German Soccer Passing Drills - Peter Hyballa 2015-08-15
Train like the World Champions! Over the past few years, a new trend has become ever more prominent in the soccer world: passing often, fast, and including all players in the game. Combining this with their own personal style, we have seen teams reach new heights of success from FC Barcelona to Bayern Munich and Borussia Dortmund and, most recently, the German National Team at the 2014 World Cup in Brazil. But what does it take to learn this 'art' of passing? What are the methodological and technical requirements for becoming the new Schweinsteiger, Messi, or Neuer? In this book, the only of its kind, two German League certified coaches have created the ultimate guide to passing. Using the "Hyballa-te Poel-Passing-Puzzle," they present every type of pass there is in modern soccer, with lots of drills for each type. From the goalkeeper to the center forward, everyone can learn passing with these exercises.

Planning: Move by Move - Zenón Franco 2019-09-01
"First the idea and then the move!" Miguel Najdorf used to say in his habitually enthusiastic fashion; that statement is the perfect summary of planning in chess. Planning is of crucial importance in chess and yet this is an area that has not been well discussed or explained to ambitious players who wish to improve. A very well known saying in chess is "Better a bad plan than no plan at all". Playing without a plan – effectively staggering from one move to the next – is a recipe for disaster. It is essential to have some kind of idea of what you are trying to achieve and how to go about it. However, planning is not a straightforward matter. A good plan might be very short, lasting just two or three moves. Another plan might require almost an entire game to implement. A plan can be highly ambitious and complex or somewhat modest and simple. In chess, as in life, circumstances can change quickly and when they do, new plans are needed. How is a player expected to juggle all these different concepts while dealing with the immediate problems posed by the opponent's most recent move? In this book, grandmaster and experienced author Zenón Franco explains planning in detail. He organises material in terms of: typical structures, advantage in space, manoeuvring play, simplification and, finally attack and defence. Using games played by elite players he explains how plans are formed and carried out in these different scenarios. If you want to take your game to the next level, then Planning Move by Move will enable you to do this.

Pressure Tennis - Paul Wardlaw 2000

If you are looking for a training system that prepares tennis players for the pressures of competitive match play, look no further than Pressure Tennis. This instructional book shows you how to raise the level of intensity of your practices, increasing their effectiveness and mentally toughening up your players. Tennis coach Paul Wardlaw has created and refined his extraordinary training program through his 14 successful seasons at the college level. Through his system, you will learn how to design and implement effective practice sessions using pressure drills that simulate match-like conditions. Pressure Tennis will also demonstrate how you can help your players develop - high-percentage tactics; - aggressive court position; - varied, intelligent shot selection; and - better court coverage and anticipation of the opponent's shot. Within the first week or two of use, the system improves concentration, motivation, confidence, and conditioning. More important, players develop a resilience to match-play pressure and welcome the challenge of even the toughest opponent. To help evaluate progress, Wardlaw has included a novel Performance Index that provides coaches with a more objective measure of each player's execution, effort, and ranking on the team. Whether you're a player or a coach, you'll want Pressure Tennis for the blueprint it provides for enhancing mental toughness.

The Coming Prince - Robert Anderson 2007-04-01

He was one of the most popular lay preachers and Christian apologists of his day: Sir Robert Anderson devoutly believed that the Bible was the inerrant word of God, and in this popular 1881 book-a companion to his Daniel in the Critics' Den-he mounts a defense of the prophetic Old Testament Book of Daniel, an early example of apocalyptic philosophy in Christianity. Students of the Bible will appreciate this historically valuable attempt to set straight the many controversies surrounding Daniel regarding its authorship and even the date of its writing. And anyone interested in the apocalyptic fervor of modern-day fundamentalist Christianity will find this an instructive and enlightening read. While at Scotland Yard, Irish police official and religious scholar SIR ROBERT ANDERSON (1841-1918) helped investigate the Jack the Ripper murders, but he is best remembered for his works of Bible study, including *Forgotten Truths* and *The Silence of God*.

Advanced Technologies for Meat Processing - Fidel Toldrá 2017-10-10

As with the first edition, the main goal of *Advanced Technologies for Meat Processing* is to provide the

reader with recent developments in new advanced technologies for the full meat- processing chain. This book is written by distinguished international contributors with recognized expertise and excellent reputations, and brings together all the advances in a wide and varied number of technologies that are applied in different stages of meat processing. This second edition contains 21 chapters, combining updated and revised versions of several chapters with entirely new chapters that deal with new online monitoring techniques like hyperspectral imaging and Raman spectroscopy, the use of nanotechnology for sensor devices or new packaging materials and the application of omics technologies like nutrigenomics and proteomics for meat quality and nutrition. The book starts with the control and traceability of genetically modified farm animals, followed by four chapters reporting the use of online non-destructive monitoring techniques like hyperspectral imaging and Raman spectroscopy, real-time PCR for pathogens detection, and nanotechnology-based sensors. Then, five chapters describe different advanced technologies for meat decontamination, such as irradiation, hydrostatic and hydrodynamic pressure processing, other non-thermal technologies, and the reduction in contaminants generation. Nutrigenomics in animal nutrition and production is the object of a chapter that is followed by five chapters dealing with nutritional-related issues like bioactive peptides, functional meats, fat and salt reduction, processing of nitrite-free products, and the use of proteomics for the improved processing of dry-cured meats. The last four chapters are reporting the latest developments in bacteriocins against meat-borne pathogens, the functionality of bacterial starters, modified atmosphere packaging and the use of new nanotechnology-based materials for intelligent and edible packaging.

Ten Lies The Church Tells Women - J Lee Grady 2013-07-29

The gospel was never intended to restrain women from pursuing god or to prevent them from fulfilling their divine destiny. In his revised and updated book, which includes testimonials, Lee Grady boldly proclaims the truth of the gospel: that men and women are appointed by god and empowered by Him. In 10 Lies the Church Tells Women, readers will discover: Why Jesus went out of His way to minister to and disciple women. Why so many Christian women suffer abusive marriages, and why many pastors don't do anything about the problem. How "the Proverbs 31 woman" has been misinterpreted to deny women opportunities in the workplace.
