A vampire gangster's nephew is abducted off his yacht by a bunch of low-rent Creatures from the Black Lagoon. A slew of banks are knocked over by what looks like the cast of Night of the Living Dead. All of this may seem like the movies, but, I promise you, it's not. I'm Makenna Fraser, seer for SPI, and I know the culprits aren't wearing disguises or makeup. They're real. Deadly real. Especially their leader—an ancient shapeshifter who leaves a trail of chaos and blood in his wake. Now, he's taken my partner, Ian—and his intentions aren't pretty. The worst part? The Solstice Countdown - Lisa Shearin 2021-03-02

As an agent of Supernatural Protection & Investigations (SPI), I know that evil doesn't take a vacation, but this time it made an exception and followed me on mine. I'm Makenna Fraser, seer for SPI, and I'm taking my boyfriend, goblin dark mage Rake Danescu, home for the holidays to meet my family. Weird Sisters is a small town in the North Carolina mountains that was built on a network of ley lines that magnify psychic and paranormal energies. It doesn't show up on Google Maps, was named after the three witches in Macbeth, and the first word of the town name perfectly describes most of its human and supernatural citizens. A stranger has come to town, bringing with him a dormant source of primordial evil. Soon, magically gifted locals start vanishing, and the power of the ley lines is turned against us, cutting us off from the outside world and any source of help. For a town and its people steeped in magic, and my family sworn to protect both, it's a race against time to use a local winter solstice phenomenon to free the town from its prison. But first, I must trust a father I've never known to fight and defeat an awakening evil that's existed since the beginning of time. If we fail, and it is unleashed, the world will not survive.

A gala opening at the Metropolitan Museum of Art has attracted the upper crust of Manhattan—and thieves. A trio of vile harpies attacks the crowd and steals the stars of the exhibition: a colorful cluster of seven cursed diamonds known as the Dragon Eggs. In the right mage's hands, each stone can pack a magical wallop. Together they have the power to "cure" the supernaturals of the tristate area—but for many of those vampires and werewolves, that means turning into dust. I'm Makenna Fraser, a seer for SPI. With the help of my partner, Ian, and the other agents, I have twenty-four hours to prevent total global panic, find the diamonds, and save the supernatural community. No biggie...

The Grendel Affair - Lisa Shearin 2013-12-31

We're Supernatural Protection & Investigations, known as SPI. Things that go bump in the night, the monsters you thought didn't exist? We battle them and keep you safe. But some supernatural baddies are just too big to contain, even for us... When I moved to New York to become a world famous journalist, I never imagined that snagging a job at a seedy tabloid would change my career path from trashy reporter to undercover agent. I'm Makenna Fraser, a Seer for SPI. I can see through any disguise, shield, or spell that a paranormal pest can come up with. I track down creatures and my partner, Ian Byrne, takes them out. Our cases are generally pretty routine, but

a sickle-wielding serial killer has been prowling the city's subway tunnels. And the murderer's not human. The fiend in question, a descendant of Grendel—yes, that Grendel—shares his ancestor's hatred of parties, revelry, and drunkards. And with New Year's Eve in Times Square only two days away, we need to bag him quickly. Because if we don't find him—and the organization behind him—by midnight, our secret's out and everyone's time is up. FIRST IN A NEW SERIES

Now I'm psychic roommates with the Saghred, an ancient stone with cataclysmic powers. Just me, the stone, and all the souls it's ingested over the centuries. Crowded doesn't even begin to describe it. All I want is my life back—which means getting rid of the stone and the power it possesses. To sort things out, I head for the Isle of Mid, home to the most prestigious sorcery school, as well as the Conclave, the governing body for all magic users. It's also home to power-grubbing mages who want me dead and goblins who see me as a thief. As if that's not enough, Mid's best student spellsingers are disappearing left and right, and I'm expected to find them. Lives are at stake, goblins are threatening to sue, mages are getting greedier, and the stone's power is getting stronger by the hour. This could get ugly.

The PTA Story - National PTA (U.S.) 1997

This book recounts the historical achievements of the National PTA and its sister organization, the National Congress of Colored Parents and Teachers. The PTA is the result of the hard work of such women as Phoebe Apperson Hearst and Alice McLellan Birney, founders of the original National Congress of Mothers, and Selma Sloan Butler, who, with the support of the National PTA, founded the National Congress of Colored Parents and Teachers. When the two organizations merged in 1970, so did their identical mission to improve children's lives. The book profiles these women's work on such issues as juvenile justice, kindergarten classes, child labor laws, hot lunch programs, car safety, the Salk polio vaccine, today's National Education Goals, and the PTA Web site. The book includes: "The Historical Setting"; "The Founding"; "The Early Years, 1900-1909: Schooling Parents"; "1910-1919: For the Health and Safety of Children"; "1920-1929: Be It Resolved"; "1930-1939: The Voice of the PTA--90 Years in Print"; "1940-1949: PTA On the Air"; "1950-1959: Monitoring the Media and the Message"; "1960-1969: Bringing Justice to Juveniles"; "1970-1979: Advocates in Action"; "1980-1989: The Reflections Program"; and "1990-1997: Celebrating a Century of Commitment to Children." The Brimstone Deception - Lisa Shearin 2016-01-26

