The Routledge Handbook of Transregional Studies - Matthias Middell 2018-11-08

The Routledge Handbook of Transregional Studies brings together the various fields within which transregional phenomena are scientifically observed and analysed. This handbook presents the theoretical and methodological potential of such studies for the advancement of the conceptualization of global and area-bound developments. Following three decades of intense debate about globalization and transnationalism, it has become clear that border-crossing connections and interactions between societies are highly important, yet not all extend beyond the borders of nation-states or are of truly world-wide reach. The product of extensive international and interdisciplinary cooperation, this handbook is divided into ten sections that introduce the wide variety of topics within transregional studies, including Colonialism and Post-Colonial Studies, Spatial Formats, International Organizations, Religions and Religious Movements, and Transregional Studies and Narratives of Globalization. Recognizing that transregional studies asks about the space-making and space-formatting character of connections as well as the empirical status of such connections under the global condition, the volume reaches beyond the typical confines of area and regional studies to consider how areas are transcended and transformed more widely. Combining case studies with both theoretical and methodological considerations, The Routledge Handbook of Transregional Studies provides the first overview of the currently flourishing field of transregional studies and is the ideal volume for students and scholars of this diverse subject and its related fields.

Remaking North American Sovereignty - Jewel L. Spangler 2020-04-07

This essay collection presents a transnational history of mid-nineteenth century North America, a time of crisis that forged the continent's political dynamics. North America took its political shape in the crisis of the 1860s, marked by Canadian Confederation, the US Civil War, the restoration of the Mexican Republic, and numerous wars and treaty regimes conducted between these states and indigenous peoples. This crisis wove together the three nation-states of modern North America from a patchwork of contested polities. *Remaking North American Sovereignty* brings together distinguished experts on the histories of Canada, indigenous peoples, Mexico, and the United States to re-evaluate this era of political transformation in light of the global turn in nineteenth-century historiography. They uncover the continental dimensions of the 1860s crisis that have been obscured by historical traditions that confine these conflicts within a national framework.

Doing History - Mark Donnelly 2020-11-17

Doing History bridges the gap between the way history is studied in school or as represented in the media and the way it is studied at university level. History as an academic discipline has dramatically changed in recent decades and has been enhanced by ideas from other disciplines, the influence of postmodernism and historians' incorporation of their own reflections into their work. Doing History presents the ideas and debates that shape how we 'do' history today, covering arguments about the nature of historical knowledge and the function of historical writing, whether we can ever really know what happened in the past, what sources historians depend on, and the relative value of popular and academic histories. This revised edition includes new chapters on public history and activist histories. It looks at global representations of the past across the centuries, and provides up-to-date suggestions for further reading, presenting the reader with a thorough and current introduction to studying history at an academic level as well as a pathway to progress this study further. Clearly structured and accessibly written, it is an essential volume for all students embarking on the study of history.

A Global History of Modern Historiography - Georg G. Iggers 2008

Finally the book turns to the twin challenges to the western historical paradigms of 'objectivity' and 'progress' mounted by postmodernism and post-colonialism, critically examining the extent to which these might undermine the commitment of the historian to an honest and truthful representation of the past."-- Jacket.

The German Lesson - Siegfried Lenz 2021-03-30

In this quiet and devastating novel about the rise of fascism, Siggi Jepsen, incarcerated as a juvenile delinquent, is assigned to write a routine German lesson on the "The Joys of Duty." Overfamiliar with these joys, Siggi sets down his life since 1943, a decade earlier, when as a boy he watched his father, a constable, doggedly carry out orders from Berlin to stop a well-known Expressionist artist from painting and to seize all his "degenerate" work. Soon Siggi is stealing the paintings to keep them safe from his father. "I was trying to find out," Lenz says, "where the joys of duty could lead a people." Translated from the German by Ernst Kaiser and Eithne Wilkins

The Oxford Encyclopedia of Women in World History - Bonnie G. Smith 2008

The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive, 4-volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical, social, or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences, and illuminates how women worldwide have influenced and been influenced by these historical, social, and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies; geography and history; comparative culture and society, including adoption, abortion, performing arts; organizations and movements, such as the Egyptian Uprising, and the Paris Commune; women's and gender studies; and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued, go-to resource for scholars, college and high school students, and general readers alike.

