**Clean Fuel Fleet Program - 1999**

The Clean Fuel Fleet Program is one of several measures

required to improve air quality in the Chicago ozone nonattainment area (Cook, DuPage, Kane, Lake, McHenry and Will Counties, Owego Township in Kendall County and Aux Sable and Goose Lake Townships in Grundy County).

### **Common Object Services**

**Specification - Object Management Group 1994-06-27**

A complete account of three fundamental services--naming, event notification, life cycle--that are critical for realizing and maintaining objects within a distributed computing environment. Describes the general design principles that apply to these services including service dependencies,

their relationships to the common object request broker (CORBA), the OMG Object Model and standards conformance. Also discusses the unique design principles employed by each service.

The Wal-Mart Effect - Charles Fishman 2006

An award-winning journalist breaks through the wall of secrecy to reveal how the world's most powerful company really works and how it is transforming the American economy.

**Capitalism and Antislavery** - Seymour Drescher 1987

The age of British abolitionism came into consolidated strength in 1787-88 with the first mass

campaign against the slave trade and ended just half a century later in 1838 with a mass petition movement against Negro Apprenticeship. Drescher focuses on this critical fifty-year period, when the people of the Empire effectively pressured and eventually altered national policy. Presenting a major reassessment of the roots, nature, and significance of Britain's successful struggle against slavery, he illuminates a novel turn in the history of antislavery, when for the first time, the most effective agents in the abolition process were non-slave masses, including working men and women. This not only set Britain off from

ancient Rome, medieval western Europe, and early modern Russia, but, in scale and duration, it distinguished Britain from its 19th-century continental European counterparts as well. Viewing British abolitionism against the backdrop of larger national and international events, this provocative study challenges readers to look anew at the politics of slavery and social change in a prominent era of British history.

Paul Kossoff: All Right Now - J.

P. James 2017-11-02

Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad

and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to

make them sing are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and

packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

**Ciarcia's Circuit Cellar** - Steve Ciarcia 1985

**Achtung-Panzer!** - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the

result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background

notes by the modern English historian Paul Harris.

### **Immunology of Milk and the Neonate - Jiri Mestecky**

2012-12-06

In the course of history, humans have attempted to interrupt the physiological and psychological bond formed between a nursing mother and her child by substituting breastfeeding with artificial formulas. A growing body of evidence indicates that breast milk, quite apart from its unsurpassed nutritive value, contains a large number of substances that protect the offspring from common infectious agents and allergens and promote the maturation of the gastrointestinal tract and the

immune system. In addition to well described milk antibodies and soluble mediators of innate immunity, milk cells and pluripotent secreted factors - cytokines - are currently in the forefront of extensive research with respect to their importance in milk immunology. The purpose of this conference was to critically evaluate the current state of our knowledge concerning the protective role of immune agents found in milk, to provide up-to-date information of milk factors with respect to their role in the maturation of immunological defense systems in the neonate, and to reassess the importance of breastfeeding in the prevention of allergies in

formula-fed infants. We hope that the work presented by international participants will prompt many new ideas and stimulate further research in this important area. This conference was sponsored primarily by the National Institute of Child Health and Human Development, National Institutes of Health, Bethesda, MD. We would like to thank Drs. Sumner Yaffe and Delbert Dayton for their efforts with the organization, planning, and support of this conference.

*The Pregnant Man* - Roberto Zapperi 1991

This book is a most exciting and unusual study of cultural history. The idea of the pregnant man, redolent of

bawdy jokes and sexual fantasy, has inspired European literature and folklore since ancient times. Traces of the theme, both comical and disturbing, are found not only in the wealth of tales from Italy, France, Germany, Russia, Finland and other European Countries, but also in the Hebrew and Islamic traditions.

The Ischemic Heart - Seibu Mochizuki 1998-07-31

Over the past three decades, impressive progress in the field of pathogenesis, prevention and therapy of ischemic heart disease has resulted in a marked decline in mortality in the Western World. However, the incidence of this devastating

disease is on the rise in developing countries. The Ischemic Heart is based upon a recent symposium in Tokyo on the subject. This volume is organized into two sections: (i) Pathophysiologic Mechanisms of Ischemia-Reperfusion Injury and (ii) Preconditioning and Protection of Ischemia-Reperfusion Injury, and contains up-to-date information concerning the current concepts of ischemia-reperfusion injury, the sequence of events resulting in the loss of contractile dysfunction, and mechanisms of cardioprotection by several drugs as well as the role of ischemic preconditioning in attenuating problems

associated with ischemia-reperfusion injury.

