**Western Views of Islam in Medieval and Early Modern Europe** - M. Frassetto

1999-12-09

Western Views of Islam in Medieval and Early Modern Europe considers the various attitudes of European religious and secular writers towards Islam during the Middle Ages and Early Modern Period. Examining works from England, France, Italy, the Holy Lands, and Spain, the essays in this volume explore the reactions of Westerners to the culture and religion of Islam. Many of the works studied reveal the hostility toward Islam of Europeans and the creation of negative stereotypes of Muslims by Western writers. These essays also reveal attempts at accommodation and understanding that stand in contrast to the prevailing hostility that existed then and, in some ways, exists still today.

*Texts from the Middle* - Thomas E Burman  
2022-08-23

Texts from the Middle is a companion primary source reader to the textbook *The Sea in the Middle*. It can be used alone or in conjunction with the textbook, providing an original history of the Middle Ages that places the Mediterranean at the geographical center of the study of the period from 650 to 1650. Building on the textbook's unique approach, these sources center on the Mediterranean and emphasize the role played by peoples and cultures of Africa, Asia, and Europe in an age when Christians, Muslims, and Jews of various denominations engaged with each other in both conflict and collaboration. The supplementary reader mirrors the main text's fifteen-chapter structure, providing six sources per chapter. The two texts pair together to provide a framework and materials that guide students through this complex but essential history—one that will

appeal to the diverse student bodies of today.

**A History of US: Assessment Book:** - Joy Hakim  
2002-11-07

The 71 tests in this assessment package have been designed around the primary goal of *A History of US*: understanding information, not memorizing. Each test checks understanding of chapter content, which is coordinated with the teaching guides for each volume of the *A History of US* set. A portion of the questions assess knowledge of key facts and chronology. The rest of the questions require students to use critical thinking skills such as making comparisons, synthesizing information, and drawing conclusions.

*A History of Psychology, Vol. 2* - George Sidney Brett  
2016-09-07

Excerpt from *A History of Psychology, Vol. 2: Medieval and Early Modern Period In View of*

some criticisms passed upon the former volume, some further remarks may be pardoned. A history of a science is a unique species of history. For the content of the science the student may go to the last textbook, where he may learn the established truths without any reference to their genesis or to the men who established them. For those who require no more a history is superfluous: it can add nothing to that knowledge and may be wholly disregarded. But there is another and a different object for which it has a specific function. If the student is not to be left with the idea that knowledge is a fixed quantity of indisputable facts, if on the contrary he is to acquire a real understanding of the process by which knowledge is continually made and remade, he must learn to look at the movement of ideas without prejudice as a separate fact with its own significance and its own meaning for humanity. To despise forgotten theories because they no longer hold good, and refuse on that account to look backward, is in the end to forget

that man's highest ambition is to make progress possible, to make the truth of to-day into the error of yesterday - in short, to make history. *The Cambridge Grammar of Medieval and Early Modern Greek* - David Holton 2019-03-31

The Greek language has a written history of more than 3,000 years. While the classical, Hellenistic and modern periods of the language are well

researched, the intermediate stages are much less well known, but of great interest to those curious to know how a language changes over time. The geographical area where Greek has been spoken stretches from the Aegean Islands to the Black Sea and from Southern Italy and Sicily to the Middle East, largely corresponding to former territories of the Byzantine Empire and its successor states. This Grammar draws on a comprehensive corpus of literary and non-literary texts written in various forms of the vernacular to document the processes of change between the eleventh and eighteenth centuries, processes which can be seen as broadly comparable to the emergence of the Romance languages from Medieval Latin. Regional and dialectal variation in phonology and morphology are treated in detail.

**Finding the Family in Medieval and Early Modern Scotland** - Elizabeth Ewan 2017-03-02

In this interdisciplinary collaboration, an international group of scholars have come together to suggest new directions for the study of the family in Scotland circa 1300-1750. Contributors apply tools from across a range of disciplines including art history, literature, music, gender studies, anthropology, history and religious studies to assess creatively the broad range of sources which inform our understanding of the pre-modern Scottish family. A central purpose of this volume is to encourage further studies in this area by highlighting the types of sources available, as well as actively engaging in broader historiographical debates to demonstrate how important and effective family studies are to advancing our understanding of the past. Articles

in the first section demonstrate the richness and variety of sources that exist for studies of the Scottish family. These essays clearly highlight the uniqueness, feasibility and value of family studies for pre-industrial Scotland. The second and third sections expand upon the arguments made in part one to demonstrate the importance of family studies for engaging in broader historiographical issues. The focus of section two is internal to the family. These articles assess specific family roles and how they interact with broader social forces/issues. In the final section the authors explore issues of kinship ties (an issue particularly associated with popular images of Scotland) to examine how family networks are used as a vehicle for social organization.

**Religion and Conflict in Medieval and Early Modern Worlds** - Natasha Hodgson 2020-12-27

This volume seeks to increase understanding of the origins, ideology, implementation, impact, and historiography of religion and conflict in the medieval and early modern periods. The chapters

examine ideas about religion and conflict in the context of text and identity, church and state, civic environments, marriage, the parish, heresy, gender, dialogues, war and finance, and Holy War. The volume covers a wide chronological period, and the contributors investigate relationships between religion and conflict from the seventh to eighteenth centuries ranging from Byzantium to post-conquest Mexico. Religious expressions of conflict at a localised level are explored, including the use of language in legal and clerical contexts to influence social behaviours and the use of religion to legitimise the spiritual value of violence, rationalising the enforcement of social rules. The collection also examines spatial expressions of religious conflict both within urban environments and through travel and pilgrimage. With both written and visual sources being explored, this volume is the ideal resource for upper-level undergraduates, postgraduates, and researchers of religion and military, political, social, legal, cultural, or

intellectual conflict in medieval and early modern worlds.

*Plague Image and Imagination from Medieval to Modern Times* - Christos Lynteris 2021-07-29

This edited collection brings together new research by world-leading historians and anthropologists to examine the interaction between images of plague in different temporal and spatial contexts, and the imagination of the disease from the Middle Ages to today. The chapters in this book illuminate to what extent the image of plague has not simply reflected, but also impacted the way in which the disease is experienced in different historical periods. The book asks what is the contribution of the

entanglement between epidemic image and imagination to the persistence of plague as a category of human suffering across so many centuries, in spite of profound shifts in our medical understanding of the disease. What is it that makes plague such a visually charismatic subject? And why is the medical, religious and lay imagination of plague so consistently determined by the visual register? In answering these questions, this volume takes the study of plague images beyond its usual, art-historical framework, so as to examine them and their relation to the imagination of plague from medical, historical, visual anthropological, and postcolonial perspectives.

**World History and Geography** - California.

Dept. of Education 1994-01-01

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven

instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A

presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)
