Ruth and the Green Book - Gwen Strauss 2021-08-01

Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! The picture book inspiration for the Academy Award-winning film The Green Book Ruth was so excited to take a trip in her family's new car! In the early 1950s, few African Americans could afford to buy cars, so this would be an adventure. But she soon found out that black travelers weren't treated very well

in some towns. Many hotels and gas stations refused service to black people. Daddy was upset about something called Jim Crow laws . . . Finally, a friendly attendant at a gas station showed Ruth's family The Green Book. It listed all of the places that would welcome black travelers. With this guidebook—and the kindness of strangers—Ruth could finally make a safe journey from Chicago to her grandma's house in Alabama. Ruth's story is fiction, but The Green Book and its role in helping a generation of African American travelers avoid some of the indignities of Jim Crow are historical fact.

Current Problems of the Global Environmental Economy Under the Conditions of Climate Change and the Perspectives of Sustainable Development - Elena G. Popkova 2023-01-31

This book presents a systemic view of the global environmental economy under the conditions of climate change from the positions of Sustainable Development Goals. The purpose of the book is to study the current problems of the global environmental economy under the conditions of climate change and to determine the prospects of its sustainable development (systemic support for the SDGs). This goal predetermines the logic and structure of the book, which is comprised of five parts. Part I presents the authors' novel view of the global environmental economy under the conditions of climate change from the positions of the SDGs. It reflects the contradiction and describes the path of preserving economic growth during the implementation of SDG 13. The COVID-19 pandemic and economic crisis are considered as the result of the reduction of biodiversity under the conditions of climate change from the positions of SDG 3. Responsible innovations, eco-friendly products, and green trade are presented as trends of the environmental economy under the conditions of climate change to support SDG 12. Green jobs are analyzed in the environmental economy under the conditions of climate change during the implementation of SDG 8. The significance of social inclusivity and reduction of the inequality of the environmental economy under the conditions of climate change to support SDG 10 is noted. Part II elaborates on the sectoral specifics of the influence of climate change on the environmental economy: energetics, finance, industry, state management, and agriculture. Part

III presents and discusses the international experience of development of the environmental economy under the conditions of climate change given the specifics of developed and developing countries and based on the case experience of Central Asia, the EAEU, and Russia. In Part IV, technological transition (Fourth Industrial Revolution) is offered as a perspective response of the global economic policy to climate change. Scenarios of the fight against climate change in the Decade of Action depending on the scale of the technological transition are described: digital economy vs Industry 4.0 and Society 5.0. The perspectives of the technological transition at the level of companies (creation of cyber-physical systems of Industry 4.0; green digital innovations and smart ESG finance) and regions (smart region as a socio-economic environment with large adaptability to climate change) are described.

The Islander - John McMillan 2016-07-30

Rupert Carr has enjoyed an idyllic childhood growing up on a small island off the north coast of Ireland. When at sixteen he goes to stay with his aunt and uncle in County Tyrone, to complete his schooling, Rupert meets and falls for Eilish, a perceptive and uninhibited convent girl. Through her he is drawn into the nascent civil rights movement and brought face to face with the political reality of the Six Counties when their peaceful protest march comes under vicious attack from loyalists with the tacit approval of the RUC. It is the beginning of the Troubles. Rupert flees to England but is soon made aware of the injustice that exists there too and is attracted to Fenella and her radical student circle. Finally Rupert must prove himself in a decisive action against the Establishment

Green Roof Ecosystems - Richard K. Sutton 2015-06-04

This book provides an up-to-date coverage of green (vegetated) roof research, design, and management from an ecosystem perspective. It reviews, explains, and poses questions about monitoring, substrate, living components and the abiotic, biotic and cultural aspects connecting green roofs to the fields of community, landscape and urban ecology. The work contains examples of green roof venues that demonstrate the focus, level of detail, and techniques needed to understand the structure, function, and impact of these novel ecosystems. Representing a seminal compilation of research and technical knowledge about green roof ecology and how functional attributes can be enhanced, it delves to explore the next wave of evolution in green technology and defines potential paths for technological advancement and research.

The Negro Motorist Green Book - Victor H. Green

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that

the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

The Physical Geography of Wisconsin - Lawrence Martin 1965

The immensely varied topography of Wisconsin provides examples of nearly every important physiographic process and topographic form. In the Driftless Area to the southwest, wind and water have weathered and carved away the countryside; along the Mississippi and other rivers are found most of the essential features of stream erosion and deposition; in the north and east glaciers have ground away the hills and left their mark on the plains and swamps. The Physical Geography of Wisconsin, reprinted from the second edition, 1932, of the Wisconsin Geological and Natural History Survey Bulletin No. XXXVI (1916), offers a clear explanation of these and many other physiographical processes to the student and amateur geographer alike. The topography of the state is discussed in detail and, where necessary, related to its human geography; and the author has carefully explained and indexed all unfamiliar terms. The book is well supplied with maps, charts, and illustrations, and will be an excellent supplementary reader or guide in field trips for geography courses at

all levels. "

The Geography of Central Asia - Igor Jelen 2021-03-01

This book provides a profound geographical description and analysis of Central Asia. The authors take a synthetic approach in a period of critical transformation in the post-soviet time. The monograph analyzes comprehensively the physical and human geography as well as human-nature interactions of Central Asia with focus on Kazakhstan, Uzbekistan, Turkmenistan, Kyrgyzstan and Tajikistan. Natural processes are described at a systemic scale, focusing on ecological impacts and consequences and contemporary human adaptations and organization. It also discusses in which ways the human organizations try to apply solutions for their needs such as security, territorial management and resources renewability, material and functional needs, identity elaborations, culture and communication. The Geography of Central Asia appeals to scientists and students of regional geography and interested academics from other areas such as social, political, economic and environmental studies within the context of Central Asia. The book is also a very useful resource for field trips into this area.

