In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. How to College - Andrea Malkin Brenner 2019-04-23

The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as "scaffolding" for students; and first-years have to do what they call "adulting." Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. *How to College* is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school year, preparing students to succeed and thrive as they transition and adapt to college. The book draws on the authors' experience

teaching, writing curricula, and designing programs for thousands of first-year college students over decades.

A Concise Survey of Western Civilization - Brian A. Pavlac 2015-02-19

This lively text offers a brief, readable description of our common Western heritage. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms “supremacies and diversities” develop major themes of conflict and creativity throughout history. “Supremacies” centers on the use of power to dominate societies, ranging from warfare to ideologies. Supremacy seeks stability, order, and incorporation. “Diversities” encompasses the creative impulse that produces new ideas, as well as the efforts of groups of people to define themselves as “different.” Diversity creates change, opportunity, and individuality. These themes of historical tension and change—whether applied to political, economic, technological, social, or cultural trends—offer a bridging explanatory organization. The text is also informed by five topical themes: technological innovation, migration and conquest, political and economic decision making, church and state, and disputes about the meaning of life. Throughout, judicious “basic principles” present summaries of historical realities and primary source projects offer students the chance to evaluate differing points of view about the past. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for courses on Western Civilization.
