The Australian Official Journal of Trademarks - 1906

The Present Problem - Sarah Knowles Bolton 1874

Mesopotamia - Klaas R. Veenhof 2008
Der erste Teil bietet eine kritische Gesamtschau unseres Wissens und zugleich eine Einführung in das Studium der altassyrischen Epoche (die ersten beiden Jahrhunderte des 2. Jahrtausends), wie wir sie durch Entdeckungen in Assur und die Keilschriftarchive der altassyrischen Händler kennen, die in der Handelskolonie (genannt Karum) in der Unterstadt des alten Kanesh (moderne Kültepe) in Zentralanatolien lebten. Die ersten Kapitel bestimmen, was "altassyrisch" ist und analysieren die Chronologie und die verfügbaren archäologischen und schriftlichen Quellen. Darauf folgt eine kritische Darstellung der Veröffentlichungen zu den altassyrischen Quellen. Nach einem Abriss der altassyrischen Geschichte folgt ein Überblick zur "anatolischen Situation", der die Städte, lokale Herrscher und die rund vierzig altassyrischen Handelsniederlassungen in Nordmesopotamien und Anatolien behandelt. Ein eigenes Kapitel ist den wichtigen altassyrischen Handelsverträgen gewidmet. Der zweite Teil fasst die jüngsten Erkenntnisse zur Geschichte Nordsyriens zeitgleich mit der

späten Phase des altassyrischen Handels zusammen. Der ausführlichen Untersuchung der Quellen ist ein Appendix der wichtigsten Texte beigelegt. Das Buch ist durch umfassende Indices erschlossen und enthält eine ausführliche Bibliographie.

Learning with Information Systems - Simon Bell 2013-02-01

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.
