Healing Your Grieving Heart After a Military Death - Bonnie Carroll 2015-07-01

Practical methods for healing after the loss of a member of the military When a loved one is killed in the line of duty, this book affirms that survivors' grief is shaped by the unique circumstances of the death. Because military deaths are almost always sudden and violent, the traumatic nature of the loss creates a two-part grief—one focused on the manner in which the person died, the other focused on the long-term repercussions of life without this special person. This guide acknowledges the unique mixture of sadness, pride, anger, and blame that often characterizes grief after a military death, including in the event of a military suicide, and offers ideas for constructively expressing thoughts and feelings. Anyone whose life has been touched by a military death will find compassionate understanding and healing guidance in the pages of this handbook.

CIMOSA: Open System Architecture for CIM - ESPRIT Consortium AMICE 2012-12-06

Enterprise operation efficiency is seriously constrained by the inability to provide the right information, in the right place, at the right time. In spite of significant advances in technology it is still difficult to access information used or produced by different applications due to the hardware and software incompatibilities of manufacturing and information processing equipment. But it is this information and operational knowledge which makes up most of the business value of the enterprise and which enables it to compete in the marketplace. Therefore, sufficient and timely information

access is a prerequisite for its efficient use in the operation of enterprises. It is the aim of the ESPRIT project AMICE to make this knowledge base available enterprise-wide. During several ESPRIT contracts the project has developed and validated CIMOSA: Open System Architecture for CIM. The CIMOSA concepts provide operation structuring based on cooperating processes. Enterprise operations are represented in terms of functionality and dynamic behaviour (control flow). Information needed and produced, as well as resources and organisational aspects relevant in the course of the operation are modelled in the process model. However, the different aspects may be viewed separately for additional structuring and detailing during the enterprise engineering process.

Communicating Embedded Systems -

Francine Krief 2013-03-04

Embedded systems become more and more complex and require having some knowledge in various disciplines such as electronics, data processing, telecommunications and networks. Without detailing all the aspects related to the design of embedded systems, this book, which was written by specialists in electronics, data processing and telecommunications and networks, gives an interesting point of view of communication techniques and problems in embedded systems. This choice is easily justified by the fact that embedded systems are today massively communicating and that telecommunications and networks constitute the main sector of embedded systems.

The Media in Arab Countries - Tourya Guaaybess 2019-05-21

In early research work on international communication, the countries of North Africa and the Middle East were seen as part of the "Third World", and the media had to be at the service of development. However, this situation is changing due to the transnationalization and liberalization of the media. Indeed, since the 1990s, the entry of the South - and Arab countries in this case - into the "information society" has become the dominant creed, although the vision is still globalizing and marked by stereotypes. Representations of these societies are closely associated with international relations and geopolitics, characterized by tensions and conflicts. However, a force has come to disrupt the traditional rules of the game: Arab audiences. Digital media, the dissemination of which has been enabled by the implementation of the "information society", empowers them to participate fully in a media confluence. This liberation from the discourse has two major consequences: the media and journalism sector has become more strategic than ever, and action toward development must be reinvented.

Financial Accounting - Robert Libby 1996

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the

relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

Uncertainty, Macroeconomic Stability and the Welfare State - Sven R Larson 2019-01-15

This title was first published in 2002: This monograph sets out to model a macroeconomy that is inherently unstable because of qualitative - or Keynesian - uncertainty. By modelling a macroeconomic theory, this approach to fixed or sticky prices also investigates the link between uncertainty, sticky prices, and macro-stability - by suggesting that such prices improve economic activity rather than impeding it.

Balbuzar - Geïrard Moncomble 2022-01-12

A fable about freedom, about resistance, about power. And an ode to nature. In the Sarboucane sea, Balbuzar the pirate reigns supreme. He attacks, plunders, sinks, and ransoms everything that comes within his reach. Savage, cruel, formidable, certainly, Balbuzar is, but also with a certain bonhomie, and a great sense of justice. He is in harmony with the sea, the islands, the wind, the rocks. Around him, birds, always. Men, women, children...they all love him. For he is free as the air. But now the Empress Pépita XIII is worried about her state of affairs, and Balbuzar's constant plundering. She sends against him her best officer, the Commodore, at the head of an armada. He represents force, order, law.

Arrogant, domineering, relentless. And sure to be the one who will clean the Sarboucane sea.

Balbuzar and the Commodore clash. Two exceptional sailors, two sharp warriors. The fight begins, shattering, tumultuous. The struggle, however, is unequal, for the Commodore has immense resources, an army behind him and the power of the empire. He's built a gigantic ship that will surely sweep away the pirates and their black-flag flotilla. Balbuzar's fate seems certain.

Will the outlaw be crushed by the enormity of the adversary? Cooked in the imperial pot? Or will the cunning pirate find the rift in the monster's breastplate? Will he defeat his monstrous foe, like David blasting Goliath? A story that will delight young and old, and artwork that bears repeated viewing to take it all in. Will the cunning pirate Balbuzar be able to find the chink in the monstrous Commodore's armor? Geïrard Moncomble's prose deftly balances action, humor, and poetry while Freideiric Pillot's stunning, gorgeously detailed illustrations help paint this rousing, unforgettable tale. One that you'll want to come back to again and again... Featuring 32 double page illustrations interspersed with text. If you're an art geek, this book is a MUST!

Working with Street Children - Unesco 1995

Governments have traditionally left the plight of street children and working children, who by some counts number over 100 million, to individuals and nongovernmental organizations,

including many religious organizations. As a result, there are a multitude of small, uncoordinated, but highly effective projects throughout the world concentrated in urban areas. The 18 case studies presented illustrate the work carried out by these organizations and demonstrate how rehabilitation can be conducted working with and for children. Part 1, "Reinsertion through Education," looks at seven projects characterized by efforts to ensure the reinsertion of street and working children into their families or mainframe society through education. The four projects in part 2 rely on work rather than education in their efforts. Part 3 describes three projects that concentrate on improving the situation of children by teaching them to use the street environment and by capitalizing on their experiences and practical intelligence. Part 4 concentrates on the administration of projects for street children. The case studies are presented without commentary to form a collection of results and ideas to stimulate imagination and interest, particularly among those responsible for government policies. Valid solutions will come only from strong governmental commitment. (SLD)

The Economic Approach to Human Behavior

- Gary S. Becker 2013-02-06

Since his pioneering application of economic analysis to racial discrimination, Gary S. Becker has shown that an economic approach can provide a unified framework for understanding all human behavior. In a highly readable selection of essays Becker applies this approach to various aspects of human activity, including social interactions; crime and punishment; marriage, fertility, and the family; and "irrational" behavior. "Becker's highly regarded work in economics is most notable in the imaginative application of 'the economic approach' to a surprising breadth of human activity. Becker's essays over the years

have inevitably inspired a surge of research activity in testimony to the richness of his insights into human activities lying 'outside' the traditionally conceived economic markets. Perhaps no economist in our time has contributed more to expanding the area of

interest to economists than Becker, and a number of these thought-provoking essays are collected in this book."—Choice Gary Becker was awarded the Nobel Prize in Economic Science in 1992.
