A Companion to South Asia in the Past - Gwen Robbins Schug 2016-05-16

A Companion to South Asia in the Past provides the definitive overview of research and knowledge about South Asia's past, from the Pleistocene to the historic era in India, Pakistan, Sri Lanka, Bangladesh and Nepal, provided by a truly global team of experts. The most comprehensive and detailed scholarly treatment of South Asian archaeology and biological anthropology, providing ground-breaking new ideas and future challenges Provides an in-depth and broad view of the current state of knowledge about South Asia's past, from the Pleistocene to the historic era in India, Pakistan, Sri Lanka, Bangladesh and Nepal A comprehensive treatment of research in a crucial region for human evolution and biocultural adaptation A global team of scholars together present a varied set of perspectives on South

Asian pre- and proto-history

IA64 Processor Simulator - Yang Min (Paul). Lin 2002

Shivaji & suraaj - Anil Madhav Dave 2021-01-01

• The king (ruler or administrator) should fix a time for his meals. Normally, he should not alter them. A king (administrator) must not consume intoxicants. He should also not permit persons close to him to indulge in such substances. If a king is without a weapon, he must not stare at the ground for too long. • What was the size of the personal treasury (of the leader) and the royal one while taking oath before the commencement of his task? What was the difference between both treasuries when he finally quit the scene? The difference is the measure of his financial probity and character. • Shivaji – “Kanhoji, I had promised you not to award him the sentence of death, which I have kept. But had I not punished him (Khandoji Khopda), the message that would have been conveyed to the people is that influence and contacts can trump even a crime as

grave as treason. Would that have been proper for Swarajya? • It is therefore the duty of every leader to detect and isolate traitors from his system, punish him and remorselessly prevent the tendency of betrayal from developing. • Jungles in Swarajya also have plenty of mango and jackfruit trees, whose wood can be used in the building of ships, but these should not be touched, as these aren't trees that can grow to their fullest in only a couple of years. The people have planted those trees and looked after them like their own children.
AKASHVANI - Publications Division (India), New Delhi
1961-10-29

"Akashvani" (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. It used to serve the listener as a broadsheet of broadcasting, and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August, 1937 onwards, it used to be published by All India Radio, New Delhi. From 1950, it was turned into a weekly journal. Later, The Indian Listener became "Akashvani" (English) w.e.f. January 5, 1958. It was made fortnightly journal again w.e.f. July 1, 1983.

Western Medicine and Public Health in Colonial Bombay, 1845-1895 - Mridula Ramanna 2002
The study examines the twin issues of Western medicine and public health in Bombay during the years 1845-1895. The work is the first to explore in detail the complex interrelationship between government, municipality and individual philanthropists over the issues of Western medicine and public health measures.
Hark, Hark! Hear the Story of a Science Educator - Jazlin Ebenezer 2020-06-01
Hark, Hark! Hear the Story of a Science Educator highlights some compelling ideas on science teaching and learning through the author's journey and includes evolution and revolution in the growth of scientific knowledge. The book discusses views of McComas et al. and Lederman et al. on the nature of science, as well as the learning theories of Piaget (1926), Vygotsky (1978), and Marton (1981). The three theories of learning frame methods in teaching science. The author is well known in the science education research community for her groundbreaking work in student conceptions and conceptual change, particularly as related to phenomenography. Key Features: Helps science educators explore new avenues related to various innovative curricula, teaching, and learning Presents abstract learning theories, such as social constructivism in

personal stories and experiences Bridges the divide between the science education community and the general public on significant ideas of science teaching and learning Uncovers relational conceptual change inquiry learning Discusses current socioscientific community-based issues—other-centeredness—through scientific investigation and engineering design challenges

Knowing Nature - Mara J. Goldman 2011-03-15

Political ecology and science studies have found fertile meeting ground in environmental studies. While the two distinct areas of inquiry approach the environment from different perspectives—one focusing on the politics of resource access and the other on the construction and perception of knowledge—their work is actually more

closely aligned now than ever before. Knowing Nature brings together political ecologists and science studies scholars to showcase the key points of encounter between the two fields and how this intellectual mingling creates a lively and more robust ecological framework for the study of environmental politics. The contributors all actively work at the interface between these two fields, and here they use empirical material to explore questions of theoretical and practical import for understanding the politics that surround nature-society relations, from wildlife management in the Yukon to soil fertility in Kenya. In addition, they examine how various environmental knowledge claims are generated, packaged, promoted, and accepted (or rejected) by the different actors involved in specific cases of environmental management, conservation, and development. Finally, they ask what is at stake in the struggles surrounding environmental knowledge, how such struggles shape conceptions of the environment, and whose interests are served in the process.

Proceedings of the 4th International Conference on Applied Economics and Social Science, ICAESS 2022, 5 October 2022, Batam, Riau Islands, Indonesia - Dedi Kurniawan 2023-01-09

This volume contains a collection of papers presented at The 4th International Conference on Applied Economics and Social Science (ICAESS) 2022, which was held on 5th October 2022, in Batam, Indonesia online. Batam is the city of Politeknik Negeri Batam, which organized ICAESS. This conference's aim is to showcase research applications conducted by researchers. The research gap between academics and industries had become a significant challenge which is expected to be addressed during the conference. Our theme is "Responding the Era of Metaverse for Future Applied Technology". We have keynote speakers that delivering talks for the digital marketplace: Dr Hj Mohammad Nabil Almunawar, metaverse

for education: Prof. Yusep Rosmanyah, S.T., M.Sc, PhD, and industry 4.0: Ashwani Singh, PhD. We are indebted to them, we hope their research continues successfully. ICAESS has 4 tracks including Economics Track, Accountings Track, Managements Track, and Social Sciences Track. We received 112 papers addressing topics in line from the tracks, including Economic Development, Accounting Theory, Business Administration, Development Studies and other related fields. We accepted 50 articles, with an acceptance rate of 45%. Special thanks to the Organizing Committee members along with the numerous reviewers for their assistance with the reviews of the submitted manuscripts. Finally, we sincerely express gratitude to all the participants, and the authors for all their work, thus making this conference a success. We also want to thank the staff of EAI for their help in making this publication possible.

Development Projects and A Critical Theory of

Environment - Jyotsna C Bapat 2005-06-14

This book proposes an original critical theory of environmental sociology which is verified through actual projects relating to infrastructure development. The author locates each development project in its social, institutional and historical contexts, and explains their outcomes as the consequence of the actions of various individuals and groups, each acting rationally to optimise their own interests. The author argues that agencies regulating environmental impact should adopt a 'reconstructive adaptive' strategy aimed at leaving the physical environment in a better condition than when the project began. Similarly, development projects should ensure that people affected by these projects, especially those whose livelihoods are linked to environmental resources, are at least as well off as they were without the project.
