Strategic Management and Business Policy - Thomas L. Wheelen 1998

They Found Our Engineer - Michael Bishop 2011

The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This is truly a unique story from the time of post War World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

The History of Puerto Rico - Rudolph Adams Van Middeldyk 1903

Van Middeldyk's work was the first major historical study of Puerto Rico in English. Van Middeldyk advanced Puerto Rican historiography by building on the works of Brau, Coll y Toste, and Acosta, and by consulting early Spanish chronicles. A librarian at the Free Public Library of San Juan, Van Middeldyk possessed knowledge of and access to considerable primary source material. His history is sympathetic to the Indians and highly critical of Spanish colonial administration. Coming in the wake of American military occupation, the book sought to explain and justify control of the island by the United States.

The Design and Engineering of Curiosity - Emily Lakdawalla 2018-03-27

This book describes the most complex machine ever sent to another planet: Curiosity. It is a one-ton robot with two brains, seventeen cameras, six wheels, nuclear power, and a laser beam on its head. No one human understands how all of its systems and instruments work. This essential reference to the Curiosity mission explains the engineering behind every system on the rover, from its rocket-powered jetpack to its radioisotope thermoelectric generator to its fiendishly complex sample handling system. Its lavishly illustrated text explains how all the instruments work -- its cameras, spectrometers, sample-cooking oven, and weather station -- and describes the instruments' abilities and limitations. It tells you how the systems have functioned on Mars, and how scientists and engineers have worked around problems developed on a faraway planet: holey wheels and broken focus lasers. And it explains the grueling mission operations schedule that keeps the rover working day in and day out.

Logistics Management and Strategy - Alan Harrison 2019

From Preface: This text has a clear European foundation and an international appeal. In line with the

globalisation of logistics, we have included cases from other parts of the world than Europe - diverse though European logistics solutions are - including South Africa, the United States, Japan, China and Australia. Accordingly, we start in Part One with the strategic role of logistics in the supply chain. We continue by developing the marketing perspective by explaining our view of 'putting the end-customer first'. Part One finishes by exploring the concept of value and logistics costs. In Part Two, we review leveraging logistics operations in terms of their global dimensions, and of the lead-time frontier. Part Two continues by examining the challenges of coordinating manufacturing and retail processes, and the impact on logistics of just-in-time and the agile supply chain. Part Three reviews working together, first in terms of integrating the supply chain and second in terms of sourcing and supply management. Our book ends with Part Four, in which we outline the logistics future challenge. This text is intended for MSc students on logistics courses, and as an accompanying text for open learning courses such as global MSc degrees and virtual universities. It will also be attractive as a management textbook and as recommended reading on MBA options in logistics and supply chain management.

First Overland - Tim Slessor 2016-03-07

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

The Dobe Ju/'Hoansi - Lee 2012-02-01

This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people's reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju/'hoansi. Global Value Chains in a Changing World - Deborah Kay Elms 2013

A collection of papers by some of the world's leading specialists on global value chains (GVCs). It examines how GVCs have evolved and the challenges they face in a rapidly changing world. The approach is multi-disciplinary, with contributions from economists, political scientists, supply chain management specialists, practitioners and policy-makers. Co-published with the Fung Global Institute and the Temasek **Archaeology, Anthropology and Interstellar Communication** - NASA History Office 2014-09-01

Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

In the summer of 1803, Thomas Jefferson sent Meriwether Lewis and William Clark on a journey to establish an American presence in a land of unqualified natural resources and riches. Is it fitting that, on the 200th anniversary of that expedition, the United States, together with international partners, should embark on another journey of exploration in a vastly more extensive region of remarkable potential for discovery. Although the oceans cover more than 70 percent of our planet's surface, much of the ocean has been investigated in only a cursory sense, and many areas have not been investigated at all. *Exploration of the Seas* assesses the feasibility and potential value of implementing a major, coordinated, international program of ocean exploration and discovery. The study committee surveys national and international ocean programs and strategies for cooperation between governments, institutions, and ocean scientists and explorers, identifying strengths, weaknesses, and gaps in these activities. Based primarily on existing documents, the committee summarizes priority areas for ocean research and exploration and examines existing plans for advancing ocean exploration and knowledge.

