The Development of a Common Framework Scale

of Language Proficiency - Brian North 2000

Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii)

refined and elaborated in workshops, and then (iii) scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes.

Children Solving Problems - Stephanie

THORNTON 2009-06-30

A one-year-old attempting to build a tower of blocks may bring the pile crashing down, yet her five-year-old sister accomplishes this task with ease. Why do young children have difficulty with problems that present no real challenge to older children? How do problem-solving skills develop? In *Children Solving Problems*, Stephanie Thornton surveys recent research from a broad range of perspectives in order to explore this important question. What Thornton finds may come as a surprise: successful problem-solving depends less on how smart we are--or, as the pioneering psychologist Jean Piaget claimed, how advanced our skill in logical reasoning is--and more on the factual knowledge we acquire as we learn and interpret cues from the world around us. Problem-solving skills evolve through experience and dynamic interaction with a problem. But equally important--as the Russian psychologist L. S. Vygotsky proposed--is social interaction. Successful problem-solving is a social process. Sharing problem-solving tasks--with skilled adults and with other children--is vital to a child's growth in expertise and confidence. In problem-solving, confidence can be more important than skill. In a

real sense, problem-solving lies at the heart of what we mean by intelligence. The ability to identify a goal, to work out how to achieve it, and to carry out that plan is the essence of every intelligent activity. Could it be, Thornton suggests, that problem-solving processes provide the fundamental machinery for cognitive development? In *Children Solving Problems* she synthesizes the dramatic insights and findings of post-Piagetian research and sets the agenda for the next stage in understanding the varied phenomena of children's problem-solving.

Aspect and Modality in Kwa Languages - Felix K. Ameka 2008-04-10

This book explores the thesis that in the Kwa languages of West Africa, aspect and modality are more central to the grammar of the verb than tense. Where tense marking has emerged it is invariably in the expression of the future, and therefore concerned with the impending actualization or potentiality of an event, hence with modality, rather than the purely temporal sequencing associated with tense. The primary grammatical contrasts are perfective versus imperfective. The main languages discussed are Akan, Dangme, Ewe, Ga and Tuvuli while Nzema-Ahanta, Likpe and Eastern Gbe are also mentioned. Knowledge about these languages has deepened considerably during the past decade or so and ideas about their structure have changed. The volume therefore presents novel analyses of grammatical forms like the so-called S-Aux-O-V-Other or “future” constructions, and provides empirical data for theorizing about aspect and modality. It should be of considerable interest to Africanist linguists, typologists, and creolists interested in substrate issues.
