When God Looked the Other Way - Wesley Adamczyk 2015-07-10

Often overlooked in accounts of World War II is the Soviet Union's quiet yet brutal campaign against Polish citizens, a campaign that included, we now know, war crimes for which the Soviet and Russian governments only recently admitted culpability. Standing in the shadow of the Holocaust, this episode of European history is often overlooked. Wesley Adamczyk's gripping memoir, *When God Looked the Other Way*, now gives voice to the hundreds of thousands of victims of Soviet barbarism. Adamczyk was a young Polish boy when he was deported with his mother and siblings from their comfortable home in Luck to Soviet Siberia in May of 1940. His father, a Polish Army officer, was taken prisoner by the Red Army and eventually became one of the victims of the Katyn massacre, in which tens of thousands of Polish officers were slain at the hands of the Soviet secret police. The family's separation and deportation in 1940 marked the beginning of a ten-year odyssey in which the family endured fierce living conditions, meager food rations, chronic displacement, and rampant disease, first in the Soviet Union and then in Iran, where Adamczyk's mother succumbed to exhaustion after mounting a harrowing escape from the Soviets. Wandering from country to country and living in refugee camps and the homes of strangers, Adamczyk struggled to survive and maintain his dignity amid the horrors of war. *When God Looked the Other Way* is a memoir of a boyhood lived in unspeakable circumstances, a book that not only illuminates one of the darkest periods of European history but also traces the loss of innocence and the fight against despair that took root in one young boy. It is also a book that offers a stark picture of the unforgiving nature of Communism and its champions. Unflinching and poignant, *When God Looked the Other Way* will stand as a testament to the trials of a family during wartime and an intimate chronicle of episodes yet to receive their historical due. "Adamczyk recounts the story of his own wartime childhood with exemplary precision and immense emotional sensitivity, presenting the ordeal of one family with the clarity and insight of a skilled novelist. . . . I have read many descriptions of the Siberian odyssey and of other forgotten wartime episodes. But none of them is more informative, more moving, or more beautifully written than *When God Looked the Other Way*."—From the Foreword by Norman Davies, author of *Europe: A History* and *Rising '44: The Battle for Warsaw* "A finely wrought memoir of loss and survival."—Publishers Weekly "Adamczyk's unpretentious prose is well-suited to capture that truly awful reality."—Andrew Wachtel, *Chicago Tribune* Books "Mr. Adamczyk writes heartfelt, straightforward prose. . . . This book sheds light on more than one forgotten episode of history."—Gordon Haber, *New York Sun* "One of the most remarkable World War II sagas I have ever read. It is history with a human face."—Andrew Beichman, *Washington Times*

Go Blended! - Liz Arney 2015-02-02

Craft a blended learning program tailor-made for your students *Go Blended!* is a practical implementation guide for educators interested in getting blended learning off the ground. Author Liz Arney is a seasoned developer of blended learning programs at Aspire Public Schools, and

she also closely collaborates with district and charter leaders from across the country on this work. *Go Blended!* offers boots-on-the-ground support for laying the foundation for a blended learning program in our schools and classrooms. Throughout the book teachers with blended learning experience share helpful tips and lesson plans to help educators make purposeful choices in using technology to fulfill students' needs without becoming an end in itself. This useful guide also offers key documents and timelines to support a blended learning implementation and provides step-by-step practical advice for avoiding mistakes. Readers will gain expert insight into both the broad and narrow of blended transition, from sweeping concepts like program goals to nitty-gritty details like teaching routines around technology use. Technology is rapidly changing the landscape of education; teacher effectiveness and student achievement are both tied to the ability to adapt to new technology, and blended learning has become a hot topic in schools across the nation. *Go Blended!* helps school leaders and teachers take their first steps toward blended learning, putting them in a better position to continuously adapt as the world changes. You'll learn how to: Investigate leadership and staff readiness to "go blended." Learn how to evaluate and purchase the right educational software. Keep the program's goals in mind throughout the development process. Teach lessons that set students up for success when using classroom technology. Tailor the program to the students, not the other way around. Aspire's impressive track record of high performance, along with a growing body of evidence from blended schools across the nation, testifies to the reality that incorporating technology into the classroom can improve student outcomes. But improved student outcomes will only occur when teachers and administrators intentionally tailor technology and curricula to meet their goals. With *Go Blended!*, you can be confident that you're focused on the ultimate goal of blended learning: increasing student achievement.

Pirate Modernity - Ravi Sundaram 2009-07-30

Using Delhi's contemporary history as a site for reflection, *Pirate Modernity* moves from a detailed discussion of the technocratic design of the city by US planners in the 1950s, to the massive expansions after 1977, culminating in the urban crisis of the 1990s. As a practice, pirate modernity is an illicit form of urban globalization. Poorer urban populations increasingly inhabit non-legal spheres: unauthorized neighborhoods, squatter camps and bypass legal technological infrastructures (media, electricity). This pirate culture produces a significant enabling resource for subaltern populations unable to enter the legal city. Equally, this is an unstable world, bringing subaltern populations into the harsh glare of permanent technological visibility, and attacks by urban elites, courts and visceral media industries. The book examines contemporary Delhi from some of these sites: the unmaking of the city's modernist planning design, new technological urban networks that bypass states and corporations, and the tragic experience of the road accident terrifyingly enhanced by technological culture. *Pirate Modernity* moves between past and present, along with debates in Asia, Africa and Latin America on urbanism, media culture, and everyday life. This pioneering book suggests cities have to be revisited afresh after proliferating media culture. *Pirate Modernity* boldly draws from urban and cultural theory to open a new agenda for a world after media urbanism.

