Nutrition and Vulnerable Groups - Amanda Devine  
2019-06-17

Food insecurity is a complex 'wicked' problem that results from a range of unstable and uncertain physical, social, cultural and economic factors that limits access to nutritious food. Globally, 800 million people are under-nourished, and around 2 billion are overweight/obese or have micronutrient deficiency. These populations are largely positioned in developing countries where disease burden is high and impacts health budgets and productivity. Similarly developed countries, cities and neighbourhoods are experiencing a greater emergence of vulnerable populations. This is in part explained by the change in the food production and manufacturing, the retraction in economic climates, the increase in food price, and in some regions reduced food availability and access. Vulnerable groups include but are not limited to migrant populations, Indigenous people, elderly, pregnant women, those with

disability, homeless, young children and youth. Poor nutrition at significant periods of growth and development and during life impact long term health outcomes increasing non-communicable disease prevalence, health cost and reducing economic productivity.

**The Effectiveness of Interdisciplinary Team Dynamics on Treatments in a Behavioral Health**

**Environment** - Gilton C.

Grange 2008-01

The style of leadership in an interdisciplinary collaboration is an existing gap in collaborative literature. Studying the leaders in an existing interdisciplinary collaboration provided a description of the leadership style of the collaborative leaders of three behavioral health teams in New York City. This qualitative phenomenological study used structured interviews of interdisciplinary disciplines to describe the leadership style of the collaborative leaders within a team environment. The data collection and analysis were

conducted using codes to identify dominant themes. The themes presented perceptions and experiences of three teams interacting collaboratively. The coding process identified five major themes that are unique components of leadership that suggests new methods of building collaborative leadership within the interdisciplinary team dynamics.

Handling the qualitative side of mixed methods research - Terri Dempsey. 2018-09-23

Attention to mixed methods studies research has increased in recent years, particularly among funding agencies that increasingly require a mixed methods approach for program evaluation. At the same time, researchers operating within large-scale, rapid-turnaround research projects are faced with the reality that collection and analysis of large amounts of qualitative data typically

require an intense amount of project resources and time. However, practical examples of efficiently collecting and handling high-quality qualitative data within these studies are limited. More examples are also needed of procedures for integrating the qualitative and quantitative strands of a study from design to interpretation in ways that can facilitate efficiencies. This paper provides a detailed description of the strategies used to collect and analyze qualitative data in what the research team believed to be an efficient, high-quality way within a team-based mixed methods evaluation study of science, technology, engineering, and math (STEM) high-school education. The research team employed an iterative approach to qualitative data analysis that combined matrix analyses with Microsoft Excel and the qualitative data analysis software program ATLAS.ti. This approach yielded a number of practical benefits. Selected preliminary results

illustrate how this approach can simplify analysis and facilitate data integration.

Customer Competences and Innovation Capability - Christoph Illigen 2015-02-18

Innovations constitute one essential success factor for the development, progress, and success of companies. Thus, striving for the creation of innovation can be beneficial. One way to create innovations is to increase the innovation

capability of companies in order to enhance the knowledge base in that company. In plenty of innovation-related research, it turned out that customers can be one important source of new knowledge. Thus, they can also be a driver for increasing innovation capability and hence ultimately help to foster the creation of innovations. Due to potential effects of customers on innovation capability, companies could strive to generally integrate customers into their innovation activities. However, companies should consider differences of customers in order to identify the most promising customers for their innovation activities. Therefore, the idea of competences of an individual is applied, since competences integrate abilities, skills, and knowledge and are thus a wide construct respecting different facets of a customer. With the concept of customer competences, companies might be enabled to identify the most beneficial customers for their innovation activities in order to

increase their innovation capability. Accordingly, in order to explain interrelations between particular customer competences and the innovation capability of a company, this research delivers a well-founded basis by investigating the general existence of interrelations between customer competences and the innovation capability of companies. *Introducing Writing Across the Curriculum into China* - Dan Wu 2012-09-19

Dr. Wu Dan's *Introducing Writing Across the Curriculum into China* is an important and provocative research study that is broadly international in scope. Of particular significance for education in China, this book provides a historical analysis of writing instruction in China and an original application of activity theory used to analyze

problems and possibilities for Writing Across the Curriculum (WAC) in higher education. Through an examination of important aspects of WAC as it has developed in the United States, Dr. Wu Dan brings together various perspectives in support of developing and sustaining WAC programs in China and by analogy throughout the world. Her work opens new avenues for research in writing and for the teaching of courses throughout the curriculum using a writing-in-the-disciplines approach. A major contribution to international WAC scholarship, *Introducing Writing Across the Curriculum into China* will be invaluable to English faculty and to all readers interested in educational innovations in China.

**Banking and Effective Capital Regulation in Practice** - Sophia Velez  
2020-11-20

Due to a historical lack of attention to the importance of modelling, measuring and managing risk, senior bank leaders are struggling to implement unified practices within their financial institutions that could address the gaps posed by risky management behaviour, rogue trading, liquidity crises, prohibited investments in mortgage-backed securities, and default risks aligned with loans. This book discusses the theories at play between bank agents (bank managers) and their principals (shareholders), a topic which has gained

importance as a result of the banking crisis, and similarly, governed the need for more efficient risk management and ethical managerial practices. The author worked with a senior bank leadership team to identify and describe effective capital regulation practices that can lead to a reduction in loss and risky management behavioural practices. The book offers consensus on a number of activities that bank managers can implement to address bank risk. It analyses the relevant factors that determine the necessity for banking regulation and the important role of regulation in managing banking crises. The author's analysis of the important regulatory aspects in developed countries such as the US, offers a useful conceptual framework for creating an adequate banking regulatory environment in developing countries. This book offers an original contribution to the field of banking that undergraduate, masters, PhD students, academics and researchers can use to gain a

deeper understanding of the constructs at play in the banking industry.
