

Medicinal Plants And Traditional Medicine In Sierra Leone Cyrus Macfoy

As recognized, adventure as without difficulty as experience approximately lesson, amusement, as skillfully as union can be gotten by just checking out a book **Medicinal Plants And Traditional Medicine In Sierra Leone Cyrus Macfoy** next it is not directly done, you could take on even more in relation to this life, nearly the world.

We allow you this proper as with ease as simple way to acquire those all. We manage to pay for Medicinal Plants And Traditional Medicine In Sierra Leone Cyrus Macfoy and numerous ebook collections from fictions to scientific research in any way. among them is this Medicinal Plants And Traditional Medicine In Sierra Leone Cyrus Macfoy that can be your partner.

Herbal Medicine in Andrology - Ralf Henkel 2020-11-13

Herbal Medicine in Andrology: An Evidence-Based Update provides a comprehensive overview of ethnomedical approaches in andrology, including ethnopharmacology of plant extracts and relevant bioactive compounds. It highlights information on the availability of medicinal plants and the legal and procedural processes involved in developing a marketable product. This reference helps clinicians and scientists develop an understanding on how herbal medicine can be used to treat andrological patients in practice. Only a limited number of journal articles are available on this topic, making this reference a valuable source of information for a large audience, including urologists, andrologists, gynecologists, reproductive endocrinologists and basic scientists. Provides essential evidence-based information about herbal medicine Offers an ethnopharmacological background on bioactive compounds in certain plant extracts Educates the basic scientist and clinician on the use of herbal medicines in andrology Provides an update to recent advances on herbal medicine in andrology from world experts
Some Medicinal Plant Recipes of the Mende, Sierra Leone - Guy Barnish 1992

Astragalus - Kimball Chatfield 2014-07-31

Astragalus: Ancient Herb for Modern Times covers both the modern research and clinical use of this very popular medicinal plant. This book dispels many common myths about *Astragalus*. Covers major health problems helped by *Astragalus* including Diabetes, Cancer, Heart Disease, Autoimmune Diseases, Liver disease. Includes several classical traditional Chinese medicine *Astragalus* combinations. Large reference chapter included. This landmark book is the only comprehensive writing on one of the popular herbs in the world.

Medicinal Plants - Gaby H. Schmelzer 2008

Tarahumara Medicine - Fructuoso Irigoyen-Rascón 2015-10-13

The Tarahumara, one of North America's oldest surviving aboriginal groups, call themselves Rarámuri, meaning "nimble feet"—and though they live in relative isolation in Chihuahua, Mexico, their agility in long-distance running is famous worldwide. *Tarahumara Medicine* is the first in-depth look into the culture that sustains the "great runners." Having spent a decade in Tarahumara communities, initially as a medical student and eventually as a physician and cultural observer, author Fructuoso Irigoyen-Rascón is uniquely qualified as a guide to the Rarámuri's approach to medicine and healing. In developing their healing practices, the Tarahumaras interlaced religious lore, magic, and careful observations of nature. Irigoyen-Rascón thoroughly situates readers in the Rarámuri's environment, describing not only their health and nutrition but also the mountains and rivers surrounding them and key aspects of their culture, from long-distance kick-ball races to corn beer celebrations and religious dances. He describes the Tarahumaras' curing ceremonies, including their ritual use of peyote, and provides a comprehensive description of Tarahumara traditional herbal remedies, including their botanical characteristics, attributed effects, and uses. To show what these practices—and the underlying concepts of health and disease—might mean to the Rarámuri and to the observer, Irigoyen-Rascón explores his subject from both an outsider and an insider (indigenous) perspective. Through his balanced approach, Irigoyen-Rascón brings to light relationships between the Rarámuri healing system and conventional medicine, and adds significantly to our knowledge of indigenous American therapeutic practices. As the most complete account of Tarahumara culture ever written, *Tarahumara Medicine* grants readers access to a world rarely seen—at once richly different from and inextricably connected with the ideas and practices of

Western medicine.

