Chinese Sociology -
2020-10

"There is quite a range of opinions about China in the United States today - authoritarian, far-sighted, successful at economic

development, excessively committed to party authority, threatened by the environmental consequences of rapid economic growth, burdened by bloated and aging party

leaders. Some believe that China is on its way to becoming a global superpower, while others believe that the repression of individual freedom and thinking is a fatal flaw that will eventually present serious problems for Chinese stability and development. China's social and economic changes, and its increasing global influence, have given rise to a plethora of books. This compendium highlights China's different themes, such as social welfare, gender, ethnicity, and the existence, role, and performance of the Communist Party and the State. The book includes well-researched and detailed accounts of social changes in China. Since the founding of the Communist Party of China in 1921, the relations among China's many ethnic groups have undergone incessant changes. The first chapter of this book will discuss the impact of China's ethnic minorities on

China as a whole, and additionally illuminate specific intra-ethnic relations, that is, the ways in which cultural minorities affect one another. The second chapter in this compilation attempts to present a framework to produce a new version that applies to the overall society (urban and rural) of transitional China, provides a more consistent logic for the categorization of big classes, and offers a more adequate measure. Education is a lasting process. Academic performance in primary education plays a crucial role in obtaining further educational opportunities. Thus, it is necessary to examine how family background affects children's academic achievement at an early stage. The third chapter sheds light on it. Additionally, the book also examines how cultural sociology can help us understand contemporary

Chinese society, the factor structure of the ruminative response scale, and measurement invariance across gender and age among Chinese adolescents. In the last chapter, the book investigates the motivations and the forms of practicing CSR in art and culture in China, which is increasingly conducted but still not sufficiently studied.

Service is Front Stage - J.

Teboul 2006-09-29

This book contains a simple but powerful definition of services based upon a separation between back-stage and front-stage activities. Services deal with front interactions, production and manufacturing with back-stage operations. Teboul uses this distinction to systematically explore the important issues of the field.

Residential Architecture -

Carles Broto 1997-01-01

The social structure has move towards a new concept of residence that combines the natural

requirement of privacy within the individual unit with the need to share collective spaces and installations. This volume presents a great variety of single family dwellings and collective housing with very specific requirements (students, the elderly, work groups, refugees), showing how both their social and their individual needs are covered.

The Oxford Handbook of Mesoamerican

Archaeology - Deborah L.

Nichols 2012-09-24

The Oxford Handbook of Mesoamerican Archaeology provides a current and comprehensive guide to the recent and on-going archaeology of Mesoamerica. Though the emphasis is on prehispanic societies, this Handbook also includes coverage of important new work by archaeologists on the Colonial and Republican periods. Unique among recent works, the text brings together in a single volume

article-length regional syntheses and topical overviews written by active scholars in the field of Mesoamerican archaeology. The first section of the Handbook provides an overview of recent history and trends of Mesoamerica and articles on national archaeology programs and practice in Central America and Mexico written by archaeologists from these countries. These are followed by regional syntheses organized by time period, beginning with early hunter-gatherer societies and the first farmers of Mesoamerica and concluding with a discussion of the Spanish Conquest and frontiers and peripheries of Mesoamerica. Topical and comparative articles comprise the remainder of Handbook. They cover important dimensions of prehispanic societies--from ecology, economy, and environment to social and political relations--and discuss significant

methodological contributions, such as geochemical source studies, as well as new theories and diverse theoretical perspectives. The Handbook concludes with a section on the archaeology of the Spanish conquest and the Colonial and Republican periods to connect the prehispanic, proto-historic, and historic periods. This volume will be a must-read for students and professional archaeologists, as well as other scholars including historians, art historians, geographers, and ethnographers with an interest in Mesoamerica.

A look at a leading Peruvian architectural firm through 12 exemplary projects From their Mies Crown Hall Americas Prize-winning design for the University of Piura educational facilities to their design for the Place of Remembrance in Lima, Barclay & Crousse's work binds together the most

current advances in technology with designs that center on the quality of life of its dwellers. Their works show how design specific to the conditions of developing countries can inform and be vital to global architectural conversation. Founded in Paris by Sandra Barclay and Jean Pierre Crousse in 1994, the firm relocated to Lima, Peru, in 2006, pursuing their projects in Europe through Atelier Nord-Sud. This book presents 12 buildings illustrated through sketches, plans and over 120 photographs by Chilean photographer Cristóbal Palma. The volume is a work unto itself that demonstrates the architects' mastery of space.

