Dark Archives - Megan Rosenbloom
2021-10-19

On bookshelves around the world, surrounded by ordinary books bound in paper and leather, rest other volumes of a distinctly strange and grisly sort: those bound in human skin. Would you know one if you held it in your hand? In *Dark Archives*, Megan Rosenbloom seeks out the historic and scientific truths behind anthropodermic bibliopegy—the practice of binding books in this most intimate covering. Dozens of such books live on in the world’s most famous libraries and museums. *Dark Archives* exhumes their origins and brings to life the doctors, murderers, and indigents whose lives are sewn together in this disquieting collection. Along the way, Rosenbloom tells the story of how her team of scientists, curators, and librarians test rumored anthropodermic books, untangling the myths around their creation and reckoning with the ethics of their custodianship. A librarian and journalist, Rosenbloom is a member of The Order of the Good Death and a cofounder of their Death Salon, a community that encourages conversations, scholarship, and art about mortality and mourning. In *Dark Archives*—captivating and macabre in all the right ways—she has crafted a narrative that is equal parts detective work, academic intrigue, history, and medical curiosity: a book as rare and thrilling as its subject.

Dark Money - Jane Mayer 2017-01-24
NATIONAL BESTSELLER ONE OF THE NEW

YORK TIMES 10 BEST BOOKS OF THE YEAR
Who are the immensely wealthy right-wing ideologues shaping the fate of America today? From the bestselling author of *The Dark Side*, an electrifying work of investigative journalism that uncovers the agenda of this powerful group. In her new preface, Jane Mayer discusses the results of the most recent election and Donald Trump's victory, and how, despite much discussion to the contrary, this was a huge victory for the billionaires who have been pouring money in the American political system. Why is America living in an age of profound and widening economic inequality? Why have even modest attempts to address climate change been defeated again and again? Why do hedge-fund billionaires pay a far lower tax rate than middle-class workers? In a riveting and indelible feat of reporting, Jane Mayer illuminates the history of an elite cadre of plutocrats—headed by the Kochs, the Scaifes, the Olins, and the Bradleys—who have bankrolled a systematic plan to fundamentally alter the American political system. Mayer traces a byzantine trail of billions of dollars spent by the network, revealing a staggering conglomeration of think tanks, academic institutions, media groups, courthouses, and government allies that have fallen under their sphere of influence. Drawing from hundreds of exclusive interviews, as well as extensive scrutiny of public records, private papers, and court proceedings, Mayer provides vivid portraits of the secretive

figures behind the new American oligarchy and a searing look at the carefully concealed agendas steering the nation. Dark Money is an essential book for anyone who cares about the future of American democracy. A Brief History of the Human Race - M. A. Cook 2003

Why has human history been crowded into the last few thousand years? Why has it happened at all? Could it have happened in a radically different way? What should we make of the disproportionate role of the West in shaping the world we currently live in? This witty, intelligent hopscotch through human history addresses these questions and more. Michael Cook sifts the human career on earth for the most telling nuggets and then uses them to elucidate the whole. From the calendars of Mesoamerica and the temple courtesans of medieval India to the intricacies of marriage among an aboriginal Australian tribe, Cook explains the sometimes eccentric variety in human cultural expression. He guides us from the prehistoric origins of human history across the globe through the increasing unification of the world, first by Muslims and then by European Christians in the modern period, illuminating the contingencies that have governed broad historical change. "A smart, literate survey of human life from paleolithic times until 9/11."—Edward Rothstein, *The New York Times*

