Rare and Precious Things - Raine Miller 2014-02-28
Some love is rare... All love is precious... The fourth part in the New York Times bestselling Blackstone Affair series brings the continuing story of Ethan and Brynne, two damaged souls fighting for a hard-won love, and now the promise of a new hope to secure their happily ever after. Fresh from an idyllic honeymoon along the Italian coast, the Blackstones prepare for the birth of their precious baby while facing the challenges of settling into a new home and married life. But when specters from the past resurface, so do their lingering doubts. Fears about those things they struggle to understand about each other, threaten the very foundation of their relationship. The story of two souls who both need the other in order to be complete... A husband and a wife who learn just how rare their love truly is when faced with losing it... Two lovers who will have to lay bare their darkest fears so that they may find peace... Ethan and Brynne are fighting harder than ever for each other in... Rare and Precious Things. "I need you like I need air to breathe. You are my air, Brynne." -Ethan Blackstone

Organic Chemistry with Biological Topics - Janice Gorzynski Smith, Dr. 2017-02-08
Smith and Vollmer-Snarr's Organic Chemistry with Biological Topics continues to breathe new life into the organic chemistry world. This new fifth edition retains its popular delivery of organic chemistry content in a student-friendly format. Janice Smith and Heidi Vollmer-Snarr draw on their extensive teaching background to deliver organic chemistry in a way in which students learn: with limited use of text paragraphs, and through concisely written bulleted lists and highly detailed, well-labeled "teaching" illustrations. The fifth edition features a modernized look with updated chemical structures throughout. Because of the close relationship between chemistry and many biological phenomena, Organic

Chemistry with Biological Topics presents an approach to traditional organic chemistry that incorporates the discussion of biological applications that are understood using the fundamentals of organic chemistry. See the New to Organic Chemistry with Biological Topics section for detailed content changes. Don't make your text decision without seeing Organic Chemistry, 5th edition by Janice Gorzynski Smith and Heidi Vollmer-Snarr!

The Art Forger's Handbook - Eric Hebborn 1997
The English artist Eric Hebborn (1934-1996) explains the secrets of his forging techniques in this illustrated work compiled shortly before his death. Drawings previously attributed to artists such as Picasso and Corot were in fact the work of Hebborn and this work provides an insight through explanations of his work. Inks, papers, pigments, monograms and signatures are all explained as well as Hebborn's own often outrageous speculations about the nature of art and value.

Ideas That Shaped Buildings - M. Fil Hearn 2003-10-10

Identifying the operative ideas in architectural theory from ancient Rome to the present and codifying them into coherent theoretical systems; for students, practitioners, and the general reader. In Ideas That Shaped Buildings, Fil Hearn identifies and codifies into theoretical systems the operative tenets of architectural theory from ancient Rome to the present. With this strikingly original synthesis of architectural history and theory, he constructs an intellectual armature on which virtually any architectural concept, past or present, can be positioned. Dealing mainly with the treatises that have been highly influential historically, he organizes their concepts thematically and analyzes their development through time. Straightforward and concise, Ideas That Shaped Buildings is readily accessible to architecture students,

practicing architects, and the general public—indeed anyone interested in understanding the design rationale of buildings. Its overarching message is that, far from being constricting, proper knowledge and application of architectural theory is enabling and inspiring, and makes creative freedom possible by providing the conceptual awareness needed to devise a design. After an introductory history of the development of architectural theory, the text is divided into four parts. The first deals with issues relevant to all theories of architecture. The second, treating theory from antiquity to 1800, focuses on the prescriptive conventions inherent in the classical tradition. The third, treating theory after 1800, focuses on the inspirational principles prompted by rationalist perceptions of the Gothic tradition. The fourth, treating theory since 1965, deals with rationales beyond rationalism and the influence of computers on design method and design formulation. The concepts discussed are illustrated with theoretical drawings and images of actual buildings.

Dionysius the Areopagite on the Divine Names and the

Mystical Theology - Clarence E. Rolt 2007-10-01
First published in 1920, this book is a translation—the only known work of British scholar CLARENCE EDWIN ROLT (1880-1917)—of *On the Divine Names and The Mystical Theology*, by Dionysius the Areopagite, a first-century bishop of Athens. The author is often also referred to as "pseudo-Dionysius" because a variety of anachronisms suggest that the manuscript was actually written much later by an unknown writer. Despite the book's unclear origins, the writings are still greatly valued for their theological insight. Saint Thomas Aquinas often quoted from pseudo-Dionysius, as did many other famous and influential theologians and philosophers. Pseudo-Dionysius deals, here, with the Supra-Personality of God. Personality, by definition, is a quality limited to an individual. God, on the other hand, is the opposite of an individual. God is in all things, so one cannot speak of a personality for the divine. Rather, pseudo-Dionysius proposes a Supra-Personality, which describes aspects and qualities of the universal being. Religious scholars and Christians wanting a different understanding of the relationship between God and the universe will find this a challenging but ultimately thought-provoking study.