Policing 'Bengali Terrorism' in India and the World - Michael Silvestri 2019-07-08

This book examines the development of imperial

intelligence and policing directed against revolutionaries in the Indian province of Bengal from the first decade of the twentieth century through the beginning of the Second World War. Colonial anxieties about the 'Bengali terrorist' led to the growth of an extensive intelligence apparatus within Bengal. This intelligence expertise was in turn applied globally both to the policing of Bengali revolutionaries outside India and to other anticolonial movements which threatened the empire. The analytic framework of this study thus encompasses local events in one province of British India and the global experiences of both revolutionaries and intelligence agents. The focus is not only on the British intelligence officers who orchestrated the campaign against the revolutionaries, but also on their interactions with the Indian officers and informants who played a vital role in colonial intelligence work, as well as the perspectives of revolutionaries and their allies, ranging from elite anticolonial activists to subaltern maritime workers.

Eurocentrism and the Politics of Global History - Alessandro Stanziani 2018-07-27

Global history locates national histories in the context of broader processes, in which the West is not necessarily synonymous with progress. And yet it often suffers from the same Eurocentrism that plagues national history, accepting Western categories and values uncritically and largely ignoring non-English historiographies. Alessandro Stanziani examines these tensions and asks what global history is and ought to be. Drawing upon a wide array of sources, he historicizes global history writing from the sixteenth century onward, tracing the forces of revolution, globalization, totalitarianism, colonization, decolonization and the Cold War. By considering global history in the context of a *longue durée*, multipolar perspective, this book assesses the strengths and limits of the field, and clarifies what is at stake.

A Global History of Modern Historiography - Georg G Iggers 2016-09-01

The first book on historiography to adopt a global and comparative perspective on the topic, *A Global History of Modern Historiography* looks not just at developments in the West but also at the other great historiographical traditions in Asia, the Middle East, and elsewhere around the world over the course of the past two and a half centuries. This second edition contains fully updated sections on Latin American and African historiography, discussion of the development of global history, environmental history, and feminist and gender history in recent years, and new coverage of Russian historical practices. Beginning in the mid-eighteenth century, the authors analyse historical currents in a changing political, social and cultural context, examining both the adaptation and modification of the Western influence on historiography and how societies outside Europe and America found their own ways in the face of modernization and globalization. Supported by online resources including a selection of excerpts from key historiographical texts, this book offers an up-to-date account of the status of historical writing in the global era and is essential reading for all students of modern historiography.

Transcultural History - Madeleine Herren 2012-06-19

For the 21st century, the often-quoted citation 'past is prologue' reads the other way around: The global present lacks a historical narrative for the global past. Focussing on a transcultural history, this book questions the territoriality of historical concepts and offers a narrative, which aims to overcome cultural essentialism by focussing on crossing borders of all kinds. *Transcultural History* reflects critically on the way history is constructed, asking who formed history in the past and who succeeded in shaping what we call the master narrative. Although trained European historians, the authors aim to present a useful approach to global history, showing first of all how a Eurocentric but universal historiography removed or essentialised certain topics in Asian history. As an empirical discipline, history is based on source material, analysed according to rules resulting from a strong methodological background. This book accesses the global past after World War I, looking at the well known stage of the Paris Peace Conferences, observing the multiplication of new borders and the variety of transgressing institutions, concepts, actors, men and women inventing themselves as global subjects, but sharing a bitter experience with almost all local societies at this time, namely the awareness of having relatives buried in far distant places due to globalised wars.

