From Homeland to New Land - William A. Starna 2020-03-09

This history of the Mahicans begins with the appearance of Europeans on the Hudson River in 1609 and ends with the removal of these Native people to Wisconsin in the 1830s. Marshaling the methods of history, ethnology, and archaeology, William A. Starna describes as comprehensively as the sources allow the Mahicans while in their Hudson and Housatonic Valley homeland after their consolidation at the praying town of Stockbridge, Massachusetts; and following their move to Oneida country in central New York at the end of the Revolution and their migration west. The emphasis throughout this book is on describing and placing into historical context Mahican relations with surrounding Native groups: the Munsees of the lower Hudson, eastern Iroquoians, and the St. Lawrence and New England Algonquians. Starna also examines the Mahicans' interactions with Dutch, English, and French interlopers. The first and most transformative of these encounters was with the Dutch and the trade in furs, which ushered in culture change and the loss of Mahican lands. The Dutch presence, along with the new economy, worked to unsettle political alliances in the region that, while leading to new alignments, often engendered rivalries and war. The result is an outstanding examination of the historical record that will become the definitive work on the Mahican people from the colonial period to the Removal Era.

Design Solutions for Adaptive Hypermedia Listening Software - Turel, Vehbi 2021-06-18

Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which

rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.
