The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses

should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Toward a Better World - Mark Lazenby 2020-01-02

Nurses are positioned on healthcare's front line, intimately connected to individuals, families, and communities. How can they leverage this position

to work for the common good? In *Toward a Better World*, Mark Lazenby, a philosopher and a nurse, presents a plan of action. He argues that nurses advance the good society when they fulfill fundamental obligations.

Promoting equality, peace and respect, providing assistance and safety, and safeguarding the health of our planet are among these obligations. By acting upon them, nurses become a force for social change in their communities. But through the collective power of more than 20 million nurses worldwide, nurses become a global force for making the world a better place--in the present and for the future. A companion to *Caring Matters Most*, Lazenby's ethics book, *Toward a Better World* challenges readers to lead good lives of service to others. This book will invigorate all, nurses and non-nurses alike, who wish to spend their lives making the world a better place.
