**Islamic Fintech** - Sara  
Sánchez Fernández

2021-03-29

The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new

technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia's economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential.

With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering ('AML') in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field

that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.

**Coyote and Raven Go Canoeing** - Peter Cole  
2006

In a gesture toward traditional First Nations orality, Peter Cole blends poetic and dramatic voices with storytelling. A conversation between two tricksters, Coyote and Raven, and the colonized and the colonizers, his narrative takes the form of a canoe journey. Cole draws on traditional Aboriginal knowledge to move away from the western genres that have long contained, shaped,

and determined ab/originality. Written in free verse, Coyote and Raven Go Canoeing is meant to be read aloud and breaks new ground by making orality the foundation of its scholarship. Cole moves beyond the rhetoric and presumption of white academic (de/re)colonizers to aboriginal spaces recreated by aboriginal peoples. Rather than employing the traditional western practice of gathering information about exoticized other, demonized other, contained other, Coyote and Raven Go Canoeing is a celebration of aboriginal thought, spirituality, and practice, a sharing of lived experience as First Peoples.

Old Time Radios!  
Restoration and Repair -  
Joseph Carr 1990-11-22  
A presentation of the history, theory and practical operation of old-time, home, auto, amateur, shortwave and CB radio sets which provides the detailed instructions and schematics required to repair or rebuild them. A troubleshooting section is included, with charts and pin-out diagrams.

Markets, Hierarchies and Networks - Grahame Thompson 1991-12-30  
This interdisciplinary reader provides a distinctive introduction to the way social, political and economic life is coordinated. It brings together three quite different models of coordination - markets, hierarchies and networks - and places them into a comparative framework, presenting a comprehensive and

insightful overview of social coordination. The articles dealing with each model explore the characteristics of that coordinating mechanism, outlining key theoretical issues and drawing on various empirical examples. The final section shows how these models can be compared and contrasted. It also assesses the respective strengths, weaknesses and limitations of each model. Markets, Hierarchies and Networks is a set

**"Only the Super-Rich Can Save Us!"** - Ralph Nader 2011-01-04

"In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion,

Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . . He knew exactly what he had to do. . . ." So begins the vivid fictional account by political activist and bestselling author Ralph Nader that answers the question, "What if?" What if a cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most

powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Wal-Mart? What if a national political party were formed with the sole purpose of advancing clean elections? What if these seventeen superrich individuals decided to galvanize a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of American social

movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination.

*India's Act East Policy* - Josukutty C. A. 2020-12-15

India's 'Act East Policy' has been a significant reorientation in foreign policy towards realizing India's big power ambitions. During the initial years, the focus of the policy was on economic and diplomatic connectivity that cantered around the ASEAN. Since then, the policy has evolved to assume greater strategic dimensions with co-operation in security matters and incremental engagement with countries and regions beyond the ASEAN that include East Asia and the whole of Asia-Pacific. India's plans to become a global power depend to a great extent on its becoming a dominant economic actor, political and strategic player and soft power attraction in East Asia

and Asia-Pacific. This region is the most vibrant economic arena and crucial strategic site in international politics presently. The changing geopolitical and strategic realities increasingly necessitate a new regional security architecture in the region. Along with its efforts towards economic integration and diplomatic connectivity, India needs to carve out a role in shaping the security structure of the region to deal with issues of maritime disputes and security. This book is a collection of 7 scholarly papers that d