The Humanities between Global Integration and Cultural Diversity - Hans G. Kippenberg 2016-03-21

Modernization and digital globalization have proven to mark major thresholds where paradigmatic shifts and realignments take place. This volume aims to capture the reconfiguration of humanistic study between the forces of global integration and cultural diversification from a full range of disciplines within the humanities and social sciences. The key issue is discussed in three major parts. The first chapter examines transnational interpolations of the humanities as potential indicator for a globalizing humanistic research. The second chapter deals with humanistic revisions of modernity with and against globality. The third chapter discusses the ambiguous constitution of cultural diversity as a complement and counter-movement to global integration, ideologically moving between social cohesion and exclusion. The final chapter outlines what the threshold-crossing from modern to global humanities will mean for the future of humanistic research. The multidisciplinary study of culture within the history of the humanities documents and reflects the mobility and migration of its concepts and methods, moving and translating between disciplines, research traditions,

historical periods, academic institutions, and the public sphere.

Tensions of Social History - Alessandro Stanziani 2022-12-15

This book seeks to overcome the tension between 'western' and 'non-western' categories and tools in the study of global history, showing how most western approaches to the social sciences and history have developed through transnational and colonial interactions. Offering a transnational and global history of the main tools we have to understand the word and its transformations over the last three centuries, *Tensions of Social History* explores the construction of archives and historical memory, the making of statistics and their use in politics, the identification of social actors, and the emergence of key social theories. Providing key insights into how to write history and develop social sciences in the global era while avoiding eurocentrism and cultural exceptionalism, this ambitious book shows how global history is made of encounters rather than confrontations between civilizations.

Global Perspectives on Global History - Dominic Sachsenmaier 2011-08-04

In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement have remained limited in scope as theoretical exchanges on the tasks, responsibilities and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation and exchange.

"There's no point studying the past unless it sheds some light on the present," writes James Hawes in this brilliantly concise history that has already captivated hundreds of thousands of readers. "It is time, now more than ever, for us all to understand the real history of Germany."

The Routledge Companion to Marine and Maritime Worlds 1400-1800 - Claire Jowitt 2020-05-21

The Routledge Companion to Marine and Maritime Worlds, 1400–1800 explores early modern maritime history, culture, and the current state of the research and approaches taken by experts in the field. Ranging from cartography to poetry and decorative design to naval warfare, the book shows how once-traditional and often Euro-chauvinistic depictions of oceanic 'mastery' during the early modern period have been replaced by newer global ideas. This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus, da Gama, and Magellan, with an awareness of the sophistication and maritime expertise in Asia, the Arab world, and the Americas. By imparting riveting new stories and global perceptions of maritime history and culture, the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast, unpredictable ocean. With maritime studies growing and the ocean's health in decline, this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas.

Writing History in the Age of Biomedicine - Roger Cooter 2013-06-18

DIV A collection of ten essays paired with substantial prefaces, this book chronicles and contextualizes Roger Cooter's contributions to the history of medicine. Through an analysis of his own work, Cooter critically examines the politics of conceptual and methodological shifts in historiography. In particular, he examines the "double bind" of postmodernism and biological or neurological modeling that, together, threaten academic history. To counteract this trend, suggests Cooter, historians must begin actively locating themselves in the problems they consider. The essays and commentaries constitute a kind of contour map of history's recent trends and trajectories—its points of passage to the present—and lead both to a critical account of the discipline's historiography and to an examination of the role of intellectual frameworks and epistemic virtues in the writing of history. /div

Networks in the First Global Age, 1400-1800 - Rila Mukherjee 2011

The dynamics of the maritime world has held the fascination of researchers and scholars of history for long. Viewing the waterscapes as conduits of much economic and cultural sharing between peoples and lands, the focus of *Networks in the First Global Age: 1400-1800* is on the oceans and seas--the Indian, the Atlantic and the Pacific Oceans and the Mediterranean Sea--and economic, military and cultural transmissions within and across them. The book shows how conventional arguments in

history writing about the rise of the West, the hegemon of the State and the might of overseas colonial empires can be overturned by emphasizing on dynamic, collaborative, nonlinear networks as opposed to formal networks based on hierarchy. Such networks signal a completely different picture about global interactions in the period 1400-1800, emphasizing the centrality of peoples and commodities at different times in different parts of the world. More importantly, the book challenges chronological readings and urges us to think spatially instead. With contributions from Indian, American, French and Iberian scholars, *Networks in the First Global Age: 1400-1800* tells us what happens when the sea of history meets the sea of network analysis.