The Black Dogs Project - Fred Levy 2015-09-15
Combat Black Dog Syndrome worldwide; a portion of all proceeds from Black Dog Project will be donated to black dog rescue. One of Tumblr's most viral blogs of 2014, the Black Dogs Project is a stunning photo series by animal photographer Fred Levy. Known as "Black Dog Syndrome" in animal shelters and rescues, it refers to the unfortunate phenomenon that black dogs are frequently the LAST dogs to be adopted and the FIRST dogs to be euthanized in rescue shelters. Animal photographer Fred Levy couldn't believe that it was true, so he began talking with shelters. Not only does the phenomenon exist, but he discovered it's an epidemic.

Levy decided to turn his camera lens to black dogs, showing the world how beautiful they truly are. He called the photo series, The Black Dogs Project, and the stunning photographs have been shared worldwide, spreading awareness and attention to the problem. A portion of all proceeds for Black Dogs Project will be donated to black dog rescue.

Jaap Bakema and the Open Society - 2017

Jaap Bakema and the Open Society' is the first extensive publication on the Dutch architect and the remarkable production of his office Van den Broek and Bakema. His ideas on the open society are extremely relevant to the current debates about how to involve citizens in city building and creating alternative systems to crumbling welfare states. This historical document will highlight both his most relevant and less known work through texts, archival

materials and photography. The book contains interviews with his contemporaries such as John Habraken and Herman Hertzberger and essays that each emphasize a different aspect of his work and the context in which it came into being.

Youth and Egotry - Pio Baroja 2008-01-01
Pío Baroja y Nessi (1872 - 1956) was a Spanish Basque writer and a novelist of the Generation of 98. Baroja was trained as a physician, managed the family bakery and twice ran unsuccessfully for the Spanish parliament. As a young man Baroja believed in anarchistic ideals. He later would derive into a simple admiration of

men of action. His view of life was pessimistic. He was in disfavor with Catholic and traditional thinkers. During the Spanish Civil War of 1936-39 he was often in danger. In the 1890s Spain was awakening to reform. The monarchy was trying to balance between too much reform and not enough. The people wanted social change and equality. Novelists, poets and essayists appeared who had never been heard of before full of exciting ideas from other lands and of their own. Out of this tumultuous time came new writers with exciting new works. Baroja was one of these. Youth and Egotry was translated from the Spanish by Jacob S. Fassett Jr. and Frances L. Phillips. The volume contains essays of an autobiographical nature. To Heal the Earth - Ian L. McHarg 2007-04
Ian L. McHarg's landmark book *Design with Nature* changed the face of landscape architecture and

planning by promoting the idea that the design of human settlements should be based on ecological principles. McHarg was one of the earliest and most influential proponents of the notion that an understanding of the processes that form landscapes should underlie design decisions. In *To Heal the Earth*, McHarg has joined with Frederick Steiner, a noted scholar of landscape architecture and planning, to bring forth a valuable cache of his writings produced between the 1950s and the 1990s. McHarg and Steiner have each provided original material that links the writings together, and places them within the historical context of planning design work and within the larger field of ecological planning as practiced today. The book moves from the theoretical-beginning with the 1962 essay "Man and Environment" which sets

forth the themes of religion, science, and creativity that emerge and reappear throughout McHarg's work--to the practical, including discussions of methods and techniques for ecological planning as well as case studies. Other sections address the link between ecology and design, and the issue of ecological planning at a regional scale, covering topics such as education and training necessary to develop the field of ecological planning, how to organize and arrange biophysical information to reveal landscape patterns, the importance of incorporating social factors into ecological planning, and more. *To Heal the Earth* provides a larger framework and a new perspective on McHarg's work that brings to light the growth and development of his key ideas over a forty year period. It is an important contribution to the literature, and will be essential reading for

students and scholars of ecological planning, as well as for professional planners and landscape architects. Teaching Writing Skills - Donn Byrne 1979

