The Extra Pharmacopoeia of Martindale and Westcott (Classic Reprint) - William Harrison Martindale 2017-11-24

Excerpt from The Extra Pharmacopoeia of Martindale and Westcott
Iontophoresis, i.e., the electrical introduction into the tissues of medicaments in the ionised condition - The word ion, meaning a traveller, was given by Michael Faraday to the nascent particles of the elements produced in the dissociation of a molecule of a substance in solution. This chapter, it is hoped, will be useful as giving the principles of the subject in a concise form with references to recent original articles which have appeared, and

which heretofore were scattered in various communications to scientific journals. Working notes on the various drugs used are provided. There can be little doubt that this method of employing medicinal chemicals has many advantages, e.g., localisation of the treatment to the actual sphere of disease, its relative painlessness and its simplicity. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the

original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