**COMSOL for Engineers** - Mehrzad Tabatabaian  
2014-03-31

COMSOL Multiphysics software is one of the most valuable software modeling tools for engineers and scientists. This book is designed for engineers

from the fields of mechanical, electrical, and civil disciplines, and introduces multiphysics modeling techniques and examples accompanied by practical applications using COMSOL 4.x. The book includes a companion CD-ROM with files of over 25 models, images, and code. The main objective is to introduce readers to use COMSOL as an engineering tool for modeling by solving examples that could become a guide for modeling similar or more complicated problems. The objective is to provide a collection of examples and modeling guidelines through which readers can build their own models. Readers are assumed to be familiar with the principles of numerical modeling and the finite element method (FEM). The book takes a flexible-level approach for presenting

the materials along with using practical examples. The mathematical fundamentals, engineering principles, and design criteria are presented as integral parts of examples. At the end of each chapter are references that contain more in-depth physics, technical information, and data; these are referred to throughout the book and used in the examples. COMSOL for Engineers could be used to complement another text that provides background training in engineering computations and methods. Examples provided in this book should be considered as "lessons" for which background physics could be explained in more detail. FEATURES Includes a companion CD-ROM with files of over 25 models, images, code Uses progressive

approach in terms of examples and models eBook Customers: Companion files are available for downloading with order number/proof of purchase by writing to the publisher at info@merclearning.com.

**The Network Society** -

Jan van Dijk 2012-05-14

The Network Society is now more than ever the essential guide to the past, consequences and future of digital communication. Fully revised, this Third Edition covers crucial new issues and updates. This book remains an accessible, comprehensive, must-read introduction to how new media function in contemporary society.

**Asia Unplugged** -

Madanmohan Rao

2005-02-17

"A compact and comprehensive introduction to the epicentre of the world's

wireless revolution, this volume will be required reading for scholars, professionals and entrepreneurs involved in the foundations and frontiers of the wireless ecosystem in Asia and around the world."--BOOK JACKET.

**World Wide Rave** - David Meerman Scott 2009-02-23

A World Wide Rave! What the heck is that? A World Wide Rave is when people around the world are talking about you, your company, and your products. It's when communities eagerly link to your stuff on the Web. It's when online buzz drives buyers to your virtual doorstep. It's when tons of fans visit your Web site and your blog because they genuinely want to be there. Rules of the Rave: Nobody cares about your products (except you). No coercion required. Lose control.

Put down roots. Point the world to your (virtual) doorstep. You can trigger a World Wide Rave: Just create something valuable that people want to share and make it easy for them to do so. What happens when people can't stop talking online about you, your company, and your products? A World Wide Rave is born that can propel a brand or company to seemingly instant fame and fortune. How do you create one? By learning the secret to getting links, YouTube, Facebook, and blog buzz to drive eager buyers to your virtual doorstep. For free. In *World Wide Rave*, David Meerman Scott, author of the award-winning hit book *The New Rules of Marketing and PR*, reveals the most exciting and powerful ways to build a giant audience from scratch.

*Artificial Intelligence  
in Banking* - Introbooks  
2020-04-07

In these highly competitive times and with so many technological advancements, it is impossible for any industry to remain isolated and untouched by innovations. In this era of digital economy, the banking sector cannot exist and operate without the various digital tools offered by the ever new innovations happening in the field of Artificial Intelligence (AI) and its sub-set technologies. New technologies have enabled incredible progression in the finance industry. Artificial Intelligence (AI) and Machine Learning (ML) have provided the investors and customers with more innovative tools, new types of financial

products and a new potential for growth. According to Cathy Bessant (the Chief Operations and Technology Officer, Bank of America), AI is not just a technology discussion. It is also a discussion about data and how it is used and protected. She says, "In a world focused on using AI in new ways, we're focused on using it wisely and responsibly."

*Badenheim Nineteen  
Thirty-nine* - Aharon  
Appelfeld 2009

It is the spring of 1939 in the age of anxiety. In months Europe will be Hitler's. And Badenheim, a resort town vaguely in the orbit of Vienna, is preparing for its summer season. The vacationers arrive as they always have, a sampling of Jewish middleclass life: the impresario Dr. Pappenheim, his musicians, and their conductor; the gay Frau