Hidden History - Jim Willis 2020-05-01 Investigates and questions the scientific consensus on the origins of civilization Do we, the human species, really know who we are or where we came from or how we originated or our place in the cosmos? Or is much of what we have been taught wrong or misguided or possibly even blatant lies intended to keep people in power and everyone else in line? Exploring alternative theories on the establishment of society and civilization, *Hidden History: Ancient Aliens and the Suppressed Origins of Civilization* looks at a variety of dissenting, suppressed,

and forbidden accounts of history and the origins of humanity. It takes a broad and inclusive survey of historical documents, various theories, and a wide array of perspectives to explore what conventional wisdom might have gotten right and wrong. The book serves as a useful introduction into the suppressed accounts of the origins of modern civilization. It combines cutting-edge science with metaphysical, spiritual, and even paranormal views, daring to ask whether there might be a better explanation for humanity's existence and the origins of civilization than the current scientific consensus. *Hidden History* looks at the multiverse and parallel dimensions, the ancient alien theory, metaphysics, and hypotheses beyond physical perception, the eleven dimensions of string theory, radio telescopes that penetrate to the event horizon of our universe, mathematical equations that take us where no one has gone before, and the world-wide sharing of experiences old and new that speak of long forgotten ancient mythologies that reveal historical truths. With more than 120 photos and graphics, this tome is richly illustrated. Its helpful bibliography provides sources for further exploration, and an extensive index adds to its usefulness. This fascinating book is a thorough investigation and examination of the mysteries surrounding early civilizations, their myths, legends, histories, monuments—and lasting legacies.

The Invisible History of the Human Race - Christine Kenneally 2015-01-29

A *New York Times* Notable Book of 2014 We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In *The Invisible History of the Human Race*, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA,

but also our social history. She breaks down myths of determinism and draws on cutting - edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

The Earth, the City, and the Hidden Narrative of Race - Carl Anthony 2017-10-10

This book by Carl C. Anthony offers a new story about race and place intended to bridge long-standing racial divides. The long-ignored history of African-American contributions to American infrastructure and the modern economic system is placed in the larger context of the birth of the universe and the evolution of humanity in Africa. The author interweaves personal experiences as an architect/planner, environmentalist, and black American with urban history, racial justice, cosmology, and the challenge of healing the environmental and social damage that threatens the future of humankind. Thoughtful writing about race, urban planning, and environmental and social equity is sparked by stories of life as an African American child in post-World War II Philadelphia, a student and civil rights activist in 1960s Harlem, a traveling student of West African architecture and culture, and a pioneering environmental justice advocate in Berkeley and New York. This book will appeal to everyone troubled by racism and searching for solutions, including individuals exploring their identity and activists eager to democratize power and advance equitable policies in historically marginalized communities. This is a rich, insightful encounter with an American urbanist with a uniquely expansive perspective on human origins, who sets forth what he calls an "inclusive vision for a shared planetary future."

The Dirtiest Race in History - Richard Moore 2012-01-01

The men's 100m final at the 1988 Olympics has been described as the dirtiest race ever - but also the greatest. Aside from Johnson's blistering time, the race is infamous for its athletes' positive drug tests. This is the story of that race, the rivalry between Johnson and Lewis, and the repercussions

still felt almost a quarter of a century on.

Race Unmasked - Michael Yudell 2014-09-09

Race, while drawn from the visual cues of human diversity, is an idea with a measurable past, an identifiable present, and an uncertain future. The concept of race has been at the center of both triumphs and tragedies in American history and has had a profound effect on the human experience. *Race Unmasked* revisits the origins of commonly held beliefs about the scientific nature of racial differences, examines the roots of the modern idea of race, and explains why race continues to generate controversy as a tool of classification even in our genomic age. Surveying the work of some of the twentieth century's most notable scientists, *Race Unmasked* reveals how genetics and related biological disciplines formed and preserved ideas of race and, at times, racism. A gripping history of science and scientists, *Race Unmasked* elucidates the limitations of a racial worldview and throws the contours of our current and evolving understanding of human diversity into sharp relief.

