Nature, Empire, and Nation - Jorge Cañizares-Esguerra 2006
This collection of essays explores two traditions of interpreting and manipulating nature in the early-modern and nineteenth-century Iberian world: one instrumental and imperial, the other patriotic and national. Imperial representations laid the ground for the epistemological transformations of the so-called Scientific Revolutions. The patriotic narratives lie at the core of the first modern representations of the racialized body, Humboldtian theories of biodistribution, and views of the landscape as a historical text representing different layers of historical memory.

Dallas's Little Mexico - Sol Villasana 2011-04-04

Little Mexico was Dallas's earliest Mexican barrio. "Mexicanos" had lived in Dallas since the mid-19th century. The social displacement created by the Mexican Revolution of 1910, however, caused the emergence of a distinct and vibrant neighborhood on the edge of the city's downtown. This neighborhood consisted of modest homes, small businesses, churches, and schools, and further immigration from Mexico in the 1920s caused its population to boom. By the 1930s, Little Mexico's population had grown to over 15,000 people. The expanding city's construction projects, urban renewal plans, and land speculation by developers gradually began to dismantle Little Mexico. By the end of the 20th century, Little Mexico had all but disappeared, giving way to upscale high-rise residences and hotels, office towers of steel and glass, and the city's newest entertainment district. This book looks at Little Mexico's growth, zenith, demise, and its remarkable renaissance as a neighborhood.