My Nana's Remedies - Roni Capin Rivera-Ashford 2002

A little girl tells how her grandmother makes special teas and warm drinks for her and her little brother when they are not feeling well.

Wind in the Blood - Hernan Garcia 1999-10-22

Wind in the Blood is a detailed look at Mayan medicine on Mexico's Yucatan peninsula and its similarities to Chinese traditional medicine. It was originally published in Spanish as a manual for health workers in Mayan areas to bridge the gulf between Western medical technique and Mayan medical knowledge. Mexican physicians Hernan Garcia, Antonio Sierra, and Hiberto Balam discovered that the similarities between Mayan medicine and traditional Chinese medicine were profound and helpful in their medical work.

Medicinal Plants and Traditional Medicine in Sierra Leone - Cyrus Macfoy 2013-12-05

Medicinal plants and traditional medical practices from Sierra Leone in West Africa have much to offer the rest of the world. Dr. Cyrus MacFoy, an experienced researcher and scientific consultant, highlights more than two hundred plants used to cure more than one hundred diseases and illnesses in this informational guide. He provides the plant location, their botanical and local names, English common names, and the ways they are used to treat and cure ailments and diseases. He also includes • findings regarding the conservation, sustainable use, and development of new drugs; • ways to incorporate different techniques into the health care delivery system; and • chemical analyses and biological activity testing of plant species. Discover how Africa's traditional healers play a critical role in treating diseases such as HIV and AIDS. In developing countries with poor infrastructure, these healers are located in nearly every rural village setting as well as in the busy urban areas. While underappreciated, they may play a key role in solving the continent's diverse health problems.

Medical Ethnobotany of the Isthmus-Sierra Zapotecs (Oaxaca, Mexico) and Biological-phytochemical Investigation of Selected Medicinal Plants - Barbara Frei 1997

Handbook of African Medicinal Plants, Second Edition - Maurice M. Iwu 2014-02-04

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the *Handbook of African Medicinal Plants* provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized

constituents of the plants.

Medicinal Plants - Hao Da 2015-06-29

Medicinal Plants: Chemistry, Biology and Omics reviews the phytochemistry, chemotaxonomy, molecular biology, and phylogeny of selected medicinal plant tribes and genera, and their relevance to drug efficacy. Medicinal plants provide a myriad of pharmaceutically active components, which have been commonly used in traditional Chinese medicine and worldwide for thousands of years. Increasing interest in plant-based medicinal resources has led to additional discoveries of many novel compounds, in various angiosperm and gymnosperm species, and investigations on their chemotaxonomy, molecular phylogeny and pharmacology. Chapters in this book explore the interrelationship within traditional Chinese medicinal plant groups and between Chinese species and species outside of China. Chapters also discuss the incongruence between chemotaxonomy and molecular phylogeny, concluding with chapters on systems biology and “-omics technologies (genomics, transcriptomics, proteomics, and metabolomics), and how they will play an increasingly important role in future pharmaceutical research. Reviews best practice and essential developments in medicinal plant chemistry and biology Discusses the principles and applications of various techniques used to discover medicinal compounds Explores the analysis and classification of novel plant-based medicinal compounds Includes case studies on pharmaphylogeny Compares and integrates traditional knowledge and current perception of worldwide medicinal plants

Christopher Hobbs's Medicinal Mushrooms: The Essential Guide -

Christopher Hobbs L.Ac., AHG 2021-03-30

Herbalist and mushroom expert Christopher Hobbs introduces the mushroom varieties most widely used for medicinal purposes, exploring their powerful health benefits, the science behind their effectiveness, and how to make mushroom medicine at home.