The Hidden Spring: A Journey to the Source of Consciousness - Mark Solms 2021-02-16

A revelatory new theory of consciousness that returns emotions to the center of mental life. For Mark Solms, one of the boldest thinkers in contemporary neuroscience, discovering how consciousness comes about has been a lifetime's quest. Scientists consider it the "hard problem" because it seems an impossible task to understand why we feel a subjective sense of self and how it arises in the brain. Venturing into the elementary physics of life, Solms has now arrived at an astonishing answer. In *The Hidden Spring*, he brings forward his discovery in accessible language and graspable analogies. Solms is a frank and fearless guide on an extraordinary voyage from the dawn of neuropsychology and psychoanalysis to the cutting edge of contemporary neuroscience, adhering to the medically provable. But he goes beyond other neuroscientists by

paying close attention to the subjective experiences of hundreds of neurological patients, many of whom he treated, whose uncanny conversations expose much about the brain's obscure reaches. Most importantly, you will be able to recognize the workings of your own mind for what they really are, including every stray thought, pulse of emotion, and shift of attention. The Hidden Spring will profoundly alter your understanding of your own subjective experience.

The Origins of the Urban Crisis - Thomas J. Sugrue 2014-04-27

The reasons behind Detroit's persistent racialized poverty after World War II Once America's "arsenal of democracy," Detroit is now the symbol of the American urban crisis. In this reappraisal of America's racial and economic inequalities, Thomas Sugrue asks why Detroit and other industrial cities have become the sites of persistent racialized poverty. He challenges the conventional wisdom that urban decline is the product of the social programs and racial fissures of the 1960s. Weaving together the history of workplaces, unions, civil rights groups, political organizations, and real estate agencies, Sugrue finds the roots of today's urban poverty in a hidden history of racial violence, discrimination, and deindustrialization that reshaped the American urban landscape after World War II. This Princeton Classics edition includes a new preface by Sugrue, discussing the lasting impact of the postwar transformation on urban America and the chronic issues leading to Detroit's bankruptcy.

The Dawn of Everything - David Graeber 2021-11-09

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike.

Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Hidden History of Burma: Race, Capitalism, and the Crisis of Democracy in the 21st Century - Thant Myint-U
2019-11-12

How did one of the world's "buzzy hotspots" (Fodor's 2013) become one of the top ten places to avoid (Fodor's 2018)? Precariously positioned between China and India,

Burma's population has suffered dictatorship, natural disaster, and the dark legacies of colonial rule. But when decades of military dictatorship finally ended and internationally beloved Nobel laureate Aung San Suu Kyi emerged from long years of house arrest, hopes soared. World leaders such as Barack Obama ushered in waves of international support. Progress seemed inevitable. As historian, former diplomat, and presidential advisor, Thant Myint-U saw the cracks forming. In this insider's diagnosis of a country at a breaking point, he dissects how a singularly predatory economic system, fast-rising inequality, disintegrating state institutions, the impact of new social media, the rise of China next door, climate change, and deep-seated feelings around race, religion, and national identity all came together to challenge the incipient democracy. Interracial violence soared and a horrific exodus of hundreds of thousands of Rohingya refugees fixed international attention. Myint-U explains how and why this happened, and details an unsettling prognosis for the future. Burma is today a fragile stage for nearly all the world's problems. Are democracy and an economy that genuinely serves all its people possible in Burma? In clear and urgent prose, Myint-U explores this question—a concern not just for the Burmese but for the rest of the world—warning of the possible collapse of this nation of 55 million while suggesting a fresh agenda for change.

[Hidden History of the Human Race](#) - 2020

Biased - Jennifer L. Eberhardt, PhD
2020-03-03

"Poignant....important and illuminating."—The New York Times Book Review "Groundbreaking."—Bryan Stevenson, New York Times bestselling author of *Just Mercy* From one of the world's leading experts on unconscious racial bias come stories, science, and strategies to address one of the central controversies of our time How do we talk about bias? How do we address racial disparities and inequities? What role do our institutions play in creating, maintaining, and magnifying those

inequities? What role do we play? With a perspective that is at once scientific, investigative, and informed by personal experience, Dr. Jennifer Eberhardt offers us the language and courage we need to face one of the biggest and most troubling issues of our time. She exposes racial bias at all levels of society—in our neighborhoods, schools, workplaces, and criminal justice system. Yet she also offers us tools to address it. Eberhardt shows us how we can be vulnerable to bias but not doomed to live under its grip. Racial bias is a problem that we all have a role to play in solving.

