Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Hark! A Vagrant - Kate Beaton 2020-05-28

Since Kate Beaton appeared on the comics scene in 2007 her cartoons have become fan favourites and gathered an enormous following, appearing in the New Yorker, Harper and the LA Times, to name but a few. Her website, Hark! A Vagrant, receives an average of 1.2 million hits a month, 500 thousand of them unique. Why? Because she's

not just making silly jokes. She's making jokes about everything we learned in school, and more. Praised for their expression, intelligence and comic timing, her cartoons are best known for their wonderfully light touch on historical and literary topics. The jokes are a knowing look at history through a very modern perspective, written for every reader, and are a crusade against anyone with the idea that history is boring. It's pretty hard to argue with that when you're laughing your head off at a comic about Thucydides. They also cover whatever's on her mind that week - be it the perils of city living or the pop-cultural infiltration of Sex and the City, featuring an array of characters, from a mischievous pony, to reinvented superheroes, to a surly teen duo who could be the anti-Hardy-Boys. Perceptive, sharp and wonderfully irreverent, Hark! A Vagrant is as informative as it is hilarious, and a comic collection to treasure.

Biochar for Environmental Management - Johannes Lehmann
2012-05-16

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students,

researchers and professionals in a wide range of disciplines.

In *Generation Hex*, Marla Alupoai and Dillon Burroughs explore the history, culture, and practices of Wicca. As part of their research, they interviewed travelers to historic Salem, Massachusetts, consulted practitioners of leading neopagan conferences in the Pacific Northwest and Canada, and dialogued with several current and former adherents of Wicca and other forms of witchcraft to evaluate the past and present of this growing spiritual tradition. The result is a compelling account that will inform and equip Christians (especially parents) to understand Wiccan and New Age teachings. The Fall of the Philippines - Louis Morton 2004-10

The soldier reading these pages would do well to reflect on the wisdom of the statement exhibited in a Japanese shrine: "Woe unto him who has not tasted defeat."

Victory too often leads to overconfidence and erases the

memory of mistakes. Defeat brings into sharp focus the causes that led to failure and provides a fruitful field of study for those soldiers and laymen who seek in the past lessons for the future. The statesman and the informed citizen reading these pages will realize that our military means as well as our estimates and plans must always be in balance with our long-range national policy. This lesson - signposted by the Battle of Manila Bay; the Treaty of Paris, signed in December 1898 when we decided to keep the Philippines; the Washington Conference of 1921-22; and the Manchurian Crisis of 1931 - we ignored before Pearl Harbor. The result was defeat on the field of battle and the loss of the Philippine Islands. The author of *The Fall of the Philippines*, Louis Morton, served overseas as a historical officer in the South Pacific area and in the Philippines during World War II. Since 1945, he has been chief of the Pacific Section, Office of the Chief of Military History, Department of the Army. He holds a Doctor of Philosophy degree from Duke University, is the author of a volume on American colonial history, and has written a number of articles dealing with military affairs. Work on this volume was begun in 1947. The reader may gain some idea of the size of the task of writing this history by an appraisal of *The Sources*. Orlando Ward Major General, United States Army Chief of Military History
