**The Public Affairs Faculty Manual** - Bruce D. McDonald III 2020-02-26

While public affairs faculty study administration and management techniques, few administrators of public affairs programs receive formal training in the nuts and bolts of academic administration. Even those faculty who come to academia after distinguished careers in managerial positions may not be ready for the very different (and difficult) environment of university administration. The Public Affairs Faculty Manual argues that public affairs as a field needs to ensure that knowledge about administration and management is applied to the running of its academic programs, and brings together major leaders in the discipline to explore key features of academic administration. Many of these leaders have served as Master of Public Administration (MPA) directors, chairs, and deans at the nation's top public affairs programs. Crucial issues of academic administration discussed include the basics of public affairs programs, models of governance, roles of different administrative leaders, planning and budgeting for programs, navigating the accreditation process, assessing and improving student learning, ensuring social equity and cultural competency, mentoring faculty, developing curriculum, and helping provide service and applied research to community partners. Contributors have served as MPA directors, chairs, and deans at the nation's top public affairs programs. Themes running throughout the book's chapters are examined, and additional resources to help manage public affairs programs are offered. This collection of essays and the strategies within it are designed to encourage faculty to assume positions of leadership in their programs and manage those programs in an effective, efficient, and fair manner. The Public Affairs Faculty Manual is required reading for new, seasoned, and aspiring academic administrators in public administration, public policy, and nonprofit management programs, as well as schools of government.

**The Hematology Oncology Nurse Practitioner's Manual** - David G. Morrison 2013-08-01

Co-Authors Jack Saux M.D., Margaret Saux, Pilar Martinez Morrison R.Ph., & Melissa Pennebaker C.R.N.P. New Hematology/Oncology Nurse Practitioners are only expected to work like 12 people at once and only be one step at most behind their physician partners. While this is a ridiculous example it is all too often all too true. For better or for worse most Hematologists and Oncologists are way too busy. We really need the help of Nurse Practitioners to help our patients. Please do not think this belittles or under rates the help we need from our other staff. Modern care of those with blood or malignant disorders is very much a team effort. This book is published to help our colleagues who have chosen to be Nurse Practitioners to have a quick reference guide to many of the common clinical conundrums encountered in clinical practice. It is supposed to help not only with the technical nuts and bolts but also to help handle the emotional trauma of this field as well. It is not to replace the input of collaborating physicians. In fact the test section has been designed to force communication and teaching.