An Intimate History of Humanity - Theodore Zeldin 2012-12-31

'The book that changed my life... a constant companion' Bill Bailey 'Extraordinary and beautiful...the most exciting and ambitious work of non-fiction I have read in more than a decade' The Daily Telegraph This extraordinarily wide-ranging study looks at the dilemmas of life today and shows how they need not have arisen. Portraits of living people and historical figures are placed alongside each other as Zeldin discusses how men and women have lost and regained hope; how they have learnt to have interesting conversations; how some have acquired an immunity to loneliness; how new forms of love and desire have been invented; how respect has become more valued than power; how the art of escaping from one's troubles has developed; why even the privileged are often gloomy; and why parents and children are changing their minds about what they want from each other.

Who We Are and How We Got Here - David Reich 2018-03-23

The past few years have witnessed a revolution in our ability to obtain DNA from ancient humans. This important new data has added to our knowledge from archaeology and anthropology, helped resolve long-existing controversies, challenged long-held views, and thrown up remarkable surprises. The emerging picture is one of many waves of ancient human migrations, so that all populations living today are mixes of ancient ones, and often

carry a genetic component from archaic humans. David Reich, whose team has been at the forefront of these discoveries, explains what genetics is telling us about ourselves and our complex and often surprising ancestry. Gone are old ideas of any kind of racial 'purity.' Instead, we are finding a rich variety of mixtures. Reich describes the cutting-edge findings from the past few years, and also considers the sensitivities involved in tracing ancestry, with science sometimes jostling with politics and tradition. He brings an important wider message: that we should recognize that every one of us is the result of a long history of migration and intermixing of ancient peoples, which we carry as ghosts in our DNA. What will we discover next?

Alien World Order - Len Kasten 2017-02-16

Shares new documents to expose the sinister alien influence in world governments, financial systems, and scientific institutions throughout history • Shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens authority to abduct humans for "research" • Reveals how Reptilian-influenced ex-Nazis infiltrated the U.S. government • Explains how the Reptilians have created alien-human hybrids under their control to replace the human population Long ago, the Galactic Federation sent the Atlans, a fierce group of humans from the Pleiades, to Earth to confront the newest colony of the combative ever-spreading alien race known as the Reptilians. The ensuing battle sank the continent of Lemuria and drove the Reptilians underground beneath the Indian subcontinent as well as to Antarctica. Able to shapeshift to appear human, the Reptilians then infiltrated the Atlantean civilization, abducting humans and creating Reptilian hybrids. As Len Kasten shows, this technique of infiltration and hybridization prior to an all-out attack has been the hallmark of Reptilian conquest throughout the galaxy. Chronicling the history of the Reptilian Empire's influence on Earth and their conquest of 21 star systems, Kasten reveals how the human race is enmeshed in

a skillfully concealed plot to enslave humanity and exploit our planet's physical and biological resources. Revealing Hitler's pact with extraterrestrials and the Reptilian influence on the Nazi state, he shares new documents that disclose the rescue and rehabilitation of Nazi war criminals to assist in the Cold War, which then corrupted many U.S. government institutions. Focusing on crucial events in the decade after World War II, he examines the Reptilians' human allies, the Illuminati, who control the levers of financial, technological, and military power throughout the world through various secret societies. He shows how Eisenhower's treaty with the Greys, signed at Holloman Air Force Base in 1954, gave the aliens permission to take humans up to their spaceships, ostensibly for genetic study--in return for alien technology--and how these abductions led to the creation of a hybrid race under Reptilian mind control. He also explains how Kennedy was assassinated by the CIA because of his plans to rout out this Nazi-Reptilian presence. Contrasting the Reptilians with the benevolent Ebens, the aliens from Zeta Reticuli who crashed at Roswell, Kasten exposes the stealthy tactics of the Reptilians, their relationship with the Greys, and their advanced genetic biotechnology and teleportation abilities--as well as what we need to do to defeat their plans.

