Swipe to Unlock - Neel Mehta 2017
WANT A NON-CODING JOB AT A TECH COMPANY? Interested in product management, marketing, strategy, or business development? The tech industry is the place to be: nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 (Forbes, 2017). You might be worried that your lack of coding skills or tech industry knowledge will hold you back. But here's the secret: you don't need to learn how to code to break into the tech industry. Written by three former Microsoft PMs, Swipe to Unlock gives you a breakdown of the concepts you need to know to crush your interviews, like software development, big data, and internet security. We'll explain how Google's ad targeting algorithm works, but Google probably won't ask you how to explain it in a non-technical interview. But they might ask you how you could increase ad revenue from a particular market segment. And if you know how Google's ad platform works, you'll be in a far stronger position to come up with good growth strategies. We'll show

you how Robinhood, an app that lets you trade stocks without commission, makes money by earning interest on the unspent money that users keep in their accounts. No one will ask you to explain this. But if someone asks you to come up with a new monetization strategy for Venmo (which lets you send and receive money without fees), you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users' accounts. We'll talk about some business cases like why Microsoft acquired LinkedIn. Microsoft interviewers probably won't ask you about the motive of the purchase, but they might ask you for ideas to improve Microsoft Outlook. From our case study, you'll learn how the Microsoft and LinkedIn ecosystems could work together, which can help you craft creative, impactful answers. You could propose that Outlook use LinkedIn's social graph to give salespeople insights about clients before meeting them. Or you could suggest linking Outlook's organizational tree to LinkedIn to let HR managers analyze their company's hierarchy and figure out what kind of talent they need to add. (We'll further explore both ideas in the book.) Either way, you're sure to impress. Learn the must know concepts of tech from authors who have received job offers for Facebook's Rotational Product Manager, Google's Associate Product Marketing Manager, and Microsoft's Program Manager to get a competitive edge at your interviews!

Hare Brain, Tortoise Mind - Guy Claxton
2016-05-31

In these accelerated times, our decisive and businesslike ways of thinking are unprepared for ambiguity, paradox, and

sleeping on it." We assume that the quick-thinking "hare brain" will beat out the slower Intuition of the "tortoise mind." However, now research in cognitive science is changing this understanding of the human mind. It suggests that patience and confusion--rather than rigor and certainty--are the essential precursors of wisdom. With a compelling argument that the mind works best when we trust our unconscious, or "undermind," psychologist Guy Claxton makes an appeal that we be less analytical and let our creativity have free rein. He also encourages reevaluation of society's obsession with results-oriented thinking and problem-solving under pressure. Packed with Interesting anecdotes, a dozen puzzles to test your reasoning, and the latest related research, Hare Brain, Tortoise Mind is an Illuminating, uplifting, stimulating read that focuses on a new kind of well-being and cognition.
