English Language Education in a Global World - Lap Tuen Wong 2015
With English becoming the world's foremost lingua franca, the pressure to improve English language education

(ELE) has been steadily increasing. Consequently, the nature of ELE has changed drastically in the last decade. This has not only brought about a number of changes in the way English is taught and learnt, but it has also led to various innovative practices around the world. As a result, this edited book aims to shed light on the new theoretical and methodological developments in the field of ELE as well as the major issues and difficulties faced by practitioners in different parts of the globe. One very important variable that the book takes into account is the role that English already plays in a particular society since this may affect the views that teachers and students hold of the language. This in turn can significantly influence the way English is taught and learnt in given political, economic and socio-cultural settings. The purpose of this book is therefore to provide a comprehensive overview of the pedagogical methods, policies and problems that underlie English

language education in ten different regions across the world, including: the USA, Canada, the UK, Australia, New Zealand, India, Singapore, Japan, China and Hong Kong. In doing so, the different chapters in the book emphasize the importance of responding to linguistic and other forms of diversity in order to develop English language education in a globalized world. This book will be useful for teachers and students of English language, for English language curriculum and materials developers, and for those involved in educational policy-making and language acquisition research. Written by experts in the field, the range of content covered in the book's chapters will also help policy-makers, researchers and practitioners develop effective English language education practices and policies, and propose solutions to emerging issues in English language teaching and learning in different environments around the world. The newly-developed arguments and concerns pertaining to English language education will serve as future reference for professionals interested in this area of expertise.

Educating Second Language Teachers - Donald Freeman 2016-09-27

Donald Freeman examines how core ideas and practices in educating second language teachers relate to and differ from teacher education in other content areas. He weaves together research in general and second language teacher education with accounts of experience and practice to examine how background knowledge is defined in language teaching. Throughout, Freeman demonstrates how understanding the processes of teacher learning, knowing, thinking, and reflecting are 'the same things done differently' in second language teacher education. *Educating Second Language Teachers* reconsiders pre- and in-service teacher education, and proposes a detailed, comprehensive design theory for teacher education. "A masterful account of the landscape of second language teacher education and the development of its theoretical assumptions and practices. It offers a unique and original conceptualization of the field and will be an invaluable resource for teachers, teacher educators and researchers." Jack C. Richards, University of Sydney and University of Auckland Additional online

The Spelit Power Matrix - June H. Schmieder-Ramirez 2007-05-30

The SPELIT POWER MATRIX is a leadership tool for untangling the organizational environment from a social, political, economic, legal, intercultural and technical view. The SPELIT analysis method was developed for adult learners to have a framework for determining and formulating the answer to the question: What is? There is a need to analyze the environment in all organizations, whether you are entering a new organization or to benchmark the existing organization. The purpose of this text is to show how perceptive leaders can analyze environments in preparation for possible future action. We demonstrate how the methodology aligns with previous theories regarding environmental scanning and produces a workable framework for the perceptive leader. The SPELIT POWER MATRIX is intended for practitioners doing a market analysis or diagnosis prior to implementing transitions, benchmarking in anticipation of an intervention, and can be used by undergraduate students and seasoned practitioners.

Wine and Tourism - Marta Peris-Ortiz 2015-12-01

The aim of this book is to show how wine tourism can be used as a model for sustainable economic development, driving economic growth and social development in some locations. It will explore the interaction between tourism and viticulture in wine tourism destinations, while also explaining some of the repercussions of these activities. This book covers various topics including regional development, environmental management, sustainable viticulture, quality management in wineries and wine tourism routes among others. Wine tourism, which combines two important yet distinct economic activities (i.e., tourism and viticulture), has recently emerged as a new tourism product driven by tourists' search for new experiences and wineries' need to diversify their businesses and seek new revenue streams to boost sales. This new form of tourism, which typically takes place in rural areas and which combines wine production with tourist activities, is becoming important for such regions by providing a complementary income source. It

provides a model for sustainable economic development for these regions, which for various reasons may otherwise struggle to develop. Featuring cases and business implications from various locations, this book provides an important source of knowledge—both theoretical and practical—suitable to academics, scholars, researchers, and practitioners in the tourism sector and the wine industry.