The SAGE Encyclopedia of Cancer and Society - Graham A. Colditz 2015-08-12

The first edition of the Encyclopedia of Cancer and Society was published in 2007 and received a 2008 Editors' Choice Award from Booklist. It served as a general, non-technical resource focusing on cancer from the perspective of the social and behavioral sciences, exploring social and economic impacts, the “business” of cancer, advertising of drugs and treatment centers, how behavior change could offer great potential for cancer prevention, environmental risks, food additives and regulation, the relation between race and ethnicity and cancer risk, socioeconomic status, controversies—both scientific and political—in cancer treatment and research, country-by-country entries on cancer around the world, and more. Given various developments in the field including new drug treatments, political controversies over use of the vaccines Gardasil and Cervarix with young girls to prevent cervical cancer, and unexpected upticks in the prevalence of adult smoking within the U.S. following decades of decline, the SAGE Encyclopedia of Cancer and Society, Second Edition serves as an updated and more current encyclopedia that addresses concerns pertaining to this topic. Key Features:

- Approximately half of the 700 first-edition articles revised and updated
- 30+ new entries covering new developments since 2006
- Signed entries with cross-references
- Further Readings accompanied by pedagogical elements
- New Reader's Guide
- Updated Chronology, Resource Guide, Glossary, and through new Index

The SAGE Encyclopedia of Cancer and Society, Second Edition serves as a reliable and precise source for students and researchers with an interest in social and behavioral sciences and seeks to better understand the continuously evolving subject matter of cancer and society.

Wild Plants of the Sierra Nevada - Ray S. Vizgirdas 2006

The Sierra Nevada of California and Nevada is the longest continuous mountain range in the United States. It contains over 50 percent of California's total flora, approximately 405 plant taxa endemic to the Sierra, and 218 taxa considered rare. Wild Plants of the Sierra Nevada inventories the flora of the entire range, including comprehensive descriptions of the plants; their traditional uses as food, medicine, or for making tools and other utensils; and information about their habitat. The authors describe the natural history and ecology of Sierra Nevada plants in terms of plant communities and life zones, and outline the basic principles of ethnobotany, the classification of plants, and methods of collecting plant specimens and protecting rare species. The plant descriptions are accompanied by line drawings of each major species, and the book includes a table of Sierra Nevada habitats and their associated plants, along with a list of threatened, endangered, and sensitive plant species found in the range. This text is an essential guide

for botanists, outdoors aficionados, and anyone interested in the intricate connections between plants, their environment, and our human species.

Phytochemistry of Medicinal Plants - John T. Arnason 2013-11-11

Phytochemicals from medicinal plants are receiving ever greater attention in the scientific literature, in medicine, and in the world economy in general. For example, the global value of plant-derived pharmaceuticals will reach \$500 billion in the year 2000 in the OECD countries. In the developing countries, over-the-counter remedies and “ethical phytomedicines,” which are standardized toxicologically and clinically defined crude drugs, are seen as a promising low cost alternatives in primary health care. The field also has benefited greatly in recent years from the interaction of the study of traditional ethnobotanical knowledge and the application of modern phytochemical analysis and biological activity studies to medicinal plants. The papers on this topic assembled in the present volume were presented at the annual meeting of the Phytochemical Society of North America, held in Mexico City, August 15-19, 1994. This meeting location was chosen at the time of entry of Mexico into the North American Free Trade Agreement as another way to celebrate the closer ties between Mexico, the United States, and Canada. The meeting site was the historic Calinda Geneve Hotel in Mexico City, a most appropriate site to host a group of phytochemists, since it was the address of Russel Marker. Marker lived at the hotel, and his famous papers on steroidal saponins from *Dioscorea composita*, which launched the birth control pill, bear the address of the hotel.

Healing Knowledge in Atlantic Africa - Kalle Kananaja 2021-02-04

Kananaja demonstrates how medical interaction in early modern Atlantic Africa was characterised by continuous knowledge exchange between Africans and Europeans.

