**Harlem Is Nowhere** - Sharifa Rhodes-Pitts 2011-01-01  
A National Book Critics Circle Award Finalist and New York Times Notable Book of the Year, *Harlem Is Nowhere* brilliantly captures the essence of Harlem at a crucial moment in the neighborhood's history. For a century Harlem has been celebrated as the capital of black America, a thriving center of cultural achievement and political action. As gentrification encroaches, Sharifa Rhodes-Pitts untangles the myth and meaning of Harlem's legacy. Examining the epic Harlem of official history and the personal Harlem that begins at her front door, Rhodes-Pitts introduces us to a wide variety of characters, past and present. At the heart of their stories, and her own, is the hope carried over many generations, hope that Harlem would be the ground from which blacks fully entered America's democracy. Rhodes-Pitts is a brilliant new voice who, like other

significant chroniclers of places -- Joan Didion on California, or Jamaica Kincaid on Antigua -- captures the very essence of her subject. "No geographic or racial qualification guarantees a writer her subject . . . Only interest, knowledge, and love will do that -- all of which this book displays in abundance." -- Zadie Smith, Harper's

This seminal textbook provides a critical review and analysis of the key components of leadership-and its limits. Against a historical backdrop, the text explores the foundations of successful and unsuccessful leadership, the relationship between the leaders and subordinates and the role leaders play in the dynamics of organisational life. Taking four key approaches, Leadership as Results, as Process, as Position and as Identity, the author analyses the theoretical source of each alternative and then provides a wide range of illustrative case studies to support his points. **Statistical Consequences of Fat Tails** - Nassim Nicholas Taleb 2020-06-30  
The book investigates the misapplication of conventional statistical techniques to fat tailed distributions and looks for remedies, when possible. Switching from thin tailed to fat tailed distributions requires more than "changing the color of the dress." Traditional asymptotics deal mainly with either  $n=1$  or  $n=\infty$ , and the real world is in between, under the "laws of the medium numbers"-which vary widely across specific distributions. Both the law of large numbers and the

generalized central limit mechanisms operate in highly idiosyncratic ways outside the standard Gaussian or Levy-Stable basins of convergence. A few examples: - The sample mean is rarely in line with the population mean, with effect on "naïve empiricism," but can be sometimes be estimated via parametric methods. - The "empirical distribution" is rarely empirical. - Parameter uncertainty has compounding effects on statistical metrics. - Dimension reduction (principal components) fails. - Inequality estimators (Gini or quantile contributions) are not additive and produce wrong results. - Many "biases" found in psychology become entirely rational under more sophisticated probability distributions. - Most of the failures of financial economics, econometrics, and behavioral economics can be attributed to using the wrong distributions. This book, the first volume of the Technical Incerto, weaves a narrative around published journal articles.

A Vocabulary, Persian, Arabic, and English - John Richardson 1810

**McMindfulness** - Ronald Purser 2019-07-09

A lively and razor-sharp critique of mindfulness as it has been enthusiastically co-opted by corporations, public schools, and the US military. Mindfulness is now all the rage. From celebrity endorsements to monks, neuroscientists and meditation coaches rubbing shoulders with CEOs at the World Economic Forum in Davos, it is clear that mindfulness has gone mainstream. Some have even called it a revolution. But what if, instead of changing the world, mindfulness has become a banal form of capitalist spirituality that mindlessly avoids social and political transformation, reinforcing the neoliberal status quo? In *McMindfulness*, Ronald Purser debunks the so-called "mindfulness revolution," exposing how corporations, schools, governments and the military have co-opted it as technique for social control and self-pacification. A lively and razor-sharp critique, Purser busts the myths its salesmen rely on, challenging the narrative that stress is self-imposed and mindfulness is

the cure-all. If we are to harness the truly revolutionary potential of mindfulness, we have to cast off its neoliberal shackles, liberating mindfulness for a collective awakening.