Space Time and Nathaniel - Brian W. Aldiss
2001-01-28

Born to Run - Christopher McDougall
2010-12-09

At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this

story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.
The Origin of Others - Toni Morrison
2017-09-18

What is race and why does it matter? Why does the presence of Others make us so afraid? America's foremost novelist reflects on themes that preoccupy her work and dominate politics: race, fear, borders, mass movement of peoples, desire for belonging. Ta-Nehisi Coates provides a foreword to Toni Morrison's most personal work of nonfiction to date.

The Hidden History of the Human Race
- Michael A. Cremonesi 1999

Hidden History is a detective novel as much as a scholarly tour de force. But the murder is not the butler. Neither is the victim a rich old man with many heirs. The victim is man himself, and the role of the assassin is played by numerous scientists. Dr. Michael Rothstein, Politiken Newspaper, Denmark

The Secret History of Extraterrestrials - Len Kasten 2010-11-11

Explores the role of ETs in the military, government, technology, history, and the coming new age • Surveys contact with ETs, abductions, alien technology and exopolitics, genetic tampering by ETs, and the history behind the Nazis and UFOs • Contains interviews with Jesse Marcel, Michael Salla, Paul LaViolette, Robert Bauval, Helen Wambach, and others at the forefront of the ET-derived New Science movement The extraterrestrial presence on Earth is widening and, as we enter the Aquarian Age, will be admitted officially, causing shock and an urgent universal need to understand the social and technological changes derived from our space brothers. A primer for the explosive advances humanity will experience scientifically and spiritually in the coming years, this compendium explores the ET phenomenon and its influence on humanity past and present. The

book surveys contact with ETs and abduction accounts, unexplained public and undisclosed military technology from aliens including anti-gravity devices, exopolitics (the influence of ETs in human affairs), the Iraqi Stargate, the Hybrid Project of alien interbreeding by abduction, Nazi ties to UFOs and their secret underground base in Antarctica, government cover-ups of alien interactions including Roswell, and the transformation triggered by the Hale-Bopp comet. Based on interviews with people who are witnessing the coming changes as well as those visionaries who are actually bringing them about—including John Mack, Major Jesse Marcel, Paul LaViolette, Robert Bauval, Michael Salla, and Helen Wambach—this book sketches out a breathtaking vision of the planetary revolution just around the corner.

Forbidden Archeology - Michael A. Cremo 1998

Have humans walked the earth for millions of years? A controversial and riveting takes on human history and the accepted science of today.

After Whiteness - Willie James Jennings 2020-09-01

On forming people who form communion
Theological education has always been about formation: first of people, then of communities, then of the world. If we continue to promote whiteness and its related ideas of masculinity and individualism in our educational work, it will remain diseased and thwart our efforts to heal the church and the world. But if theological education aims to form people who can gather others together through border-crossing pluralism and God-drenched communion, we can begin to cultivate the radical belonging that is at the heart of God's transformative work. In this inaugural volume of the Theological Education between the Times series, Willie James Jennings shares the insights gained from his extensive experience in theological education, most notably as the dean of a major university's divinity school—where he remains one of the only African Americans to have ever served in that role. He reflects

on the distortions hidden in plain sight within the world of education but holds onto abundant hope for what theological education can be and how it can position itself at the front of a massive cultural shift away from white, Western cultural hegemony. This must happen through the formation of what Jennings calls erotic souls within ourselves—erotic in the sense that denotes the power and energy of authentic connection with God and our fellow human beings. After Whiteness is for anyone who has ever questioned why theological education still matters. It is a call for Christian intellectuals to exchange isolation for intimacy and embrace their place in the crowd—just like the crowd that followed Jesus and experienced his miracles. It is part memoir, part decolonial analysis, and part poetry—a multimodal discourse that deliberately transgresses boundaries, as Jennings hopes theological education will do, too.