Medicinal Plants in Tropical West Africa - Bep Oliver-Bever 1986-01-23

First published in 1986, this book describes the most important medicinal plants in tropical West Africa and similar humid tropical climates. After a short introduction about early traditional medicine, the bulk of the book gives an account of locally occurring plants, grouped by their medicinal actions. Plants that affect the cardiovascular and nervous systems are discussed, as are those with antibiotic, insecticidal and molluscicidal properties. Those which affect the hormonal systems of humans are catalogued and so are others that act as adrenal-cortex, sex and thyroid hormones. There is a full botanical index, which includes the commonly found synonyms for many of the plants and the work is illustrated by the author's own water colours. It may be of particular interest and use to pharmacists, biochemists, botanists and pharmacologists and of great value to those who exploit locally available resources in treating diseases in tropical areas.

Plant Medicines, Healing and Psychedelic Science - Beatriz Caiuby Labate 2018-04-28

This is a book about the intersections of three dimensions. The first is the way social scientists and historians treat the history of psychiatry and healing, especially as it intersects with psychedelics. The second encompasses a reflection on the substances themselves and their effects on bodies. The third addresses traditional healing, as it circles back to our understanding of drugs and psychiatry. The chapters explore how these dimensions are distinct, but deeply intertwined, themes that offer important insights into contemporary healing practices. The intended audience of the volume is large and diverse: neuroscientists, biologists, medical doctors, psychiatrists, psychologists; mental health professionals interested in the therapeutic application of psychedelic substances, or who work with substance abuse, depression, anxiety, and PTSD; patients and practitioners of complementary and alternative medicine; ethnobotanists and ethnopharmacologists; lawyers, criminologists, and other specialists in international law working on matters related to drug policy and human rights, as well as scholars of religious studies, anthropologists, sociologists, and historians; social scientists concerned both with the history of science, medicine, and technology, and concepts of health, illness, and healing. It has a potentially large international audience, especially considering the increasing interest in “psychedelic science” and the growing spread of the use of traditional psychoactives in the West.

Medicinal Plants of the World - Ivan A. Ross 2003-03-12

Ivan Ross takes advantage of the significant growth in the amount of new data available to update and expand his much acclaimed *Medicinal Plants of the World: Chemical Constituents, Traditional and Modern Medicinal Uses, Volume 1*. This considerably enhanced second edition contains new research and references on the immunomodulatory activity present in *Allium sativum*, *Mangifera indica*, and *Punica granatum*, the

antidiabetic effects of *Momordica charantia* and *Mucuna pruriens*, the anti-inflammatory activity found in *Mangifera indica* and *Arbus precatorius*, the cholesterol lowering effect of *Allium sativum* and *Moringa pterygosperma*, and the antitumor effect of *Arbus precatorius* and *Moringa pterygosperma*. There are also important new findings concerning the antiherpes simplex virus activity of *Mangifera indica*, the anti-Parkinson's activity of *Mucuna pruriens*, the antiviral activity in *Phyllanthus niruri* and *Jatropha curcas*, the hyperthyroid regulation properties of *Moringa pterygosperma*, and the antioxidant activity of *Mangifera indica*, *Punica granatum*, *Psidium guajava*, and *Allium sativum*. *Allium sativum* is highlighted for its treatment of unstable angina pectoris, sickle red blood cell dehydration inhibition, senescence ameliorative, chemoprotective, cardiovascular, antineoplastic, anticarcinogenic, and antiatherogenic effects. This revised and enhanced edition provides details on traditional medicinal uses, chemical constituents, pharmacological activities, clinical trials, color illustrations, Latin names, botanical descriptions, as well as providing an index and extensive bibliographies. Authoritative and exhaustively compiled, *Medicinal Plants of the World: Chemical Constituents, Traditional and Modern Medicinal Uses, Volume 1, 2nd Edition* offers pharmacists, physicians, medicinal chemists, toxicologists, and phytochemists a universal reference on twenty-six of the most widely used medicinal plants in the world.