Green City Planning and Practices in Asian Cities - Zhenjiang Shen 2018-03-21

Urban planners across the world are faced with sustainable development issues in their work, especially when they are tasked with creating green cities or where sustainable and smart growth in urban settings are set as primary goals. This book introduces green city planning and practices from the three dimensions of green-building innovation, community development and smart city strategies, and argues that effective implementation of green city planning are a necessary pre-condition for reaching sustainable urban development. A range of authors representing a broad disciplinary spectrum bring together the different standards of green building methods and urban design techniques and clearly sketch the roles of both spatial designers and urban researchers in the implementation of green city planning at regional, community and single-building level in order to arrive at an integrated approach across different scales.

Curriculum for High Ability Learners - Liang See Tan 2016-12-26

Given the increasing speed of change and the information explosion around the world, this book draws

attention to the practice of teaching for conceptual understanding, which has been heralded as an effective approach within many curriculum frameworks. This book is pivotal in documenting and analyzing efforts in creating concept-based curriculum and pedagogies for high ability learners. Contributors of this book discuss key concepts and trends in their curriculum development efforts for high ability learners, as well as the challenges and solutions in their work. Drawing from a wide group of educators – practitioners, curriculum writers, administrators and researchers – this book has assembled together a range of perspectives on the processes, outcomes and implications of using concept-based curriculum and pedagogies in a dynamic educational landscape. These informed perspectives highlighted by the contributors will prove insightful and inspirational to practitioners, policy makers and other stakeholders alike.

Archie Green - Sean Burns 2011-11-01

Archie Green: The Making of a Working-Class Hero celebrates one of the most revered folklorists and labor historians of the twentieth century. Devoted to understanding the diverse cultural customs of working people, Archie Green (1917–2009) tirelessly documented these traditions and educated the public about the place of workers' culture and music in American life. Doggedly lobbying Congress for support of the American Folklife Preservation Act of 1976, Green helped establish the American Folklife Center at the Library of Congress, a significant collection of images, recordings, and written accounts that preserve the myriad cultural productions of Americans. Capturing the many dimensions of Green's remarkably influential life and work, Sean Burns draws on extensive interviews with Green and his many collaborators to examine the intersections of radicalism, folklore, labor history, and worker culture with Green's work. Burns closely analyzes Green's political genealogy and activist trajectory while illustrating how he worked to open up an independent political space on the American Left that was defined by an unwavering commitment to cultural pluralism.

Climate Change Education - Chang Chew Hung 2022-12-30

Climate change is complex and there is a need to educate our future generations so that they are able to deal with the plethora of information and views that they come into contact with in their lives. This book inquires into what it means to teach and learn about climate change. Now in its second edition, Chang further explores what education for climate change entails, discussing the concept of climate change education (CCE) itself, how it is taught in schools and how public education is being carried out. Featuring updated literature in a quickly advancing field, the book defines CCE for the global citizen and looks at pedagogies supporting CCE. It also identifies teachers as key stakeholders in climate change discourse, how to improve teacher readiness on the topic and how teacher professional development can support successful implementation of CCE. This book will be invaluable to climate change educators and can act as a reference resource for teachers, education policymakers and public education agencies.

An Introduction to Scientific Research Methods in Geography and Environmental Studies - Daniel Montello 2012-12-10

"Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation. From chapters on the scientific method and fundamental research concepts, to experimental design, sampling and statistical analysis, the text offers an excellent introduction to the key concepts of geographical research. The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations. The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters." - Joseph Mallalieu, School of Geography, Leeds University "Montello and Sutton is one of the best texts I've used in seminars on research methodology. The text offers a clear balance of quantitative vs. qualitative and physical vs. human which I've found particularly valuable. The chapters on research ethics, scientific communication, information technologies and data visualization are excellent." - Kenneth E. Foote, Department of Geography, University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of

scientific research, covering both geography and environmental studies. Written for undergraduate and postgraduate students, it: Explains both the conceptual and the technical aspects of research, as well as all phases of the research process Combines approaches in physical geography and environmental science, human geography and human-environment relations, and geographic and environmental information techniques (such as GIS, cartography, and remote sensing) Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography, environmental studies and related disciplines such as planning and earth science.

Race, Equality and Schools - Richard Willey 2018-10-03

Originally published in 1984. How to respond to ethnic diversity is a question of major importance for teachers. The multi-ethnic school is only one aspect of a multi-ethnic society, and the problems and complexities teachers face have far-reaching implications. Attention has turned from fitting minority ethnic groups into existing education systems to achieving equality in a multi-ethnic society, with consequent questions about and changes in the practice of teaching. This book guides the reader through the

complexities of changes in the field of race and education, examining developments in both policy and practice. It looks at the radical answers which were developing within a number of national education systems - in Britain, Australia, Canada, the US and elsewhere, and at the teachers' practical responses to the pressing problems.