In the Shadow of the Moon - Amy Cherrix 2021-02-09

An exhilarating dive into the secret history of humankind's race to the moon, from acclaimed author Amy Cherrix. This fascinating and immersive read is perfect for fans of Steve Sheinkin's Bomb and M. T. Anderson's Symphony for the City of the Dead. You've heard of the space race, but do you know the whole story? The most ambitious race humankind has ever undertaken was masterminded in the shadows by two engineers on opposite sides of the Cold War—Wernher von Braun, a former Nazi officer living in the US, and Sergei Korolev, a Russian rocket designer once jailed for crimes against his country—and your textbooks probably never told you. Von Braun became an American hero, recognized the world over, while Korolev toiled in obscurity. These two brilliant rocketeers never met, but together they shaped the science of spaceflight and redefined modern warfare. From Stalin's brutal Gulag prisons and Hitler's concentration camps to Cape Canaveral and beyond, their simultaneous quests pushed science—and human ingenuity—to the

breaking point. From Amy Cherrix comes the extraordinary hidden story of the space race and the bitter rivalry that launched humankind to the moon.

The Origin and Evolution of Freemasonry Connected with the Origin and Evolution of the Human Race. - Albert Churchward
2018-12-12

Published in 1921. In this book Dr Albert Churchward proposes that the unity of brotherhood throughout the world is the only means for permanent universal peace. Churchward puts forth his argument against the dangers of socialism and anarchy for human enlightenment by referencing the teachings and spirituality that encompasses freemasonry thought, in relation to the evolution of the human race.

Emancipation Betrayed - Paul Ortiz
2006-10-03

"Paul Ortiz's lyrical and closely argued study introduces us to unknown generations of freedom fighters for whom organizing democratically became in every sense a way of life. Ortiz changes the very ways we think of Southern history as he shows in marvelous detail how Black Floridians came together to defend themselves in the face of terror, to bury their dead, to challenge Jim Crow, to vote, and to dream."—David R. Roediger, author of *Colored White: Transcending the Racial Past* "Emancipation Betrayed is a remarkable piece of work, a tightly argued, meticulously researched examination of the first statewide movement by African Americans for civil rights, a movement which since has been effectively erased from our collective memory. The book poses a profound challenge to our understanding of the limits and possibilities of African American resistance in the early twentieth century. This analysis of how a politically and economically marginalized community nurtures the capacity for struggle speaks as much to our time as to 1919."—Charles Payne, author of *I've Got the Light of Freedom*

Sapiens - Yuval Noah Harari 2015-02-10
New York Times Bestseller A Summer Reading Pick for President Barack Obama,

Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human." One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

God - Reza Aslan 2017-11-07
NEW YORK TIMES BESTSELLER • The bestselling author of *Zealot* and host of *Believer* explores humanity's quest to make sense of the divine in this concise and fascinating history of our understanding of God. In *Zealot*, Reza Aslan replaced the staid, well-worn portrayal of Jesus of Nazareth with a startling new image of the man in all his contradictions. In his new book, Aslan takes on a subject even more