A Study of European History (1453-1815). - L. Mukherjee 1900

Modern World History - Uddipan Mukherjee 2019

The Inner Life of Empires - Emma Rothschild 2012-11-25

The birth of the modern world as told through the remarkable story of one eighteenth-century family. They were abolitionists, speculators, slave owners, government officials, and occasional politicians. They were observers of the anxieties and dramas of empire. And they were from one family. *The Inner Life of Empires* tells the intimate history of the Johnstones--four sisters and seven brothers who lived in Scotland and around the globe in the fast-changing eighteenth century. Piecing together their voyages, marriages, debts, and lawsuits, and examining their ideas, sentiments, and values, renowned historian Emma Rothschild illuminates a tumultuous period that created the modern economy, the British Empire, and the philosophical Enlightenment. One of the sisters joined a rebel army, was imprisoned in Edinburgh Castle, and escaped in disguise in 1746. Her younger brother was a close friend of Adam Smith and David Hume. Another brother was fluent in Persian and Bengali, and married to a celebrated poet. He was the owner of a slave known only as "Bell or Belinda," who journeyed from Calcutta to Virginia, was accused in Scotland of infanticide, and was the last person judged to be a slave by a court in

the British isles. In Grenada, India, Jamaica, and Florida, the Johnstones embodied the connections between European, American, and Asian empires. Their family history offers insights into a time when distinctions between the public and private, home and overseas, and slavery and servitude were in constant flux. Based on multiple archives, documents, and letters, *The Inner Life of Empires* looks at one family's complex story to describe the origins of the modern political, economic, and intellectual world.

Workers Across the Americas - Leon Fink 2011-04-13
The first major volume to place U.S.-centered labor history in a transnational focus, *Workers Across the Americas* collects the newest scholarship of Canadianist, Caribbeanist, and Latin American specialists as well as U.S. historians. These essays highlight both the supra- and sub-national aspect of selected topics without neglecting nation-states themselves as historical forces. Indeed, the transnational focus opens new avenues for understanding changes in the concepts, policies, and practice of states, their interactions with each other and their populations, and the ways in which the popular classes resist, react, and advance their interests. What does this transnational turn encompass? And what are its likely perils as well as promise as a framework for research and analysis? To address these questions John French, Julie Greene, Neville Kirk, Aviva Chomsky, Dirk Hoerder, and Vic Satzewich lead off the volume with critical commentaries on the project of transnational labor history. Their responses offer a tour of explanations, tensions, and cautions in the evolution of a new arena of research and writing. Thereafter, *Workers Across the Americas* groups fifteen research essays around themes of labor and empire, indigenous peoples and labor systems, international feminism and reproductive labor, labor recruitment and immigration control, transnational labor politics, and labor internationalism. Topics range from military labor in the British Empire to coffee workers on the Guatemalan/Mexican border to the role of the International Labor Organization in attempting to set common labor standards. Leading scholars introduce each section and recommend further reading.

Philanthropic Foundations at the League of Nations -

Ludovic Tournès 2022-03-31

This book presents a comprehensive analysis of the relations between US philanthropic foundations (in particular the Rockefeller Foundation and the Carnegie Endowment for International Peace) and the League of Nations. Generations of students and scholars have learned that the US, having played a key role in the

creation of the League of Nations in 1919, did not join the organization and stood aloof from its activities during the whole interwar period. Tournès questions this idea and argues that, even though the US was not a de jure member of the League of Nations, the financial, human, and intellectual investment of foundations brought about the de facto integration of the US within the League system, and also modified the latter's architecture. The book describes the Americanization of the League and shows how it resulted from three strategies pursued throughout the interwar period: that of US foundations, that of the Secretariat, and that of the US federal government. It also shows the limits of this Americanization and analyzes the role of the European experts in the coproduction of the postwar international order together with the US government. This book will be of interest to historians and political scientists, as well as undergraduate and graduate students in interdisciplinary programs of international relations.