The Biodiversity of African Plants - L.J.G. Van der Maesen 1996-06-30
The book includes papers on monographs and databases, on diversity of succulents, on various regions such as savannas, lowland rain forests and arid regions, on ecology and conservation, on generic delimitations in flowering plants, and on glacial forest refuges that influence the pattern of present-day floristic composition. Some reports on floral biology and the uses of African plants conclude these proceedings. The book is intended for readers in all disciplines of botany, vegetation science, forestry and nature management in Africa.

African Indigenous Medical Knowledge and Human Health - Charles Wambebe 2018-01-29

Despite the relevance of and empirical evidence for African Traditional Medicine, based on African Indigenous Medical Knowledge (AIMK), research and development of new phytomedicines from this continent has been slow. *African Indigenous Medical Knowledge and Human Health* aims to provide a catalyst for health innovations based on the rich African biodiversity and AIMK. The book documents some of the success stories from the continent related to AIMK and serves as a one-step reference for all professionals interested in the research and development of medical interventions - including pharmacognosists, ethnobiologists, botanists, phytochemists, pharmacologists and medical scientists.

Indigenous Knowledge and Development - Elizabeth Anne Olson 2014-02-21

Indigenous Knowledge and Development: Livelihoods, Health Experiences, and Medicinal Plant Knowledge in a Mexican Biosphere Reserve provides an ethnographic account of the Nahua, a group of indigenous people living in a protected area in west central Mexico. The study moves back and forth between the macro and micro to explore the relationships between three central axes—health, livelihood and cultural knowledge. This anthropological study presents analysis based on household level socioeconomic data and cultural knowledge measured through the use of both structured and semi-structured interviews. Themes that emerge tell the story of contemporary struggles related to governance, cultural heritage, indigenous identities, conservation, and community development. This research contributes to ethnographic knowledge about conservation and cultural heritage on protected areas in Mexico.

Conserving medicinal species : securing a healthy future - 2006

Conservation of Medicinal Plants - Olayiwola Akerele 1991-07-26

A detailed discussion of the need to conserve medicinal plants and their environments.

An Account of the Native Africans in the Neighbourhood of Sierra Leone - Thomas Masterman Winterbottom 1803

Ethnobotany and Medicinal Plants - Susan A. McCarthy 1992

Medicine from the Mountains - Kimball Chatfield 1997

Healing Knowledge in Atlantic Africa - Kalle Kananoja 2021-02-04

In this ambitious analysis of medical encounters in Central and West

Africa during the era of the Atlantic slave trade, Kalle Kananoja focuses on African and European perceptions of health, disease and healing. Arguing that the period was characterised by continuous knowledge exchange, he shows that indigenous natural medicine was used by locals and non-Africans alike. The mobility and circulation of healing techniques and materials was an important feature of the early modern Black Atlantic world. African healing specialists not only crossed the Atlantic to the Americas, but also moved within and between African regions to offer their services. At times, patients, Europeans included, travelled relatively long distances in Africa to receive treatment. Highlighting cross-cultural medical exchanges, Kananoja shows that local African knowledge was central to shaping responses to illness, providing a fresh, global perspective on African medicine and vernacular science in the early modern world.

Medicinal Plants of Sierra Leone - Cyrus A. Macfoy 1983

Pharmacognosy - Shagufta Perveen 2019-06-19

Pharmacognosy is a term derived from the Greek words for drug (pharmakon) and knowledge (gnosis). It is a field of study within Chemistry focused on natural products isolated from different sources and their biological activities. Research on natural products began more than a hundred years ago and has continued up to now with a plethora of research groups discovering new ideas and novel active constituents. This book compiles the latest research in the field and will be of interest to scientists, researchers, and students.