Intelligent Projects Using Python - Santanu Pattanayak 2019-01-31

Implement machine learning and deep learning methodologies to build

smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn Build an intelligent machine translation system using seq-2-seq neural translation machines Create AI applications using GAN and deploy smart mobile apps using TensorFlow Translate videos into text using CNN and RNN Implement smart AI Chatbots, and integrate and extend them in several domains Create smart reinforcement, learning-based applications using Q-Learning Break and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Scars, Marks & Tattoos - Jacqueline Caruso 2021-03-31

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or

process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Carrots for Charlie - Rhonda Brazina 2012-07-01

A cheerful, friendly man named Max who loves to walk on the beach and enjoy the outdoors in his beautiful hometown of Naples, Florida, visits the local shelter to adopt a dog. The dog, a loveable spaniel named Charlie, likes to do all of the outdoor activities that Max likes to do. Charlie also likes to listen to Max sing, which he does nearly all of the time. Max makes up songs about all sorts of things, including exercise, rules, and his friendship with Charlie. When Max begins teaching singing lessons and is away from home, Charlie is left alone in front of the television with an overflowing bowl of treats. Soon the neighbors notice that Charlie is walking slower and becoming chubby, which leads to a helpful visit to the vet. Both Charlie and Max begin a routine of exercise and healthy eating. Things are going well with the new plan until Max makes a discovery under the sofa cushions. Fortunately problems are resolved for the two best friends as they work toward fitness and good health and discover that carrots are their favorite healthy treat. This delightful children's story of friendship has an important message about health, nutrition and caring for children and pets.

Grid-Scale Energy Storage Systems and Applications - Fu-Bao Wu 2019-06-11

Grid-Scale Energy Storage Systems and Applications provides a timely introduction to state-of-the-art technologies and important demonstration projects in this rapidly developing field. Written with a view to real-world applications, the authors describe storage technologies and then cover operation and control, system integration and battery management, and other topics important in the design of these storage systems. The rapidly-developing area of electrochemical energy storage technology and its implementation in the power grid is covered in particular detail. Examples of Chinese pilot projects in new energy grids and micro grids are also included. Drawing on significant Chinese results in this area, but also including data from abroad, this will be a valuable reference on the development of grid-scale energy storage for engineers and scientists in power and energy transmission and researchers in academia. Addresses not only the available energy storage technologies, but also topics significant for storage system designers, such as technology management, operation and control, system integration and economic assessment Draws on the wealth of Chinese research into energy storage and describes important Chinese energy storage demonstration projects Provides practical examples of the application of energy storage technologies that can be used by engineers as references when designing new systems

The World Is Flat 3.0 - Thomas L. Friedman 2007-07-24

This Independence Day edition of *The World is Flat 3.0* includes an exclusive preview of *That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back*, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller "One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. *The World Is Flat 3.0* is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of *The Lexus and the Olive Tree*.

Dead Lies Dreaming - Charles Stross 2020-10-27

When magic and superpowers emerge in the masses, Wendy Deere is contracted by the government to bag and snag supervillains in Hugo Award-winning author Charles Stross' *Dead Lies Dreaming: A Laundry Files Novel*. As Wendy hunts down Imp--the cyberpunk head of a band calling themselves "The Lost Boys"--she is dragged into the schemes of louché billionaire Rupert de Montfort Bigge. Rupert has discovered that the sole surviving copy of the long-lost concordance to the one true Necronomicon is up for underground auction in London. He hires Imp's sister, Eve, to procure it by any means necessary, and in the process, he encounters Wendy Deere. In a tale of corruption, assassination, thievery, and magic, Wendy Deere must navigate rotting mansions that lead to distant pasts, evil tycoons, corrupt government officials, lethal curses, and her own moral qualms in order to make it out of this chase alive. Research into Design for a Connected World - Amaresh Chakrabarti
2019-01-08

This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) - the largest in India in this area - written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

INDIA'S NEW CAPITALISTS - Harish Damodaran 2018-11-25

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book - acclaimed for being the first social history to document and understand India's new entrepreneurial groups - Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Indian Cyber Laws - Suresh T. Viswanathan 2001

Grad Night - Carver Pike 2019-10-11

School should never be synonymous with danger, but that's exactly what it has become. Students are violent, with each other and with the staff. Teachers and administrators have been attacked. This is nothing like the school shootings occurring on other campuses. No, this is personal. It doesn't revolve around one child wanting revenge on the rest of the student body. It involves most of the students wanting payback against everyone. Something far worse than teenage rage lurks in the Darrius Sawyer High corridors. Everyone can sense it. Teachers hint about it. They speak in hushed tones, tell stories about odd occurrences in their classrooms, and travel by numbers as they make their way to their cars after school. Evil walks the hallways and the teachers know its name: James Bender. At DS High, the seniors are planning the ultimate Grad Night bash, and all the teachers are invited. James Bender will be there. You will be too. Carver Pike takes ordinary circumstances, cinches them tight with razor wire, and then saws back and forth. Gasp for air, holler for help, and pray for an end to the madness.