The Love of Painting - Isabelle Graw 2019-04-02
A study of how the rhetoric of painting remains omnipresent in the field of art. Painting seems to have lost its dominant position in the field of the arts. However, looking more closely at exhibited photographs, assemblages, installations, or performances, it is evident how the rhetorics of painting still remain omnipresent. Following the tradition of classical theories of painting based on exchanges with artists, Isabelle Graw's *The Love of Painting* considers the art form not as something fixed, but as a visual and discursive material formation with the potential to fascinate owing to its ability to produce the fantasy of liveliness. Thus,

painting is not restricted to the limits of its own frame, but possesses a specific potential that is located in its material and physical signs. Its value is grounded in its capacity to both reveal and mystify its conditions of production. Alongside in-depth analyses of the work of artists like Édouard Manet, Jutta Koether, Martin Kippenberger, Jana Euler, and Marcel Broodthaers, the book includes conversations with artists in which Graw's insights are further discussed and put to the test.

Binders for Durable and Sustainable Concrete -
Pierre-Claude Aïtcin
2007-08-07

Linking theory to practice, this book provides a better fundamental understanding of Portland cement and hydraulic binders which is

necessary to make better concrete. It has been clearly demonstrated that concrete durability is closely linked to its water/binder ratio and proper curing during the first week after casting. In this rigorously presented work, Pierre-Claude Aïtcin explains the complexity of the hydration reaction and how to make, use and cure durable and sustainable concrete. This book also details the problems with Portland cement composition at present and outlines the concept of an ideal hydraulic binder which is technically and ecologically efficient, as well as being long-lasting and robust. Binders for Durable and Sustainable Concrete is a practical and innovative reference text which will be particularly relevant to engineers and chemists working in the Portland cement, concrete and admixture industries. This book will also be of interest to academics and graduate-level students in Civil

Engineering departments who specialize in Portland cement and concrete technology.

Standard English - Tony Bex 2002-01-31

Standard English draws together the leading international scholars in the field, who confront the

debates surrounding 'Standard English', grammar and correctness head-on.

These debates are as intense today as ever and extend far beyond an academic context. Current debates about the teaching of English in the school curriculum and concerns about declining standards of English are placed in a historical, social and international context.

Standard English: * explores the definitions of 'Standard English', with particular attention to distinctions between spoken and written English * traces the idea of 'Standard English' from its roots in the late seventeenth century through to the present day. This is an accessible, seminal work which clarifies an increasingly confused topic. It includes contributions from: Ronald Carter, Jenny Cheshire, Tony Crowley, James Milroy, Lesley Milroy and Peter Trudgill.

Confession of the Lioness - Mia Couto 2015-07-14

A dark, poetic mystery about the women of the remote village of Kulumani and the lionesses that hunt them. Told through two haunting, interwoven diaries, Mia Couto's *Confession of the Lioness* reveals the mysterious world of Kulumani, an isolated village in Mozambique whose traditions and beliefs are threatened when ghostlike lionesses begin hunting the women who live there. Mariamar, a woman whose sister was killed in a lioness attack, finds her life thrown into chaos when the outsider Archangel Bullseye, the marksman hired to kill the lionesses, arrives at the request of the village elders. Mariamar's father imprisons her in her home, where she relives painful memories of past abuse and hopes to be rescued by Archangel. Meanwhile, Archangel tracks the lionesses in the wilderness, but when he begins to suspect there is more to them than meets the eye, he starts to lose

control of his hands. The hunt grows more dangerous, until it's no safer inside Kulumani than outside it. As the men of Kulumani feel increasingly threatened by the outsider, the forces of modernity upon their traditional culture, and the danger of their animal predators closing in, it becomes clear the lionesses might not be real lionesses at all but spirits conjured by the ancient witchcraft of the women themselves. Both a riveting mystery and a poignant examination of women's oppression, *Confession of the Lioness* explores the confrontation between the modern world and ancient traditions to produce an atmospheric, gripping novel.

Confessions - Jean-Jacques Rousseau 2015-04-01
Rousseau's ideas have influenced almost every major political development of the last two hundred years, and are crucial to an understanding of phenomena as diverse as the French Revolution, modern educational theory, and the contemporary environmental movement. This is reason enough to

draw attention to his startlingly alive autobiography. But the Confessions is also among the greatest self-portraits in world literature -which suggests, even more than the impact of Rousseau's thought, the extent to which the very high opinion he had of himself was ultimately justified.
