*Stone in Architecture* - Erhard Winkler 2013-03-14

The readers of the first two editions of *Stone: Properties, Durability in Man's Environment*, were mostly architects, restoration architects of buildings and monuments in natural stone, professionals who sought basic technical information for non-geologists. The increasing awareness of rapidly decaying monuments and their rescue from loss to future generations have urged this writer to update the 1973 and 1975 editions, now unavailable and out of print. Due to the 20-year-long interval, extensive updating was necessary to produce this new book. The present edition concentrates on the natural material stone, as building stone, dimension stone, architectural stone, and decorative field stones.

Recently, the use of stone for thin curtain walls on buildings has become fashionable. The thin slabs exposed to a new, unknown complexity of stresses, resulting in bowing of crystalline marble, has attracted much negative publicity. The costs of replacing white slabs of marble on entire buildings with its legal implications have led construction companies into bankruptcy. We blame many environmental problems on acid rain. Does acid rain really accelerate stone decay that much? Stone preservation is being attempted with an ever-increasing number of chemicals applied by as many specialists to save crumbling stone. Chemists filled this need during a time of temporary job scarcity, while the general geologist missed this opportunity; he was too deeply involved in the search for fossil fuels and metals.

*Strength of Stones* - Greg Bear 2014-04-01

Artificially intelligent cities rise up against humanity in this “excellent novel. It came on me as a surprise, and it knocked me out!” (Harlan Ellison). In a theocratic world far into the future, cities control their own movements and organization. Constantly moving, growing and decaying, taking care of every need their inhabitants might think of, the cities have decided that humans are no longer a necessary part of their architecture, casting them out to wander in the wilderness and eke out a meager subsistence. To the exiled humans, the cities represent a paradisiacal Eden, a reminder of all they cannot attain due to their sinful and unworthy natures. But things are beginning to change. People are no longer willing to allow the cities to keep them out, choosing instead to force an entry and plunder at will. The cities are starting to crumble and die because they have no purpose or reason to continue living without citizens. One woman, called mad by some and wise by others, is the only human allowed to inhabit a city. From her lonely and precarious position at the heart of one of the greatest cities ever, she must decide the fate of the relationship between human society and the ancient strongholds of knowledge, while making one last desperate attempt to save the living cities.

*Adventures in the Stone Age* - Leopold Jaroslav Pospíšil 2021-11-01

When Leopold Pospíšil first arrived in New Guinea in 1954 to investigate

the legal systems of the local tribes, he was warned about the Kapauku who reputedly had no laws. Dubious that any society could exist without laws, Pospíšil immediately decided to live among and study the Kapauku. Learning the language and living as a participant-observer among the Kapauku, Pospíšil discovers that the supposedly primitive society possesses laws, rules, and social structures that are as sophisticated as they are logical. Having survived the Nazi occupation of Czechoslovakia and fled the Communist regime, Pospíšil has little patience for the notion that so-called advanced civilizations are superior to the ‘stone age’ society in which he now lives. On the basis of his research and experiences among the Kapauku – he would stay with them five times between 1954 and 1979 – Pospíšil pioneered in the field of legal anthropology, holding a professorship at Yale, serving as the anthropology curator of the Peabody Museum of Natural History, and publishing three books of scholarship on the Kapauku law. As Jaroslav Jiřík and Martin Soukup write in their afterword, however, “His three previously published works are about the Kapauku; this one is about the anthropologist among the Kapauku.” The memoir is filled with charming anecdotes and thrilling stories of trials, travels, and war – told with humor and humility—and accompanied by a wealth of the author’s personal photos from the time.

*The Stone Face* - William Gardner Smith 2021-07-13

A roman à clef about racism, identity, and bohemian living amidst the tensions and violence of Algerian War-era France, and one of the earliest published accounts of the Paris massacre of 1961. As a teenager, Simeon Brown lost an eye in a racist attack, and this young African American journalist has lived in his native Philadelphia in a state of agonizing tension ever since. After a violent encounter with white sailors, Simeon makes up his mind to move to Paris, known as a safe haven for black artists and intellectuals, and before long he is under the spell of the City of Light, where he can do as he likes and go where he pleases without fear. Through Babe, another black American émigré, he makes new friends, and soon he has fallen in love with a Polish actress who is a concentration camp survivor. At the same time, however, Simeon begins to suspect that Paris is hardly the racial wonderland he imagined: The French government is struggling to suppress the revolution in Algeria, and Algerians are regularly stopped and searched, beaten, and arrested by the French police, while much worse is to come, it will turn out, in response to the protest march of October 1961. Through his friendship with Hossein, an Algerian radical, Simeon realizes that he can no longer remain a passive spectator to French injustice. He must decide where his true loyalties lie.