Tsauberblit; the historian Dr. Fussholdt and his much younger wife; the 'readers, ' twins whose passion for Rilke is featured on their program; a child prodigy; a commercial traveler; a rabbi. The list waxes as the summer wanes. To receive them in the town are the pharmacist and his worried wife, the hotelier and his large staff, the pastry shop owner and his irritable baker, Sally and Gertie (two quite respectable prostitutes), and, mysteriously, the bland inspectors from the "Sanitation Department." The story unfolds as matter-of-factly as a Chekhov play. The characters on stage are so deeply held by their defensive daily trivia that they manage to misconstrue every signal of their fate. Finally, de facto prisoners in their familiar resort,

the vacationers, now increased by the forced crowding-in of other Jews hardly on vacation, take on the lineaments of undefined disaster. The text builds a sense of foreboding in which each human detail is so persuasive, so right in its fidelity to the terrible evasions of the time, that it leaves the reader transformed by what he and the author know must happen to Badenheim's people. Badenheim 1939 owes everything to its author's astonishing capacity to recreate the energies and confusions of innocent and uncomprehending victims who, always loyal to civility and social graces, fail to even dimly see the cruel terms of their imminent fate.

**Special Education in America** - Joseph Ballard  
1982

The text presents six chapters on the legal

and governmental bases of special education. In the Introduction, F. Weintraub and J. Ballard cite the legislative and litigative history of P.L. 94-142, the Education for All Handicapped Children Act, and briefly address information sources on such policy issues as procedural safeguards, underserved populations, and standards of practice. In chapter 2, "The Education for All Handicapped Children Act of 1975 (P.L. 94-142): Its History, Origins, and Concepts," J. Zettel and J. Ballard review court cases and state and federal legislation, and list the rights of handicapped children, including the right to an appropriate education and the right to be educated in the least restrictive environment. J. Zettel in "Implementing the Right to a Free Public

Education" analyzes five aspects of P.L. 94-142: zero reject, individualized education programs, least restrictive environment, nondiscriminatory testing and evaluation, and due process. In "Section 504: The Larger Umbrella," M. Gerry and J. Benton examine Section 504 of the Rehabilitation Act of 1973 in terms of its litigative background, statutory and regulatory setting, and enforcement. "The Education of Gifted and Talented Children from a Federal Perspective" by J. Zettel describes the cyclical nature of support and interest in education for gifted students. In the final chapter, "Interpreting the Rights of Exceptional Citizens through Judicial Action," B. Smith and J. Barresi summarize significant cases

concerning issues that have surfaced since passage of P.L. 94-142, including compensatory services, suspension and expulsion, and bilingual special education.

Appendixes include a paper by J. Barresi and B. Ramirez, "The Federal Program Presence Accompanying P.L. 94-142," a list of federal laws for the handicapped from 1827 to 1981, and a list of resources. (CL)

**Continuum Mechanics Via Problems and Exercises** - Margarita E Eglit  
1996-10-28

This volume is intended

to help graduate-level students of Continuum Mechanics become more proficient in its applications through the solution of analytical problems. Published as two separate books – Part I on Theory and Problems with Part II providing Solutions to the problems – professors may also find it quite useful in preparing their lectures and examinations. Part I includes a brief theoretical treatment for each of the major areas of Continuum Mechanics (fluid mechanics, thermodynamics, elastic and inelastic solids, electricity, dimensional analysis, and so on), as well as the references for further reading. The bulk of Part II consists of about 1000 solved problems. The book includes bibliographical references and index.

*Feel the Love* - Emma  
Louise Ellul 2019-12-18  
This LOVING bedtime book  
with affirmations,  
teaches our children the  
skills of releasing  
anxiety, stress, and  
negative emotions. These  
emotions may have been  
stored away in their  
mind, and/or bodies for  
a long time, or maybe  
just from their day  
today. It instead  
teaches them to  
cultivate forgiveness,  
relaxation, connection,  
positivity and hope. It  
helps our little people  
to connect with their  
breath, and experience  
the different feelings,  
awareness and relaxation  
within themselves that  
conscious breathing  
brings. They will learn

how to focus their  
attention on different  
parts of their bodies  
that need relaxing. Not  
just before bedtime, but  
anytime! Peace is then  
found, knowing that no  
matter what happened  
today, they get a brand  
new tomorrow to do  
things differently.

