**Intelligent Autonomous Robotics - Peter Settles**  
2022-05-31

Robotics technology has recently advanced to the point of being widely accessible for relatively low-budget research, as well as for graduate, undergraduate, and even secondary and primary school education. This lecture provides an example of how to productively use a cutting-edge advanced robotics platform for education and research by providing a detailed case study with the Sony AIBO robot, a vision-based legged robot. The case study used for this lecture is the UT Austin Villa RoboCup Four-Legged Team. This lecture describes both the development process and the technical details of its end result. The main contributions of this lecture are (i) a roadmap for new classes and research groups interested in intelligent autonomous

robotics who are starting from scratch with a new robot, and (ii) documentation of the algorithms behind our own approach on the AIBOs with the goal of making them accessible for use on other vision-based and/or legged robot platforms.

May the Best Man Win -

P. McDevitt 2004-04-16

As Britain's great power status came to be increasingly challenged in the decades before the First World War, one by-product of the resultant uncertainty was the weakening of the Victorian, middle-class consensus of what constituted ideal manhood. Britain's empire was not only the source of wealth and power, but it simultaneously provided alternative models of masculinity and nationhood.

Consequently, the empire and the commonwealth played an important role in defining imperial gender relations in both Britain and in the colonies and dominions.

May the Best Man Win investigates the continual re-assessment and reassertion of various masculine ideals associated with sport in the British empire between 1880 and 1935.

*Money Grab \$\$* - Timmy Knowstoomuch 2022-08-16

What has happened to and in American youth soccer over the past fifty years? I will take you on a stroll down memory lane, sharing some of my fondest memories and others I would like to forget; but cannot. Soccer in America has become "All about the money." Some have forgotten it really is, and needs to always be "All about the players" and to develop their lifelong love of and passion for the sport. Parents are willing to pay "whatever the market will bear" as the club and/or coaches charge ever increasing to astronomical fees with

the hope to have their child will succeed in obtaining the holy grail of a college soccer scholarship and not let their child fall behind their peers. The problem is that many parents have no idea what is actually going on in America's youth soccer today, what they may soon face, or how to best navigate any of it. The hashtag I use to describe this is #youcantmakethissoccerstuffup. Money Grab \$\$—A Parents' Guide to American Youth Soccer is an insider's view of the actual soccer player developmental life cycle beginning with recreational FUN then to the drama, pain points, best practice actions and costs of competitive soccer. From just starting in the sport through your player's developmental life cycle, we will share what it takes to enjoy,

survive, and possibly even make a professional soccer team and then stay at that level. Having been involved for so long, I have heard this same parents' cry for help and understanding repeatedly, especially in the past few years. Parents who always want to do the best for their player but don't have a clue, or for those who thought they had the clue, only to find out otherwise, need guidance and insight into what is going on. It will be invaluable and settling to understand in advance the decisions parents may face so that they may make the correct ones given the information available or to obtain what is needed to make and intelligent, data-driven decision, what to look for in a coach and, when to run. It will also identify many of the current and

potential methods for a variety of folks to take parent's hard-earned money out of their wallets providing little to nothing in return, also known as "Money Grab."