*Computer Architecture* - John Y. Hsu 2017-12-19

With the new developments in computer architecture, fairly recent publications can quickly become outdated. *Computer Architecture: Software Aspects, Coding, and Hardware* takes a modern approach. This comprehensive, practical text provides that critical understanding of a central processor by clearly detailing fundamentals, and cutting edge design features. With its balanced software/hardware perspective and its description of Pentium processors, the book allows readers to acquire

practical PC software experience. The text presents a foundation-level set of ideas, design concepts, and applications that fully meet the requirements of computer organization and architecture courses. The book features a "bottom up" computer design approach, based upon the author's thirty years experience in both academe and industry. By combining computer engineering with electrical engineering, the author describes how logic circuits are designed in a CPU. The extensive coverage of a micromprogrammed CPU and new processor design features gives the insight of current computer

development. Computer Architecture: Software Aspects, Coding, and Hardware presents a comprehensive review of the subject, from beginner to advanced levels. Topics include:

- o Two's complement numbers
- o Integer overflow
- o Exponent overflow and underflow
- o Looping
- o Addressing modes
- o Indexing
- o Subroutine linking
- o I/O structures
- o Memory mapped I/O
- o Cycle stealing
- o Interrupts
- o Multitasking
- o Microprogrammed CPU

*Digital Transformation and  
Innovation in Tourism Events* -

Azizul Hassan 2022-06-16

The pandemic has accelerated  
the digital transformation in  
tourism and there has been a  
surge in new, innovative digital  
initiatives to help tourism  
businesses. This book provides  
a comprehensive treatment of  
the nature of tourism, events  
and practices in the digital  
context. The book looks at how  
technology has transformed  
tourism in destination branding,  
marketing, content marketing,  
sustainable tourism  
development and tourism  
events. It examines the impact  
of digital transformation on  
emotions, experiences,  
information technology tools  
and marketing techniques. The

book will be a useful reference to those researching on tourism, culture, hospitality and marketing and as well as destination planners, managers of tourism destination marketing organizations, regulators, standards and certification bodies, local tourism board authorities and policy makers.

The Numinous Legacy - Adair Butchins 2002

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how

the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor

Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the Swoon - Naomi Booth  
2021-11-30

Swoon is the first extensive study of literary swooning, homing in on swooning's rich history as well as its potential to provide new insights into the contemporary. This study demonstrates that passing-out has had a pivotal place in English literature. Beginning with an introduction to the swoon as a marker of aesthetic sensitivity, it includes chapters on swooning and generic

transformation in Chaucer and Shakespeare; morbid, femininised swoons and excessive affect in romantic, gothic, and modernist works; irony, cliché and bathos in the swoons of contemporary romance fiction. This book revisits key texts to show that passing-out has been intimately connected to explorations of emotionality, ecstasy and transformation; to depictions of sickness and dying; and to performances of gender and gendering. Swoon offers an exciting new approach the history of the body alongside the history of literary response.

Even More Parts - Tedd Arnold  
2004-09-02

Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular

Parts and More Parts.

The Tagibi Prophecy - Miah

Ferraro 2016-05-23

"Our feet are not the only feet to have stepped upon these ancient lands;our Gods are not the only Gods to have stood upon high and drink their fill of mortal blood. Generations have come and gone upon the face of these hills. Your ancestors, our ancestors - once walked here. If you take the time to listen carefully,upon the winds you can still hear their song..." - Maconeen Akobi After tragic and horrific circumstances, the young tribesman, Theo Tagibi, is left with no choice but to traverse through and endless expanse of wilderness in search

of answers. The Tagibi

**Income and Democracy** - Anke

Hoeffler 2012-12-17

We revisit Lipset's law, which

posits a positive and significant

relationship between income

and democracy. Using dynamic

and heterogeneous panel data

estimation techniques, we find a

significant and negative

relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

*MMIXware* - Donald E. Knuth  
2003-06-26

MMIX is a RISC computer designed by Don Knuth to illustrate machine-level aspects of programming. In the author's book series "The Art of Computer Programming", MMIX replaces the 1960s-style machine MIX. A particular goal in the design of MMIX was to

keep its machine language simple, elegant, and easy to learn. At the same time, all of the complexities needed to achieve high performance in practice are taken into account. This book constitutes a collection of programs written in CWEB that make MMIX a virtual reality. Among other utilities, an assembler converting MMIX symbolic files to MMIX objects and two simulators executing the programs in given object files are provided. The latest version of all programs can be downloaded from MMIX's home page. The book provides a complete documentation of the MMIX computer and its

assembly language. It also presents mini-indexes, which make the programs much easier to understand. A corrected reprint of the book has been published in August 2014, replacing the version of 1999.