*The Visual Made Verbal* -  
Joel Snyder 2020-10-25  
Verbal descriptions of  
life have been around  
for centuries, but the  
digital age has made  
access to those  
descriptions even more  
important. Dr. Joel  
Snyder, an audio  
description pioneer, has  
created a book and  
website offering the  
first overview of the  
field, including its  
history, application to  
a range of genres,  
description of training  
techniques, and list of  
resources. Audio  
description brings the  
visual world to life,  
making theater

productions, television shows, films, visual art and events accessible to people who are blind or have low vision. Describers employ succinct, vivid, imaginative words to convey visual images those with sight take for granted. Although countries worldwide have taken up the cause, the United States has fallen short on research and institutions to study the field. Dr. Snyder's book helps fill in some of those gaps. "For decades, Joel Snyder has combined his astonishing command of language with his keen attention to detail to create word pictures that stir the mind's eye, especially for patrons of the arts whose physical eyes cannot see. [...] His book has been long-awaited, and no doubt will become the standard for prospective audio describers around the

world." -Kelsey Marshall, Founding Director of Accessibility, The John F. Kennedy Center for the Performing Arts, Washington, DC Dr. Joel Snyder is known internationally as one of the world's first "audio describers," a pioneer in the field of audio description, making theater events, museum exhibitions, and media accessible to people who are blind or have low vision. Since 1981, he has introduced audio description techniques in 36 states and D.C. and in 35 countries. He holds a PhD in accessibility audio description from the Universitat Autònoma de Barcelona. Dr. Snyder's company, Audio Description Associates, LLC ([www.audiodescribe.com](http://www.audiodescribe.com)) uses audio description to enhance a wide range of arts projects

including video and film, museum exhibitions, and live events. As Director of Described Media for the National Captioning Institute, he supervised the production of descriptions for Sesame Street and dozens of feature films and nationally broadcast television; his descriptions can be heard at Smithsonian Institution exhibits, the Getty Museum, the Albright-Knox Gallery, and throughout the country at National Park Service visitor centers. As Director of the American Council of the Blind's Audio Description Project ([www.acb.org/adp](http://www.acb.org/adp)), Dr. Snyder voiced description for network coverage of President Obama's inauguration in 2009 and 2013, and recently produced the first-ever audio-described tour of The

White House. The ADP website is the nation's principal provider of information and resources on audio description.

Distributed Parameter Control Systems - Spyros G. Tzafestas 2013-10-22 Distributed Parameter Control Systems: Theory and Application is a two-part book consisting of 10 theoretical and five application-oriented chapters contributed by well-known workers in the distributed-parameter systems. The book covers topics of distributed parameter control systems in the areas of simulation, identification, state estimation, stability, control (optimal, stochastic, and coordinated), numerical approximation methods, optimal sensor, and actuator positioning. Five applications works include chemical

reactors, heat exchangers, petroleum reservoirs/aquifers, and nuclear reactors. The text will be a useful reference for both graduate students and professional researchers working in the field.

*Musical New Media* -

Nicola Dibben 2021-10-21

Recorded music creation and consumption underwent a huge shift in the first two decades of the twentieth century: from physical artifacts to digital; from fixed personal computers to mobile devices; from downloading and owning to streaming and access. This had a significant impact on the music 'assemblage' - the audio, performances, videos, films, books, games - that make up what we think of as 'music', and gave rise to new forms of musical new media.. Björk's Biophilia, widely

acclaimed as the first 'app album', is one response to this context. Drawing on her direct experience as part of the creative team who made Biophilia musicologist Nicola Dibben investigates how popular music practices intersect with digital technologies at their moment of emergence in two domains: music software applications ('apps') for touchscreen technologies of tablet computer and smartphone, and in extended reality. She shows the way these new media formats maintain musical traditions as much as they innovate, explores the future of the album as a musical artifact in the digital age, and identifies emerging new music forms and engagements which may come to define our digital musical futures.

**E. H. Scott - the Dean of DX** - 2002-09-01
