**Tourists Like Us** - Ecole cantonale d'art du Valais (Sierre) 2013

"This book opens up a new field of discussion at the crossroads between contemporary art and critical tourism. As common ground for theoretical inquiry and artistic research, the notion of critical tourism asks us to question again our understanding of authenticity, the tourist gaze, the museification of landscape, the visual construction of place, post-romanticism, contemporary exoticism, site-specificity and global connectedness. The book specifically explores the role of the artist, and of the art institution, in the age of destination culture. How are individual and institutional practices changing in an era of hosting, hospitality, displacing and cultural nomadism? Based on the comparison between two very different but nonetheless similar landscapes- the Swiss Alps and the Baltic Dunes and Beaches-art historians, environmental historians, geographers, explorers, curators and artists address the relatively new field of critical tourism in a transdisciplinary context. Together they consider how to critically approach and understand seductive and remote landscapes, against the backdrop of global cultural tourism. The book is not only a critical account of discussions around the topics but it is also rich in visual materials, documents and descriptions of artistic interventions in these

two touristic settings. This publication is the result of over a year of exchanges between ECAV-Ecole Cantonale d'Art du Valais in Sierre (Switzerland) and Nida Art Colony (NAC), which belongs to the Vilnius Academy of Arts (Lithuania). The book reviews the concepts, residencies, exhibitions, workshops and the symposium that formed this exchange between 2012 to 2013, in the context of the research and residency programme "On Hosting and Displacing: Artistic Residencies and Cultural Production in Remote Contexts". *The Dream that Failed* - Walter Laqueur 1996-02-15

Walter Laqueur has been hailed as "one of our most distinguished scholars of modern European history" in the *New York Times Book Review*. Robert Byrnes, writing in the *Journal of Modern History*, called him "one of the most remarkable men in the Western world working in the field." Over a span of three decades, in books ranging from Russia and Germany to the recent Black Hundred, he has won a reputation as a major writer and a provocative thinker. Now he turns his attention to the greatest enigma of our time: the rise and fall of the Soviet Union. In *Why the Soviet Union Failed*, Laqueur offers an authoritative assessment of the Soviet era--from the triumph of Lenin to the fall of Gorbachev. In the last three years, decades of conventional wisdom about the U.S.S.R. have been swept away, while a flood of evidence from Russian archives demands new thinking about old assumptions. Laqueur rises to the challenge with a critical inquiry conducted on a grand scale. He shows why the Bolsheviks won the struggle for power in 1917; how they captured the commitment of a young generation of Russians; why the idealism faded as Soviet power grew; how the system ultimately collapsed; and why Western experts have been so wrong about the Communist state. Always thoughtful and incisive, Laqueur reflects on the early enthusiasm of foreign observers and Bolshevik revolutionaries--then takes a piercing look at the totalitarian nature of the Soviet Union. We see how Communist society stagnated during the 1960s and '70s, as the economy wobbled to the brink; we also see how Western observers, from academic experts to CIA analysts, made wildly optimistic estimates of Moscow's economic and political strength. Just weeks before the U.S.S.R. disappeared from the earth, scholars were confidently predicting the survival of the Soviet Union. But

in underscoring the rot and repression, he also notes that the Communist state did not necessarily have to fall when it did, and he examines the many factors behind the collapse (the pressure from Reagan's Star Wars arms program, for instance, and ethnic nationalism). Some of these same problems, he finds, continue to shape the future of Russia and the other successor states. Only now, in the rubble of this lost empire, are we coming to grips with just how wrong our assumptions about the U.S.S.R. had been. In *The Dream That Failed*, an internationally renowned historian provides a new understanding of the Soviet experience, from the rise of Communism to its sudden fall. The result of years of research and reflection, it sheds fresh light on a central episode in our turbulent century.

*What is Soviet Now?* - Thomas Lahusen  
2008

Economists and political scientists wrestle with the challenges faced by Russian officials and public alike in adapting to a market economy and democracy, including the fragility of property rights and elections still rooted in old institutional structures. This book examines the reforms of health and welfare, and the hierarchy of privilege and access, and consider how Putin's statist approach to mythmaking compares to that of previous Soviet and post-Soviet regimes. Historians and anthropologists explore the issue of nostalgia, gender, punishment, belief, and how history itself is being created and perceived today. The book concludes with a journey through the ruined landscape of real socialism.

*Brezhnev Reconsidered* - E. Bacon  
2002-10-11

Leonid Brezhnev was leader of the Soviet Union for almost two decades when it was at the height of its powers. This book is a long overdue reappraisal of Brezhnev the man and the system over which he ruled. By incorporating much of the new material available in Russian, it challenges the received wisdom about the Brezhnev years, and provides a

fascinating insight into the life and times of one of the twentieth century's most neglected political leaders.

**Narrating our Pasts** - Elizabeth  
Tonkin 1995-04-13

This study looks at how oral histories are constructed and how they should be interpreted, and argues for a deeper understanding of their oral and social characteristics. Oral accounts of past events are also guides to the future, as well as being social activities in which tellers claim authority to speak to particular audiences. Like written history and literature, orality has its shaping genres and aesthetic conventions and, likewise, has to be interpreted through them. The argument is illustrated through a wide range of examples of memory, narration and oral tradition, including many from Europe and the Americas, and with a particular focus on oral histories from the Jla0 Kru of Liberia, with whom Elizabeth Tonkin has carried out extensive research. Tonkin also draws on and integrates the insights of a range of other disciplines, such as literary criticism, linguistics, history, psychology, and communication and cultural studies. *The Totalitarian Paradigm After the End of Communism* - Achim Siegel 1998 Concepts of totalitarianism have undergone an academic revival in recent years, particularly since the breakdown of communist systems in Europe in 1989-91: the totalitarian paradigm, so it seems to many scholars today, had been discarded prematurely in the heat of the Cold War. The demise of communism as a social system is, however, not only an important cause of the recurring attractiveness of the totalitarian paradigm, but provides at the same time new evidence and, correspondingly, new problems of explanation for all approaches in communist studies and totalitarianism theory in particular. This book contains articles by philosophers, social scientists and historians who reassess the validity of the totalitarian approach in the light of the recent historical developments in

Eastern Europe. A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev-era and the collapse of Europe's communist systems in 1989-91. In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications. In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism. The authors attempt to reinterpret the

classic concepts so as to meet the objections which have been put forward against those concepts during the last decades. The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War, such as the work of Sigmund Neumann and Franz Borkeuau. It also focuses on the most famous authors in the field: Hannah Arendt and Carl Joachim Friedrich. In addition it discusses theorists of totalitarianism like Juan Linz, whose contributions to totalitarianism theory have too often been overlooked.
