Camelot and Canada - Asa McKercher

2016-06-20

In 1958 Senator John F. Kennedy of
Massachusetts proclaimed at the University

of New Brunswick that "Canada and the
United States have carefully maintained the
good fences that help make them good
neighbours." He could not have foreseen
that his presidency would be marked not
just by some of the tensest moments of the

Cold War but also by the most contentious moments in the Canadian-American relationship. Indeed, the 1963 Canadian federal election was marked by charges that the US government had engineered a plot to oust John Diefenbaker, Canada's nationalist prime minister. *Camelot and Canada* explores political, economic, and military elements in Canada-US relations in the early 1960s. Asa McKercher challenges the prevailing view that US foreign policymakers, including President Kennedy, were imperious in their conduct toward Canada. Rather, he shows that the period continued to be marked by the special diplomatic relationship that characterized the early postwar years. Even as Diefenbaker's government pursued distinct foreign and economic policies, American officials acknowledged that Canadian objectives legitimately differed from their own and adjusted their policies accordingly.

Moreover, for all its bluster, Ottawa rarely moved without weighing the impact that its initiatives might have on Washington. At the same time, McKercher illustrates that there were significant strains on the bilateral relationship, which occurred as a result of mounting doubts in Canada about US leadership in the Cold War, growing Canadian nationalism, and Canadian concern over their country's close economic, military, and cultural ties with the United States. While personal clashes between the two leaders have become mythologized by historians and the public alike, the special relationship between their governments continued to function.

Public Health Communication Interventions
- Nurit Guttman 2000-04-15

The ethical dimensions of health communicators' interventions and campaigns are brought into question in this thought-provoking book. Examining the efforts to effect behavior change, the author questions how far health communication can and should go in changing people's values. The author broadens the current analysis of interventions and presents conceptual frameworks that help identify values and justifications that are embedded in health communication goals, strategies, and evaluation criteria. This critical approach helps explain how and why choices are made in design and implementation, and provides constructs and frameworks to examine them. It also widens the criteria for program evaluation and policymaking, and provides practitioners, planners, policy-makers, researchers, and students with practice-oriented questions.

Identity in Organizations - Paul C. Godfrey 1998-07-21

How do people identify with organizations? What role does organizational identity play in organizational strategy? Identity in Organizations investigates the fundamental character of organizational identity and individual identification with an organization. Through the use of an unconventional, conversational format the reader is drawn into a provocative

discussion among key organizational scholars that focuses on three different paradigmatic views of identity: a functionalist perspective, an interpretive perspective, and a postmodern perspective. Similarities and distinctions among these ways of understanding are explored and numerous theoretical and practical insights are gained. This groundbreaking book concludes with a discussion of the relevance of identity as a construct in organizational study and observations on conversation and theory building. Many well-known scholars participate in the conversation, including Jay Barney, Denny Gioia, Mary Jo Hatch, Stuart Albert, Anne Huff, Judi McLean Parks, and Rod Kramer. Identity in Organizations will be of interest to professionals and students of organizational studies, human resource management, industrial psychology, sociology of work, psychology, and

organizational communication.