Success and failure in the UK car manufacturing industry - Great Britain: Parliament: House of Commons: Trade and Industry Committee 2007-03-29

Although initially sparked by the collapse of MG Rover, this inquiry into the UK automotive industry was broadened to examine the following subjects: the principal reasons for the different records of success by different companies; how companies arrive at investment and closure decisions; the role played by trade unions; the appropriate Government response to closure announcements and what the Government could do to help the supply chain and workforce if plants are closed. Overall it foresees mixed prospects for car manufacturing in this country and thinks it is important

that the industry and Government put extra effort into improving skills, increasing R&D, adopting lean manufacturing techniques and strengthening the local supply chain.

The Power of the 2 x 2 Matrix - Alex Lowy 2011-03-23

By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges.

The Brand Innovation Manifesto - John Grant 2006-05-12

The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to

keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

The Ocean and Cryosphere in a Changing Climate - Intergovernmental Panel on Climate Change (IPCC) 2022-04-30

The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Jue 477 - Martin Port 2020-09

Revealed to the world in 1948, the Land-Rover not only revived the Rover Company's fortunes in an austerity-riddled post-war period, but galvanized its future, thanks to the model's almost immediate success. With the

manufacture of an initial 48 'pre-production' examples coming to a close, the first official production models were assembled - starting with chassis 860001. As original factory records prove, this pivotal vehicle was destined for His Royal Highness King George VI, but the decision was made to postpone the presentation and instead, 'number one' was retained by the factory until 1950, when it was registered JUE 477 before leaving Rover Company ownership. After decades left out in the cold and exposed to the elements, 860001 had certainly seen better days, but thanks to the determination of Sir Jim Ratcliffe, founder and Chairman of INEOS, the future of JUE 477 was secured in 2017. Over the next two years, a dedicated team of experts, led by chief restorer, Julian Shoolheifer set about restoring the vehicle while retaining as much of its original DNA as was physically, and safely, possible and making sure that this remarkable vehicle's history and past life was still worn with pride.

Tuscany - Paula Chamlee 2004-01

Her Majesty's Royal Coven - Juno Dawson 2022-05-31

"Superb and almost unbearably charming, Her Majesty's Royal Coven... expertly launches an exciting new trilogy." -The New York Times Book Review "Talk about a gut punch of a novel. ...A provocative exploration of intersectional feminism, loyalty, gender and transphobia [that] invites readers into an intricately woven web of magic, friendship and power." -The Nerd Daily A Discovery of Witches meets The Craft in this epic fantasy about a group of childhood friends who are also witches. If you

look hard enough at old photographs, we're there in the background: healers in the trenches; Suffragettes; Bletchley Park oracles; land girls and resistance fighters. Why is it we help in times of crisis? We have a gift. We are stronger than Mundanes, plain and simple. At the dawn of their adolescence, on the eve of the summer solstice, four young girls--Helena, Leonie, Niamh and Elle--took the oath to join Her Majesty's Royal Coven, established by Queen Elizabeth I as a covert government department. Now, decades later, the witch community is still reeling from a civil war and Helena is the reigning High Priestess of the organization. Yet Helena is the only one of her friend group still enmeshed in the stale bureaucracy of HMRC. Elle is trying to pretend she's a normal housewife, and Niamh has become a country vet, using her powers to heal sick animals. In what Helena perceives as the deepest betrayal, Leonie has defected to start her own more inclusive and intersectional coven, Diaspora. And now Helena has a bigger problem. A young warlock of extraordinary capabilities has been captured by authorities and seems to threaten the very existence of HMRC. With conflicting beliefs over the best course of action, the four friends must decide where their loyalties lie: with preserving tradition, or doing what is right. Juno Dawson explores gender and the corrupting nature of power in a delightful and provocative story of magic and patriarchy, friendship and feminism. Dealing with all the aspects of contemporary womanhood, as well as being phenomenally powerful witches, Niamh, Helena, Leonie and Elle may have grown apart but they will always be bound by the sisterhood of the coven.
