Cross-linguistic Aspects of Processability Theory - Manfred

Pienemann 2005-01-01

Seven years ago Manfred Pienemann proposed a novel psycholinguistic theory of language development, Processability Theory (PT). This volume examines the typological plausibility of PT. Focusing on the acquisition of Arabic, Chinese and Japanese the authors demonstrate the capacity of PT to make detailed and verifiable predictions about the developmental schedule for each language. This cross-linguistic perspective is also applied to the study of L1 transfer by comparing the impact of processability and typological proximity. The typological perspective is extended by including a comparison of different types of language acquisition. The architecture of PT is expanded by the addition of a second set of principles that contributes to the formal modeling of levels of processability, namely the mapping of argument-structure onto

functional structure in lexical mapping theory. This step yields the inclusion of a range of additional phenomena in the processability hierarchy thus widening the scope of PT.

Developing Reading Comprehension - Paula J. Clarke 2013-12-04

Developing Reading Comprehension "In recent years the debate about teaching young children to read has tended to focus upon equipping them with the crucially important knowledge and skills they need to read words accurately in and out of context, that is to say, teaching them how the alphabet works for reading and spelling. While such knowledge and skills are essential, more is required for children to become literate, fluent readers who

understand what they read. In short, the goal of reading is comprehension. This book scrupulously examines the obstacles to reading comprehension and exemplifies what can be done to help children overcome them. It is an important and timely contribution to securing high-quality teaching of the range of attributes children need to become fully-fledged readers." Sir Jim Rose, CBE "The studies by Professors Charles Hulme and Maggie Snowling and their team over two decades based around the Reading Intervention Programme are the most sustained, comprehensive and rigorous research series on reading yet conducted in the UK. Their increasing focus on children who experience the most difficulty in reading is exactly where attention should be directed. This volume summarises the team's achievements to date, and is most eagerly awaited." Greg Brooks, Emeritus Professor of Education, University of Sheffield, Member of

European High Level Group of Experts on Literacy "Developing Reading Comprehension presents a landmark study from the top research team in the UK on how to improve reading comprehension. It's an exemplary masters-level textbook written with undergraduate-level lucidity and approachability." Colin Harrison, Emeritus Professor of Literacy Studies in Education, University of Nottingham A significant minority of children aged 7-11, despite being able to read fluently and accurately, have difficulty extracting meaning from text. This detailed guide offers three evidence-based intervention programmes, drawn from the cutting edge of educational psychology, for improving the reading skills of children in this group. It includes a definitive introduction to the characteristics of the 'poor comprehender profile', and explains how to monitor and assess students' experiences and learning outcomes.

With invaluable strategies for teachers, psychologists and special educational needs coordinators, the book will help professionals to support learners in their efforts to explore the full richness of language and to read with real understanding.

A devastating but essential read." -Kevin Powers, bestselling author and National Book Award finalist for The Yellow Birds From the rubble-strewn streets of U.S.-occupied Baghdad, Hadi-a scavenger and an oddball fixture at a local café-collects human body parts and stitches them together to create a corpse. His goal, he claims, is for the government to recognize the parts as people and to give them proper burial. But when the corpse goes missing, a wave of eerie murders sweeps the city, and reports stream

in of a horrendous-looking criminal who, though shot, cannot be killed. Hadi soon realizes he's created a monster, one that needs human flesh to survive—first from the guilty, and then from anyone in its path. A prizewinning novel by “Baghdad’s new literary star” (The New York Times), *Frankenstein in Baghdad* captures with white-knuckle horror and black humor the surreal reality of contemporary Iraq.

If we are not native speakers of one of the many varieties of English, then we may be students of English, or use English regularly for academic or business purposes. This book discusses the mechanics of the writing systems of English; the different ways people process words on a page and the mistakes they can make; how children and second language learners acquire these systems; the historical development of the language and the progress of writing technology: in short, the effectiveness of the writing systems of English. Current Trends in the Development and Teaching of the four Language Skills

- Esther Usó-Juan 2006-01-01

Current Trends in the Development and Teaching of the four Language Skills builds connections from theory in the four language skills to instructional practices. It comprises twenty-one chapters that are grouped in five sections. The first section includes an introductory chapter which presents a communicative competence framework developed by the editors in order to highlight the key role the four skills play in language learning and teaching. The next four sections each represent a language skill: Section II is devoted to listening, Section III to speaking, Section IV to reading and Section V to writing.

In order to provide an extensive treatment of each of the four skills, each section starts with a theoretical chapter which briefly illustrates advances in the understanding of how each skill is likely to be learned and taught, followed by four didactically oriented chapters authored by leading international specialists. These pedagogical chapters deal specifically with four key topics: 1) areas of research that influence the teaching of a particular skill; 2) an overview of strategies or techniques necessary for developing a particular skill; 3) an approach to the academic orientation of a particular skill, and 4) unique aspects of teaching each skill. Moreover, all chapters incorporate two common sections: pre-reading questions at the beginning of the chapter in order to stimulate readers' interest in its content, and a section entitled suggested activities at the end of the chapter

in order to allow readers put the ideas and concepts presented into practice. The accessible style and practical focus of the volume make it an ideal tool for teachers, teacher trainers, and teacher trainees who are involved in teaching the four language skills in a second or foreign language context.

Moved by the Sandy Hook Elementary School tragedy, Ferial Pearson wondered if a simple act of kindness could change a life. She thought of the school where she taught and the students she guided every day and wondered, what would happen if we started secretly carrying out small acts of kindness in school? Could a modest act of compassion really change the course of a life? She posed the question to her students. They didn't have the answers but they were willing to find out. So they became the Secret Kindness Agents. They not only

changed the lives of those they met, they changed their own. Their hope, their hearts, and their hunger for happiness will inspire you to change your small corner of the world, in your own way, for the better. Let them show you how they did it, and how you can do the same. This program has been implemented in over 350 schools across the country.
