linked together. On the basis of an extensive analysis of students' writing, the author provides a classification of the most common structural mistakes and ambiguities which result from an inadequate grasp of how the elements of a sentence fit together. The source of each type of error is explained and extensive and varied exercise material on the problem areas is provided. The sentences used in the text are authentic examples taken from textbooks and newspapers or from the written work of students themselves. This handbook will be useful not only for non-native-speaking learners but also for native-speaking students and teachers of English, who will find it a helpful starting text on syntax at sentence level. Since answers to the exercises are

provided, the book may be used both in the classroom and for self-study purposes.

English Sentences -
Faisal Al-Mohanna
2020-08-19

This is a book on the basics of English sentences. It contains five chapters, each of

which comprises a number of sections with related exercises and exercise answers. The focus throughout is on sentences, their functions, structures, and some of the most common errors in sentence grammar and punctuation. The first two chapters, however, introduce parts of speech (word classes) and multi-word structures, viz. phrases, clauses, and sentences. Each chapter focuses on a specific area, presenting the topics in detail and offering as many and as diverse examples as required. Topics are followed by exercises that mainly require written answers in sentence form, keeping to the minimum questions that involve Multiple choice, True-False or Fill-in blanks. Books on English grammar are available for readers

and learners with different backgrounds and varying levels of English language proficiency. This book does not aim to provide a textbook/exercise book that is entirely unique in its content and/or capacity. Simply, it is an attempt to focus on the specifics of the sentence in the English language, mainly targeting learners at an intermediate or advanced level who might be embarking on an English language writing course. In addition, the work could be considered as a concise and easily accessible reference (or manual) on the basics of English sentences, for teachers and students alike. More precisely, the book aims to provide a foundation that helps learners who want to be perceived as competent in producing well-formed grammatical sentences, analysing the

grammatical structure of sentences, interpreting mainstream grammatical terminology, and recognising common sentence errors.

Analysing Sentences -
Noel Burton-Roberts
2013-10-31

This highly successful text has long been considered a standard introduction to the practical analysis of English sentence structure. As in previous editions, key concepts such as constituency, category and function are

carefully explained as they are introduced. Tree diagrams are used throughout to help the reader visualise the hierarchical structure of sentences. The final chapter sets the analysis in the context of generative grammar. In this third edition, *Analysing Sentences* has been thoroughly revised. It has an attractive new layout, more examples, clearer explanations and summaries of major points. A major change concerns the analysis of auxiliary verbs, which has been revised to bring it more in line with current thinking. Clear development from chapter to chapter, together with the author's accessible style, make this book suitable for readers with no previous experience of sentence analysis. A practical and reader-friendly text, it includes many

in-text exercises and end-of-chapter exercises, all with answers, and Further Exercises, making it suitable for self-directed study as well as for taught courses. Noel Burton-Roberts is Professor of English Language and Linguistics at Newcastle University. He is the author of *The Limits to Debate: a Revised Theory of Semantic Presupposition* (CUP 1989), the editor of *Phonological Knowledge: Conceptual and Empirical Issues* (OUP 2000) and *Pragmatics* (Palgrave, 2007), and the author of numerous articles on various aspects of linguistics and the English language.