immense: God, writ large. In layered prose and with thoughtful, accessible scholarship, Aslan narrates the history of religion as a remarkably cohesive attempt to understand the divine by giving it human traits and emotions. According to Aslan, this innate desire to humanize God is hardwired in our brains, making it a central feature of nearly every religious tradition. As Aslan writes, "Whether we are aware of it or not, and regardless of whether we're believers or not, what the vast majority of us think about when we think about God is a divine version of ourselves." But this projection is not without consequences. We bestow upon God not just all that is good in human nature—our compassion, our thirst for justice—but all that is bad in it: our greed, our bigotry, our penchant for violence. All these qualities inform our religions, cultures, and governments. More than just a history of our understanding of God, this book is an attempt to get to the root of this humanizing impulse in order to develop a more universal spirituality. Whether you believe in one God, many gods, or no god at all, *God: A Human History* will challenge the way you think about the divine and its role in our everyday lives. Praise for *God* "Timely, riveting, enlightening and necessary."—HuffPost "Tantalizing . . . Driven by [Reza] Aslan's grace and curiosity, *God* . . . helps us pan out from our troubled times, while asking us to consider a more expansive view of the divine in contemporary life."—The Seattle Times "A fascinating exploration of the interaction of our humanity and God."—Pittsburgh Post-Gazette "[Aslan's] slim, yet ambitious book [is] the story of how humans have created God with a capital G, and it's thoroughly mind-blowing."—Los Angeles Review of Books "Aslan is a born storyteller, and there is much to enjoy in this intelligent survey."—San Francisco Chronicle

How the Word Is Passed - Clint Smith
2021-06-01

This compelling "important and timely" (Drew Faust, Harvard Magazine) #1 New York Times bestseller examines the legacy of slavery in America—and how both history

and memory continue to shape our everyday lives. Beginning in his hometown of New Orleans, Clint Smith leads the reader on an unforgettable tour of monuments and landmarks—those that are honest about the past and those that are not—that offer an intergenerational story of how slavery has been central in shaping our nation's collective history, and ourselves. It is the story of the Monticello Plantation in Virginia, the estate where Thomas Jefferson wrote letters espousing the urgent need for liberty while enslaving more than four hundred people. It is the story of the Whitney Plantation, one of the only former plantations devoted to preserving the experience of the enslaved people whose lives and work sustained it. It is the story of Angola, a former plantation-turned-maximum-security prison in Louisiana that is filled with Black men who work across the 18,000-acre land for virtually no pay. And it is the story of Blandford Cemetery, the final resting place of tens of thousands of Confederate soldiers. A deeply researched and transporting exploration of the legacy of slavery and its imprint on centuries of American history, *How the Word Is Passed* illustrates how some of our country's most essential stories are hidden in plain view—whether in places we might drive by on our way to work, holidays such as Juneteenth, or entire neighborhoods like downtown Manhattan, where the brutal history of the trade in enslaved men, women, and children has been deeply imprinted. Informed by scholarship and brought to life by the story of people living today, Smith's debut work of nonfiction is a landmark of reflection and insight that offers a new understanding of the hopeful role that memory and history can play in making sense of our country and how it has come to be. The Inequality of Human Races - Arthur comte de Gobineau 1915

Hidden History of the Human Race - Michael Cremona 2014-10-07

But according to other scientists, such as physical anthropologist R. H. Tuttle of the University of Chicago, fossil foot bones of the known australopithecines of 3.6 million years ago show they had feet that were distinctly apelike. Hence they were incompatible with the Laetoli prints. In an article in the March 1990 issue of *Natural History*, Tuttle confessed that "we are left with somewhat of a mystery." It seems permissible, therefore, to consider a possibility neither Tuttle nor Leakey mentioned—that creatures with anatomically modern human bodies to match their anatomically modern human feet existed some 3.6 million years ago in East Africa. Perhaps, as suggested in the illustration on the opposite page, they coexisted with more apelike creatures. As intriguing as this archeological possibility may be, current ideas about human evolution forbid it.