**The Crack in the Cosmic Egg** - Joseph Chilton Pearce 2002-08-01

The classic work that shaped the thought of a generation with its powerful insights into the true nature of mind and reality. • Defines culture as a "cosmic egg" structured by the mind's drive for logical ordering of its universe. • Provides techniques allowing individuals to break through the vicious circle of logic-based systems to attain expanded ways of creative living and learning. The sum total of our notions of what the world is--and what we perceive its full potential to be--form a shell of rational thought in which we reside. This logical universe creates a vicious circle of reasoning that robs our minds of power and prevents us from reaching our true potential. To step beyond that circle requires a centering and focus that today's society assaults on every level. Through the insights of Teilhard, Tillich, Jung, Jesus, Carlos Castaneda, and others, Joseph Chilton Pearce provides a mode of thinking through which imagination can escape the mundane shell of current construct reality and leap into a new phase of human evolution. This enormously popular New Age classic is finally available again to challenge the assumptions of a new generation of readers and help them develop their potential through new creative modes of thinking. With a masterful synthesis of recent discoveries in physics, biology, and psychology, Pearce reveals the extraordinary relationship of mind and reality and nature's blueprint for a self-transcending humanity.

*Stone House* - 2009

Have you ever dreamed of building or at least living in a beautiful stone house? For more than five years Stonefield Publishing's Stone House: A Guide to Self-Building with Slipforms has been the prime source for information on a unique method of stone masonry that affords everyone, regardless of their level of building experience, the opportunity to create walls and even homes of stone. "The technique has been around for a long time," says author Tomm Stanley, "but it's not that well known. Add to that the mystique that surrounds the traditional craft of stonemasonry and there's no wonder that stone houses are not all that common, even in areas where stone is abundant". The book has now been revised and is being re-released with two new chapters, digital enhancement to the

original images and new photographs. Stonefield Publishing's Marketing Manager Brad Andersen notes, "We've received a lot of great feedback from readers over the years but one consistent issue was the image quality. We took those comments to heart and with technology that wasn't available to us back in 2003 have just brought the photos to life". Tomm says that writing the new chapters and preparing the revised edition for print allowed him to finally complete his original vision of the book. "One of the new chapters, called Reflections, could only have been written after the passage of time. It's about looking back and thinking about what could have been done differently, what worked very well and also speculating on potential targets for future alteration. It really finished the story for me and makes it more complete for readers." Stone House focuses on the story of Tomm Stanley's own experience of building his house with the slipform method. This book is certainly not your average "how-to" offering; it is more like a tapestry of information and entertainment interwoven with technical advice, diagrams and pictures, tales of the owner builder experience and as the title implies, plenty of guidance on how to build your own stone house using the slipform method of construction. It makes great reading for those that are on the way to becoming self-builders as well as the rest of us that dream of such adventures.

*Blood Diamonds* - Greg Campbell 2012-04-03

First discovered in 1930, the diamonds of Sierra Leone have funded one of the most savage rebel campaigns in modern history. These "blood diamonds" are smuggled out of West Africa and sold to legitimate diamond merchants in London, Antwerp, and New York, often with the

complicity of the international diamond industry. Eventually, these very diamonds find their way into the rings and necklaces of brides and spouses the world over. *Blood Diamonds* is the gripping tale of how the diamond smuggling works, how the rebel war has effectively destroyed Sierra Leone and its people, and how the policies of the diamond industry - institutionalized in the 1880s by the De Beers cartel - have allowed it to happen. Award-winning journalist Greg Campbell traces the deadly trail of these diamonds, many of which are brought to the world market by fanatical enemies. These repercussions of diamond smuggling are felt far beyond the borders of the poor and war-ridden country of Sierra Leone, and the consequences of overlooking this African tragedy are both shockingly deadly and unquestionably global. Updated with a new epilogue.

**A Circle of Stones** - Erynn Rowan Laurie 2012-05

*A Circle of Stones*, originally published in 1995, offers a unique approach to meditation and Otherworld journeying in a Celtic Pagan context through the use of prayer beads as a focus for understanding early Gaelic cosmology and ways to journey through its three realms of land, sea, and sky. With chapters on ritual, altars, journeying, and communicating with deities, this short book has provided seekers with tools for their spiritual work for nearly twenty years. This new edition offers a much improved pronunciation guide for the Irish and Scots Gaelic in the text, and a new foreword that offers context for the book's historical place in the emergence of Celtic Reconstructionist Pagan spirituality.