**The Digital Humanities and Literary Studies** - Martin Paul Eve 2022

A comprehensive overview into digital literary studies that equips readers to navigate the difficult contentions in this space. The *Literary Agenda* is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of 'the literary' has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a

way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. You may have heard of the digital humanities--and what you may have heard may not have been good. Yet like an oncoming storm, the relentless growth of the use of digital methods for the study of literature seems inevitable. This book gives an insight into the ways in which digital approaches can be used to study literature and the ways in which humanistic study can be used to explore digital literature. Examining its subject across the axes of authorship, space, and visualization, maps and place, distance and history, and ethical approaches to the digital humanities, this book introduces newcomers to the topic while also offering plenty for seasoned digital humanities pros. Combining original research with third-party case studies and examples, this book will appeal both to students and researchers across all levels who wish to learn about digital literary studies.

*Quantum State Estimation* - Matteo Paris 2004-08-11  
This book is a comprehensive survey of most of the theoretical and experimental achievements in the field of quantum estimation of states and operations. Albeit still quite young, this field has already been recognized as a necessary tool for research in quantum optics and quantum information, beyond being a fascinating subject in its own right since it touches

upon the conceptual foundations of quantum mechanics. The book consists of twelve extensive lectures that are essentially self-contained and modular, allowing combination of various chapters as a basis for advanced courses and seminars on theoretical or experimental aspects. The last two chapters, for instance, form a self-contained exposition on quantum discrimination problems. The book will benefit graduate students and newcomers to the field as a high-level but accessible textbook, lecturers in search for advanced course material and researchers wishing to consult a modern and authoritative source of reference.

*The Cameron-Clegg Coalition and Britain's Role in the*

*World* - Timothy J. Oliver 2021-09-15

This is the first in-depth study of the foreign and defence policies of the Coalition, a government that saw the Conservatives restored to power for the first time since the Iraq War and the Liberal Democrats enter government for the first time. It explores the idea of Britain as a 'Great Power' since 1945 to show how the Coalition's policies fitted into wider historical understandings of Britain's role in the world. Drawing on a range of evidence from the time of the Coalition, it shows that this period was one of continued change in British foreign policy. The Coalition conducted the first strategic defence review since 1998, significantly reduced the funding allocations for defence and foreign affairs, raised overseas aid spending to record levels, engaged in overseas military action in two sovereign states (and were denied a chance to participate in another), as well as a wide array of other policies. This book argues that evaluating these events and the historical background of the Coalition is critical to understanding the current crises gripping British politics.

**The Historiographic Metafictionality of Toni Morrison's Trilogy** - Issam El Masmodi 2021-08-30

Master's Thesis from the year 2021 in the subject American Studies - Literature, grade: 16, Sultan Moulay Sliman University, language: English, abstract: The aim of the following dissertation is to prove the postmodernity of Morrison's work. It is an attempt to underline the postmodern implications of Morrison's trilogy including "Beloved" (1987), "Jazz" (1992), and "Paradise" (1998). This is why; the following research finds it useful to rely on Linda Hutcheon's seminal work of "A Poetics of Postmodernism" (1988) as a guiding thread in the study of Morrison's trilogy. The originality of the following dissertation lies in the fact that Hutcheon's guiding theoretical work has come into being before the writing of Morrison's trilogy, precisely one year after the publication of Morrison's first novel of the trilogy that is Beloved. The present dissertation is an academic attack on the critics who exclude Morrison while discussing novels under the category of postmodern fiction. Morrison is usually approached from different theoretical frameworks, mainly black feminism, narratology, critical race theory, psychoanalysis and so on. However, the postmodern post-colonial Morrison has always been doomed to neglect. Hutcheon's notion of historiographic metafiction is an umbrella term that describes Morrison's postmodernity. The main aim of the dissertation is to simplify and thus breaks Hutcheon's theoretical work into three main chapters namely subjectivity, palimpsests and magic realism with their implication in Morrison's trilogy. The dissertation is supposed to be made up of four

chapters. However, for some academic reasons, it was necessary to omit the first chapter, which is dedicated to Morrison's use of metafiction. Therefore, the reader will find out that the dissertation rely heavily on the historiographic dimension of Hutcheon's A Poetics of Postmodernism while neglecting its self-reflexive aspect. Nevertheless, the reader can find some implications of metafiction in the introduction. At last but not least, the last chapter of magic realism is an attempt to supply the limitations of Hutcheon's seminal work on postmodern fiction by arguing that magic realism is part and parcel of Morrison's trilogy and thus of historiographic metafiction.
