This report discusses the findings of the three year Interfutures Project which studied the future

development of advanced industrial societies and the relations between these countries and the developing countries. The major emphasis of the project was to analyze economic problems. However, political and social elements were also studied. The purpose of the report is to incite awareness and action. There are five parts and a conclusion to the report. Part I analyzes the political limits to population growth. Part II examines past trends and future dimensions. How the industrial societies cope with change is the topic of Part III. Part IV discusses the advanced industrial societies and the third world. Problems of the third world countries, interdependence between developed and developing nations, and developed countries' strategies in regard to the third world are examined. Part V looks at the growth of world interdependence. Recommendations discussed in the conclusion include the following. Everything must be done to improve the knowledge of other cultures. More travel abroad by young people (especially to developing countries), translation of writing from different cultural areas, and distribution of cinema and television features made or filmed in these areas would help create a greater awareness of the world outside. Third world countries should have improved access to medium and long term loans. International foundations to sponsor third world centers of applied research in different sectors of technology should be set up. (Author/RM)

The Future of International Relations - Iver B. Neumann 2005-06-29

This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers; John Vincent, Kenneth Waltz, Robert O. Keohane, Robert Gilpin, Bertrand Badie, John Ruggie, Hayward Alker, Nicholas G. Onuf, Alexander Wendt, Jean Bethke Elshtain, R.B.J. Walker and James Der Derian. The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others, presenting them as part of a disembodied school of thought or paradigm. A more individual focus can demonstrate instead, the well-rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline. This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with. The essays can be read either as introductions to the work

of these theorists or as companions to it. Each chapter attempts to place the thinker in the landscape of the discipline, to identify how they go about studying International Relations, and to discuss what others can learn from them.

Navigate to Success - Understand the Past, Prepare for the Future, Move Forward - Ginetta V. Hamilton
2018-01-11

Learning and understanding about historical events, places, and often just ordinary people who played a critical role in challenging unjust laws will inspire and empower the readers. The personal stories, timeline of events, as well as the words of wisdom and challenges contained in this book will sound the alert that the struggle for racial equity is not a cause of the past; but that everyone must gain focus, demonstrate perseverance and resilience as we navigate to success and continue to move.

Oakland'S Citywide Poetry Anthology - Barbara Tavres
2010-11-12

POETRY Art is the universal language of the soul. In its truest form it lifts the spirit and consciousness of not only those that create it, but every being that experiences it. For it is this attribute we believe above all others that unites us as one-human family. In our darkest moments it is this light that shines through the artist into the hearts and minds of the world. This anthology is the perfect opportunity for us not to only listen to, but to see life through the eyes of these amazing young poets. And in doing so, we look beyond the challenges of today to the hopes, dreams and answers of tomorrow. We are not defined by the things we possess or the clothes that we wear, but by our imagination of things others cannot see. It pleases us to support Project SOAR, a Federal funded project that encourages students to open their minds and hearts. To imagine and to reach beyond what they know so far, into the world of their hearts where a wonderful future lies. And this project is inspirational as well as practical because it gives students tools to make their dreams come true. For it is this that makes us truly architects of a new dawn.

Emelda King (Oaklander Youth Advocate) It is essential to see creative education taught in our public schools. This poetry anthology gives students the wonderful opportunity to share their deepest feelings and their highest dreams. When we share our insights with others, we build community, which works towards joining, and not separating us as a human race. As the Future Catches You - Juan Enriquez 2005-10-25
If you think the world has changed dramatically in the last five years, you haven't seen anything yet. You will never look at the world in the same way after reading *As the Future Catches You*. Juan Enriquez puts you face to face with unprecedented political, ethical, economic, and financial issues, dramatically demonstrating the cascading impact of the genetic, digital, and knowledge revolutions on all our lives. Genetics will be the dominant language of this century. Those who can "speak it" will acquire direct and deliberate control over all forms of life. But most countries and individuals remain illiterate in what is rapidly becoming the greatest single driver of the global economy. The choice is simple: Either learn to surf new and powerful waves of change—or get crushed trying to stop them. The future is catching us all. Let it catch you with your eyes wide open.