Medicinal Plants of Sierra Leone - Babara Morie S. Turay 1997

Quick Bibliography Series - 1976

Mesoamerican Healers - Brad R. Huber 2010-01-01

Healing practices in Mesoamerica span a wide range, from traditional folk medicine with roots reaching back into the prehispanic era to westernized biomedicine. These sometimes cooperating, sometimes competing practices have attracted attention from researchers and the public alike, as interest in alternative medicine and holistic healing continues to grow. Responding to this interest, the essays in this book offer a comprehensive, state-of-the-art survey of Mesoamerican healers and medical practices in Mexico and Guatemala. The first two essays describe the work of prehispanic and colonial healers and show how their roles changed over time. The remaining essays look at contemporary healers, including bonesetters, curers, midwives, nurses, physicians, social workers, and spiritualists. Using a variety of theoretical approaches, the authors examine such topics as the intersection of gender and curing, the recruitment of healers and their training, healers' compensation and workload, types of illnesses treated and recommended treatments, conceptual models used in diagnosis and treatment, and the relationships among healers and between indigenous healers and medical and political authorities.

Esoteric Medicine and Practical Magic - Samael Aun Weor 2013-07-22

In ancient times, only the wisest were trusted with medical knowledge, for it bears power over life and death. The remedies and methods of those seers may have been abandoned by modern civilization, but they have been preserved, and retain their power. Throughout all of our most sacred traditions, it is known that Nature is the source for all genuine medicine. The teachings of Paracelsus, Galen, Tibetan tantras, and others all agree that a properly prepared individual can use Nature to cure any illness. Magic: derived from the ancient word "mag" that means "priest" (from magos "one of the members of the learned and priestly class," from O.Pers. magush). Thus, genuine magic is the power of a priest or holy person to help others. Samael Aun Weor, founder of the International Gnostic Movement and author of more than sixty books about practical spirituality, lived in close contact with the mysterious natives of the Sierra Nevada of South America, who have been in self-imposed isolation from the rest of the world for hundreds of years. The priests and doctors of that region taught him and his wife Litelantes their system of training and many of their healing methods, revealed here to the public for the first time. Perhaps most astonishing is that the philosophy and spiritual concepts are fundamentally the same as the ancient knowledge of Kabbalah, the Greeks, Tibetans, and others. This collection of hundreds of techniques and practices will guide you to awaken consciousness, perform healing for yourself and others, and return to the core natural medical knowledge of the ages. Includes more than 300 remedies Explains the training and preparation of the true healer Provides an overview of the causes of illness

Account of the Native Africans in the Neighbourhood of Sierra Leone - Thomas Winterbottom 2010-10-21

Volume 2 is dedicated to native medicine, common diseases, remedies and the role of magic in traditional healing.

Occult Medicine and Practical Magic - First Last 2009-02

Samael Aun Weor, founder of the International Gnostic Movement and author of more than sixty books, lived for many years in close contact with the mysterious natives of the Sierra Nevada of South America. He and his wife Litelantes compiled and verified the knowledge they had been given by the priests and doctors of that region, and supplemented it with their own initiatic wisdom, resulting in this book *Occult Medicine and Practical Magic*. Herein one finds many explanations of the medical knowledge preserved by the Lamas of Tibet and the Mamas of the Sierra Nevada, demonstrating with undeniable force the limitations of modern medicine and indicating the way to return to ancient medical wisdom.

This work features treatments for an incredible variety of illnesses and conditions, such as cancer, asthma, the common cold, and leprosy.

