical and experimental skin research.

Berdasarkan studi pendahuluan di Desa Mugirejo, pada tanggal 31 Desember 2014 diketahui bahwa oleh petugas penyuluh pertanian telah dilakukan penyuluhan penggunaan alat pelindung diri dalam penggunaan pestisida untuk membasmi hama tanaman padi pada para petani RT 17 di Desa Mugirejo dari tanggal 15 sampai dengan 20 Januari tahun 2013. Seharusnya dengan adanya penyuluhan tersebut perilaku penggunaan alat pelindung diri para petani saat membasmi hama tanaman menggunakan pestisida akan meningkat dan kemudian diikuti dengan peningkatan kualitas aktivitas enzim cholinesterase. Namun

kenyataannya tidaklah demikian, yaitu nilai aktivitas enzim cholinesterase makin buruk.

Malaria is an increasing worldwide threat, with more than three hundred million infections and one million deaths every year. The world's poorest are the worst affected, and many treat themselves with traditional herbal medicines. These are often more available and

affordable, and sometimes are perceived as more effective than conventional antimalarial drugs.

Global Nutrition Report 2014 - International Food Policy Research Institute 2014-11-13

At the 2013 Nutrition for Growth Summit in London, 96 signatories (governments, civil society organizations, donors, United Nations agencies, and businesses) agreed to support the creation of an annual report on global nutrition that would be authored by an independent expert group, in partnership with a large number of contributors. The first edition of this report, the Global Nutrition Report 2014, puts a spotlight on worldwide progress by the 193

member countries of the United Nations in improving their nutrition status, identifies bottlenecks to change, highlights opportunities for action, and contributes to strengthened nutrition accountability on country and global levels.

Masalah Kesehatan Masyarakat Pesisir -

Fitriani Pramita Gurning, SKM, M. Kes. 2022-06-13

Masyarakat Pesisir Kabupaten Deli Serdang cukup pengetahuan tentang kebersihan dan pengolahan sampah, khususnya dalam pemilahan sampah daur ulang, organik dan non-organik. Masyarakat juga sudah mengetahui alternatif pemecahan masalah tentang pengolahan sampah, mengubah hidup dan lingkungan menjadi lebih bersih dan sehat. Dapat diketahui bahwa tingkat

kesadaran masyarakat sudah cukup bagus dalam pengolahan sampah, bisa dilihat dari hasil wawancara dan kuisioner yang telah diberikan dalam melakukan kegiatan. Jadi, seperti yang kita ketahui bahwa permasalahan sampah terjadi tidak hanya di daerah perkotaan. Melainkan permasalahan sampah juga banyak terjadi di daerah pesisir, sehingga menjadi biang penyakit bagi masyarakat sekitar. Dengan adanya penelitian ini juga berguna untuk diaplikasikan untuk wilayah pesisir. Sebab, dalam penelitian ini bertujuan untuk mengolah dan memilah sampah yang dapat dimanfaatkan kembali. Dalam penelitian ini juga dijelaskan bahwa masyarakat dapat memecahkan masalah tentang pengolahan sampah, mengubah hidup dan lingkungan menjadi

lebih bersih dan sehat.

Epilepsy is one of the most common serious disorders of the brain, affecting about 50 million people worldwide. Epilepsy accounts for 1 per cent

of the global burden of disease; 80 per cent of the burden of epilepsy is in the developing world, where in some areas 80-90 per cent of people with epilepsy receive no treatment at all. The Epilepsy Atlas provides an illustrative presentation of data and information on the current status of epilepsy services and care available from 160 countries, areas or territories covering 97.5 per cent of the world population. The information is primarily gathered from key persons in the area of epilepsy care in each country identified by International Bureau for Epilepsy and the International League against Epilepsy, and, in some cases, by WHO regional offices.

