Ditch That Textbook - Matt

Miller 2015-04-13

Textbooks are symbols of

centuries-old education. They're

often outdated as soon as they

hit students' desks. Acting "by

the textbook" implies

compliance and a lack of

creativity. It's time to ditch those

textbooks--and those textbook

assumptions about learning In

Ditch That Textbook, teacher

and blogger Matt Miller

encourages educators to throw

out meaningless, pedestrian

teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Educational Research - L R Gay
2015-10-08

A leader in Introduction to Educational Research courses, *Educational Research: Competencies for Analysis and Applications*, ninth edition, remains a practical text focused on the skills and procedures students need in order to become competent consumers

and producers of educational research. The accessible writing style and light, humorous tone of this book helps to demystify and enliven this demanding course. The text uses a direct, step-by-step approach to the research process. Tasks are included throughout the text to guide students through the process of creating their own research report. Published research articles are now included in every research methods chapter to provide students with illustrations of exemplary qualitative and quantitative research. Key changes in the ninth edition include an expanded coverage of qualitative research through a

new chapter on Case Study Research (Chapter 17), a new chapter on Survey Research (Chapter 7), an increased emphasis on ethical considerations in the conduct of educational research (Chapter 1), and significant updates to Descriptive Statistics (Chapter 12) and Inferential Statistics (Chapter 13) that increase the coverage of how to use technology in the research process."

The Absolutely True Diary of a

Part-Time Indian - Sherman

Alexie 2012-01-10

Bestselling author Sherman

Alexie tells the story of Junior, a

budding cartoonist growing up

on the Spokane Indian

Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot.

Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live.

With a forward by Markus Zusak, interviews with Sherman

Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

Principles and Practice in Second Language Acquisition - Stephen D. Krashen 1982

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have.

The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods,

or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

Concepts of Biology - Samantha Fowler 2018-01-07

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the

necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday

applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Literature in the Making - Nancy Glazener 2016

Using the US as a case study, this study examines the public life of literature between the late 18th and the early 20th centuries, bringing together the development of literature's intellectual infrastructure, its operation in print culture, its changing status in higher education, and the surprisingly rich and interesting history of public literary culture.