Includes: * Introduction to Occult Medicine * Preparation and Discipline of the Gnostic Doctor * Classification of Plants (Elemental Magic) *

Occult Medication and Magical Works Topics include: The Faculties of Medicine; Medical Clinics; Healing Sanctuaries; Diagnostic System; The Five Causes of Illness (Ens Astrale, Ens Veneri, Ens Spirituale, Ens Naturae, Ens Dei); The Gnostic Church; Preparation and Discipline of the Gnostic Doctor; Rules for the Gnostic Medic; Meditation; The Kundalini; The Buddhic Body; The Path of Initiation; The Seven Serpents; The Choanes; Third Guardian; Theurgy; Cases of Psychic Obsession; Conjunction of the Four; Sickesses Due to Consequences of the Will of Perverse People; Curative Words (Mantras); Sickesses of the Mental Body; Secrets of Practical Magic; Folklore from the Sierra Nevada; The Snake and the Mirror; Secrets of the Magic Mirror; Clairvoyance; Teachings of Christ; Halls of Black Magic Within Cemeteries; The Fourth Coordinate; Secret in Order to Function Within the Superior Vehicles; The Mental World; The Mind; Jinn Humans and Jinn Lands; The Master Litelantes, The Harpocranian Forces, the Orphic Egg and the Jinn States; Mantra in Order to Place the Physical Body in a Jinn State; Occult Medication and Magical Works; Conjunctions and Prayers; Astral Projections; The Secret Order of the Eoptae; Clavicle of Solomon; Matrimonial Future; The Magic Mirror; Jinn Marvels - Nahualism; Classification of Plants; Plants and their Planetary Influence; Zodiacal Perfumes; Elemental Magic; Elemental Evolution; and more.

Medicinal Plants of West Africa - Edward S. Ayensu 1978

Occult Medicine & Practical Magic - Samael Aun Weor 2004-04

Samael Aun Weor, founder of the International Gnostic Movement and

author of sixty books, lived for many years in close contact with the mysterious natives of the Sierra Nevada of South America. He and his wife Litelantes compiled and verified the knowledge they had been given by the Priests and Doctors of that region, and supplemented it with their own Initiatic wisdom, resulting in this book *Occult Medicine and Practical Magic*. Herein one finds many explanations of the medical knowledge preserved by the Lamas of Tibet and the Mamas of the Sierra Nevada, demonstrating with undeniable force the limitations of modern medicine and indicating the way to return to ancient medical wisdom.

This work features treatments for an incredible variety of illnesses and conditions, such as cancer, asthma, the common cold, and

leprosy. Includes: * Introduction to Occult Medicine * Preparation and Discipline of the Gnostic Doctor * Classification of Plants (Elemental Magic) * Occult Medication and Magical Works A quote from the

author: "While medical science is inventing certified medications which are changing as incessantly as women's fashion, there exists a very ancient medical wisdom that has its origin based upon the first foundations of the world and that has never changed its formulae.

"Divine wisdom is preserved in Sanctuaries which are far away from this false, materialistic civilization. This medical wisdom is zealously guarded by the Masters of wisdom in secret places that are inaccessible to the "merchants of the Temple." "This archaic medical wisdom can cure (with exact formulae) all sicknesses, even the so-called incurable ones.

Leprosy, syphilis and cancer become as insignificant as a child's game before the tremendous power of the Gnostic doctor who commands life.

"Gnosis" is the name of this ancient medical wisdom, which from the dawn of creation has never changed its formulae, because these formulae are exact as the Pythagorean tablets. In these formulae, science, mysticism and royal art are in communion within a divine connubial. "The distinct indigenous tribes of the whole world are the possessors of that archaic, ancient wisdom of the Green Snake. "The occultism which is known in the cities is nothing else but a grotesque caricature of the ancient wisdom which is hidden within the subterranean Sanctuaries of the Andes, Bohemia, Tibet and in all the subterranean caverns of the Sierra Nevada of Santa Marta, in the Alps and the sandy deserts of Asia and Africa."

Nature's Pharmacopeia - Dan Choffnes 2016

This beautifully illustrated textbook pairs research on the biochemical properties and physiological effects of medicinal plants with a history of the ways in which humans have cultivated plant species and investigated their effects. *Nature's Pharmacopeia* fosters an appreciation of the chemistry and cultural resonance of herbal medicine.

Simulation Models, GIS and Nonpoint-source Pollution - David Holloway 1992