Wake - Rebecca Hall 2021-06-01

A Best Book of 2021 by NPR and The Washington Post Part graphic novel, part memoir, *Wake* is an imaginative tour-de-force that tells the "powerful" (The New York Times Book Review) story of women-led slave revolts and chronicles scholar Rebecca Hall's efforts to uncover the truth about these women warriors who, until now, have been left out of the historical record. Women warriors planned and led revolts on slave ships during the Middle Passage. They fought their enslavers throughout the Americas. And then they were erased from history. *Wake* tells the "riveting" (Angela Y. Davis) story of Dr. Rebecca Hall, a historian, granddaughter of slaves, and a woman haunted by the legacy of slavery. The accepted history of slave revolts has always told her that enslaved women took a back seat. But Rebecca decides to look deeper, and her journey takes her through old court records, slave ship captain's logs, crumbling correspondence, and even the forensic evidence from the bones of enslaved women from the "negro burying ground" uncovered in Manhattan. She finds women

warriors everywhere. Using a "remarkable blend of passion and fact, action and reflection" (NPR), Rebecca constructs the likely pasts of Adono and Alele, women rebels who fought for freedom during the Middle Passage, as well as the stories of women who led slave revolts in Colonial New York. We also follow Rebecca's own story as the legacy of slavery shapes her life, both during her time as a successful attorney and later as a historian seeking the past that haunts her. Illustrated beautifully in black and white, *Wake* will take its place alongside classics of the graphic novel genre, like Marjane Satrapi's *Persepolis* and Art Spiegelman's *Maus*. This story of a personal and national legacy is a powerful reminder that while the past is gone, we still live in its wake.

The China Mirage - James Bradley 2015-04-21

"Bradley is sharp and rueful, and a voice for a more seasoned, constructive vision of our international relations with East Asia." -- Christian Science Monitor James Bradley introduces us to the prominent Americans--including FDR's grandfather, Warren Delano--who in the 1800s made their fortunes in the China opium trade. Meanwhile, American missionaries sought a myth: noble Chinese peasants eager to Westernize. The media propagated this mirage, and FDR believed that supporting Chiang Kai-shek would make China America's best friend in Asia. But Chiang was on his way out and when Mao Zedong instead came to power, Americans were shocked, wondering how we had "lost China." From the 1850s to the origins of the Vietnam War, Bradley reveals how American misconceptions about China have distorted our policies and led to the avoidable deaths of millions. *The China Mirage* dynamically explores the troubled history that still defines U.S.-Chinese relations today.

Who's Black and Why? - Henry Louis Gates 2022-03-22

The first translation and publication of sixteen submissions to the notorious eighteenth-century Bordeaux essay contest on the cause of black skin—an indispensable chronicle of the rise of scientifically based,

anti-Black racism. In 1739 Bordeaux's Royal Academy of Sciences announced a contest for the best essay on the sources of "blackness." What is the physical cause of blackness and African hair, and what is the cause of Black degeneration, the contest announcement asked. Sixteen essays, written in French and Latin, were ultimately dispatched from all over Europe. The authors ranged from naturalists to physicians, theologians to amateur savants. Documented on each page are European ideas about who is Black and why. Looming behind these essays is the fact that some four million Africans had been kidnapped and shipped across the Atlantic by the time the contest was announced. The essays themselves represent a broad range of opinions. Some affirm that Africans had fallen from God's grace; others that blackness had resulted from a brutal climate; still others emphasized the anatomical specificity of Africans. All the submissions nonetheless circulate around a common theme: the search for a scientific understanding of the new concept of race. More important, they provide an indispensable record of the Enlightenment-era thinking that normalized the sale and enslavement of Black human beings. These never previously published documents survived the centuries tucked away in Bordeaux's municipal library. Translated into English and accompanied by a detailed introduction and headnotes written by Henry Louis Gates, Jr., and Andrew Curran, each essay included in this volume lays bare the origins of anti-Black racism and colorism in the West.

Revival: Origin and Evolution of the Human Race (1921) - Albert Churchwood
2018-01-17

Where and when did man make his first appearance on this earth? The object of this

book is to bring before the public such further facts and values regarding the evolution of man. After studies Churchwood made during many years, he is now fully convinced that the hitherto preconceived ideas of many scientists regarding the origin of the human race, both as to place and date, are erroneous, and evidence will be brought forward to prove that the human race did not originate in Asia, but in Africa.

Four Lost Cities: A Secret History of the Urban Age - Annalee Newitz 2021-02-02

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.