Men in Black meets Janet Evanovich's Stephanie Plum in the new urban fantasy novel starring seer Makenna Fraser and her fellow agents at Supernatural Protection & Investigation. The agents of Supernatural Protection & Investigations (SPI) know that fighting evil is a full-time job, especially when a new designer drug—with mind-blowing side effects—hits the streets... It's called Brimstone. And after the first few hits, you'll see every supernatural beast sharing the sidewalk, train, or office with you. After that, you'll start seeing the really scary stuff. I'm Makenna Fraser, seer for the SPI. And the collateral damage caused by Brimstone is something I'd like to unsee: dead drug dealers missing their hearts—and souls. Because your local pusher

doesn't stand a chance against the new cartel muscling its way into New York. And since the drug can only be produced with magic and molten brimstone fresh from Hell, that means a rift to the underworld is open somewhere in the city. And when—not if—the cartel loses control of it, well... It's going to be Hell on earth.

Critical Theories of the State - Clyde W. Barrow 1993-03-01

Critical Theories of the State is a clear and accessible survey of radical perspectives on the modern state. By focusing on Marxist theory and its variations, particularly as applied to advanced industrial societies and contemporary welfare states, Clyde W. Barrow provides a more extensive and thorough treatment than is available in any other work. Barrow divides the methodological assumptions and key hypotheses of Marxist, Neo-Marxist, and Post-Marxist theories into five distinct approaches: instrumentalist, structuralist, derivationist, systems-analytic, and organizational realist. He categorizes the many theorists discussed in the book, including such thinkers as Elmer Altvater, G. William Domhoff, Fred Block, Claus Offe, and Theda Skocpol according to their concepts of the state's relationship to capital and their methodological approach to the state. Based on this survey, Barrow elaborates a compelling typology of radical state theories that identifies with remarkable clarity crucial points of overlap and divergence among the various theories. Scholars conducting research within the rubric of state theory, political development, and policy history will find Critical Theories of the State an immensely valuable review of the literature. Moreover, Barrow's work will make an excellent textbook for undergraduate and graduate courses in political science and sociology, and can also be used by those teaching theory courses in international relations, history, and political economy.

Each Wild Idea - Geoffrey Batchen 2002-02-22

Essays on photography and the medium's history and evolving identity. In Each Wild Idea, Geoffrey Batchen explores a wide range of photographic subjects, from the timing of the medium's invention to the various implications of cyberculture. Along the way, he reflects on contemporary art photography, the role of the vernacular in photography's history, and the Australianness of Australian photography. The essays all focus on a consideration of specific photographs—from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz. Although Batchen views each photograph within the context of broader social and political forces, he also engages its own distinctive formal attributes. In short, he sees photography as something that is simultaneously material and cultural. In an effort to evoke the lived experience of history, he frequently relies on sheer description as the mode of analysis, insisting that we look right at—rather than beyond—the photograph being discussed. A constant theme throughout the book is the question of photography's past, present, and future identity.

Anthropology of Landscape - Christopher Tilley 2017-02-01

An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

Scheduling - Michael L. Pinedo 2012-01-07

This new edition of the well established text *Scheduling - Theory, Algorithms, and Systems* provides an up-to-date coverage of important theoretical models in the scheduling literature as well as significant scheduling problems that occur in the real world. It again includes supplementary material in the form of slide-shows from industry and movies that show implementations of scheduling systems. The main structure of the book as per previous edition consists of three parts. The first part focuses on deterministic scheduling and the related combinatorial problems. The second part covers probabilistic scheduling models; in this part it is assumed that processing times and other problem data are random and not known in advance. The third part deals with scheduling in practice; it covers heuristics that are popular with practitioners and discusses system design and implementation issues. All three parts of this new edition have been revamped and streamlined. The references have been made completely up-to-date. Theoreticians and practitioners alike will find this book of interest. Graduate students in operations management, operations research, industrial engineering, and computer science will find the book an accessible and invaluable resource. *Scheduling - Theory, Algorithms, and Systems* will serve as an essential reference for professionals working on scheduling problems in manufacturing, services, and other environments. Reviews of third edition: This well-established text covers both the theory and practice of scheduling. The book begins with motivating examples and the penultimate chapter discusses some commercial scheduling systems and examples of their implementations." (Mathematical Reviews, 2009)