The Written Accent Marks in Spanish - Avigail Vicente 2016-12-30

The purpose of this book is to provide a step-by-step complete and detailed description of the rules that govern both the stress--oral emphasis placed on certain syllables in speech-- and the written accent marks-- graphic marks written on certain vowels-- in Spanish. The explanations are presented in English and accompanied by multiple examples in Spanish. When appropriate, differences between Spanish and English are presented. Each section is followed by exercises for practice. The last section of the book contains a list of the Spanish words used in the examples and exercises throughout the book. The book is intended for Spanish learners at the intermediate level of proficiency and above who wish to master the use of accents in writing, and for Spanish instructors who present this aspect of the language in their classes. Readers who want to delve deeper into the issues will find additional details and subtleties in the boxes named "For More."

Languages for Social Cohesion - David Newby 2009-01-01

The ECML's Languages for social cohesion programme (2004-2007) involved approximately 4500 language professionals from Europe and beyond. This publication focuses on key developments in language education promoted through the work of the European Centre for Modern Languages of the Council of Europe (ECML). It serves three main functions. Firstly, it summarises the ECML's contributions to fostering linguistic and cultural diversity in European societies. Secondly, it contains the proceedings of the ECML Conference, held in September 2007 at the University of Graz, to communicate the results of this programme to the wider public. Thirdly, it provides a preview of the projects which comprise the next programme of the ECML (2008-2011): 'Empowering language professionals: competences - networks - impact - quality'. In this way the publication both provides an overview of current issues and trends in European language teaching and indicates perspectives for the

future.

utilization of microalgae resources at commercial scale. Divided into four parts (fundamentals, microalgae-based processes, microalgae-based products, and engineering approaches applied to microalgal processes and products), the book explores the microbiology and metabolic aspects of microalgae, microalgal production systems, wastewater treatment based in microalgae, CO₂ capture using microalgae, microalgae harvesting techniques, and extraction and purification of biomolecules from microalgae. It covers the largest number of microalgal products of commercial relevance, including biogas, biodiesel, bioethanol, biohydrogen, single-cell protein, single-cell oil, biofertilizers, pigments, polyunsaturated fatty acids, bioactive proteins, peptides and amino acids, bioactive polysaccharides, sterols, bioplastics, UV-screening compounds, and volatile organic compounds. Moreover, it presents and discusses the available engineering tools applied to microalgae biotechnology, such as process integration, process intensification, and techno-economic analysis applied to microalgal processes and products, microalgal biorefineries, life cycle assessment, and exergy analysis of microalgae-based processes and products. The coverage of a broad range of potential microalgae processes and products in a single volume makes this handbook an indispensable reference for engineering researchers in academia and industry in the fields of bioenergy, sustainable development, and high-value compounds from biomass, as well as graduate students exploring those areas. Engineering professionals in bio-based industries will also find valuable information here when planning or implementing the use of microalgal technologies. Covers

theoretical background information and results of recent research. Discusses all commercially relevant microalgae-based processes and products. Explores the main emerging engineering tools applied to microalgae processes, including techno-economic analysis, process integration, process intensification, life cycle assessment, and exergy analyses.

TEXES Core Subjects EC-6 (291) Book + Online - Luis A. Rosado 2016-03-29
REA's TExES Core Subjects EC-6 (291) Test Prep with Online Practice Tests Gets You Certified and in the Classroom! Texas teacher candidates seeking a generalist certificate for early childhood and elementary school are required to take the TExES Core Subjects EC-6 (291) test. REA's all-new test prep offers extensive coverage of the five subject areas assessed on the Core Subjects EC-6 exam: * English Language Arts and Reading & the Science of Teaching Reading (801) * Mathematics (802) * Social Studies (803) * Science (804) * Fine Arts, Health and Physical Education (805) The Core Subjects (291) test was launched in January 2015; it replaced the TExES Generalist (191) test. Whether you are a traditional college student or a career-changing professional, REA's TExES Core Subjects EC-6 (291) with Online Practice Tests is designed to help you pass the test so you can get certified and start your teaching career. Written by a team of noted teaching experts led by award-winning Texas-based author Dr. Luis Rosado, this test prep is relevant, up-to-date, and practical. This is focused prep custom-built for the TExES Core Subjects exam EC-6, with the right blend of review and practice content. The book contains five targeted subject reviews that align with each Core Subjects subtest. To help set your study path and boost your

confidence, we provide an online diagnostic test plus two full-length practice exams (one in the book and one online at the REA Study Center). Spanning more than 600 questions, the tests cover every domain and competency. In addition, computerized testing at the REA Study Center comes with automatic timing and scoring, as

well as diagnostic feedback on every question to help you zero in on the topics that give you trouble now, so you can succeed on test day. REA's TExES Subjects EC-6 (291) is a must-have for anyone who wants to teach early childhood and elementary school.