Improving Palliative Care for Cancer -
National Research Council 2001-10-19

In our society's aggressive pursuit of cures for cancer, we have neglected symptom control and comfort care. Less than one percent of the National Cancer Institute's budget is spent on any aspect of palliative care research or education, despite the half million people who die of cancer each year and the larger number living with cancer and its symptoms. Improving Palliative Care for Cancer examines the barriers—"scientific, policy, and social"—that keep those in need from getting good palliative care. It goes on to recommend public- and private-sector actions that would lead to the development of more effective palliative interventions; better information about currently used interventions; and

greater knowledge about, and access to, palliative care for all those with cancer who would benefit from it.

The fourth edition of the classic reference in the field of fetal and neonatal pathology, this revised and updated book retains the overall format of previous editions, presenting the same practical approach to the examination of both fetuses and perinatal deaths. It provides essential clinical and pathophysiological information and discusses the

pathogenesis of abnormalities as a basis for appropriate methods of investigation. While primarily addressing the morbid anatomist and histopathologist, it is also a valuable resource for obstetricians, neonatologists and paediatricians.

Diabetes Mellitus: Theory and Practice - Max Ellenberg 1970

Malaria - Institute of Medicine 1991-02-01
Malaria is making a dramatic comeback in the world. The disease is the foremost health challenge in Africa south of the Sahara, and people traveling to malarious areas are at increased risk of malaria-related sickness and death. This book examines the prospects for bringing malaria under control, with specific recommendations for U.S. policy, directions for research

and program funding, and appropriate roles for federal and international agencies and the medical and public health communities. The volume reports on the current status of malaria research, prevention, and control efforts worldwide. The authors present study results and commentary on the: Nature, clinical manifestations, diagnosis, and epidemiology of malaria. Biology of the malaria parasite and its vector. Prospects for developing malaria vaccines and improved treatments. Economic, social, and behavioral factors in malaria control. Research in Nursing and Health - Carol Noll Hoskins, PhD, RN, FAAN
2004-09-10

This book offers the reader a synopsis of research, appreciating

both the science and art of inquiry. It is designed to present the basic elements of conducting and understanding nursing research using an expeditious and useful reference format. This updated new edition offers the reader a step-by-step guide to conducting research and to understanding the research studies done by others. It describes both quantitative and qualitative investigations. The book is written in outline format, for quick reference. An important feature of the new edition is an extensive listing of online databases and knowledge resources. Graduate students and nurse researchers will find this an easily accessible source of valuable information.

Predicting Health Behaviour - Mark Conner

1996
Predicting Health Behaviour provides the theoretical background and examples of how to apply the most common social cognition models to the explanation of health behaviours. Each chapter has been written by key researchers in the area, and they follow a common structure which enables this book to be read as a 'user-manual'. Each chapter provides a general review of relevant research, applying the model to a variety of health behaviours (such as dietary choice, screening behaviour and sex) and discussing the strengths and weaknesses of models including the health belief model, protection motivation theory, the theory of planned behaviour, health locus of control and self-efficacy. The final chapter includes a

critique of the general approach, and signposts future directions for research.

**Root Caries: From
Prevalence to Therapy** -

M. Rocha de Olivera
Carrilho 2017-10-19

Case reports and
clinical trials
conducted in various
countries show, more and
more frequently, a
positive correlation
between the presence of
original teeth and
prevalence of root
caries in older age.

Because this is a global
trend, it is likely that
the predicted increase
in the worldwide elderly
population may soon
cause a significant

increase in the number
of people requiring
effective means of
preventing and treating
root surface caries. In
response to this
development, a team of
outstanding contributors
has reviewed the most
important aspects of
root caries. This new
volume presents their
findings along with
discussions of how to
deal with this health
issue that progressively
affects the oral health
balance. The chapters in
this book are divided in
four core parts:
Epidemiology, Biological
Determinants, Lesion
Assessment and Features
and Preventive and
Operative Therapies. The
collection of state-of-
the-art articles
provides a broad
overview and will serve
as a reference for
clinicians as well as
scientists and,
hopefully, will
encourage new research.
