*Transforming Education* - Miranda Jefferson 2021-04-22

Working away from trends in government policy, this book takes a future-oriented re-imagining of schools with a focus on four innate human capacities: collaboration, critical reflection, communication and creativity.

Miranda Jefferson and Michael Anderson draw together examples of practice from around the world to provide a reimagining of education. They show how our schools can be sustainably transformed to be places of support, challenge and joy in learning, responsive to students' needs and the needs in our workplaces and wider society. Readers are empowered to use knowledge and experience to create the reality they would like to see in their school, building engaged, innovative and active learning, pedagogy curriculum and leadership. Key ideas are summarised at the end of each chapter along with an extensive referencing and bibliography, and a supporting glossary.

*Brave New Car* - Karl Smith 2021-09-27

The best years of the automobile lie before us. But it will be a new kind of car and a new kind of automotive experience. There will be a new powertrain dominating the motoring world. Driving will gradually be ceded to the on-board electronics, and, in response, interiors will become more luxurious and sociable. The car will connect with other cars, and infrastructure, a community and ecology of mobility. *Brave New Car* outlines the possibilities, and opportunities, that lie before us. A premium quality book for the professional, student, and enthusiast alike, *Brave New Car* is sure to challenge and inspire new thinking in the automotive world and beyond.

*Lithuania* - Thomas Lane 2014-04-08

Lithuania restored her independence, after half a century of Soviet occupation, in the immediate aftermath of the failed Moscow coup in August 1991. As the multi-national Soviet state disintegrated, Lithuania evolved, without war or violence, from a communist state and a command economy to a liberal democracy, a free market, and a society guaranteeing human and minority rights. Lithuania therefore offers a notable example of peaceful transition, all the more impressive in the light of the bloody conflict elsewhere in the former Soviet Union of Yugoslavia, where the aspirations to independence of the constituent republics were

either violently resisted or dissolved into inter-ethnic violence. Equally remarkable has been Lithuania's determination to 'return to Europe' after half a century of separation, even at the price of submerging its recently restored sovereign rights in the supranational European Union. The cost of membership in western economic and security organizations are judged to be worth paying to prevent Lithuania's being drawn once again into a putative Russian sphere of influence. On the threshold of a new millennium therefore, Lithuania has made a pragmatic accommodation to the demands of becoming a modern European state, whilst vigorously resisting the dilution of her rich cultural and historical traditions. These twin themes of accommodation and resistance are Lithuania's historical legacy to the current generations of Lithuanians as they integrate into European institutions and continue the modernization process.

Katelyn Wolfraum was a MI6 agent with a promising career carving up Nazis until one little "Oops" had the King of England place a shoot-on-sight order on her pretty red head and sent her underground. A few years later, with the Third Reich overrunning the free world, Kat ends up trapped hundreds of hellish North African desert miles behind enemy lines with a motley group of misfits. As they work their way back to friendly lines, they team with "The Long Range Desert Group." Together, they begin a terror campaign against the Germans, shattering Rommel's supply lines, scalping Nazis and driving the Gestapo and SS crazy. Ultimately, Kat gets a chance to redeem herself when she stumbles upon Hitler's plan to use the most powerful Wunderwaffe in the history of warfare. But she has a small problem... How can a disgraced and wanted ex MI6 assassin convince the British Command that Hitler is about to win the war...

**Inside IMSA's Legendary GTP Race Cars** - J. A. Martin, Michael J. Fuller  
Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical "parity"? This was what the International Motor Sports Association's (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them, *Inside IMSA's Legendary GTP Race Cars* offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.

**Molybdenum Disulphide Lubrication** - A.R. Lansdown 1999-05-28

In the 1970s and the early 1980s there was an enormous volume of research and development into the subject of molybdenum disulphide lubrication, much of which was supported by national governments for the benefit of defence, aviation or space activities. There were already some well-established practical guidelines for deciding when and how to use

molybdenum disulphide, but there was still a considerable lack of universally-accepted theoretical understanding of some of the important and fundamental aspects of molybdenum disulphide technology. However, the state of knowledge was growing rapidly. In the past fifteen years the situation with regard to the technology of molybdenum disulphide lubrication has stabilised in many respects, and a measure of consensus has been reached about some of the mechanisms involved. The use of molybdenum disulphide has become routine in some industries, and there are many well-established and reputable commercial products available. Except in the high-technology field of physical deposition techniques, especially sputtering, the output of new research publications has fallen from perhaps two hundred a year in the 1970s to fewer than ten a year in the 1990s. In spite of this maturing of the subject, it is clear that there are still many aspects in which disagreements persist about the mechanisms involved, and which as a result are unclear or misunderstood among current, and perhaps even more importantly, potential users. One of the primary objectives of this book is to analyse the various aspects of molybdenum disulphide lubrication technology about which there are still disagreements or controversy, and to attempt to come to firm conclusions about some of the mechanisms involved. In particular, it will place emphasis on the importance and effects of burnishing and film consolidation.

**The Origin of Competitive Strength** - Akira Kawahara 2012-02-22

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between

Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

*Kingdom of Twilight* - Steven Uhly 2018-08-07

"POWERFUL AND ORIGINAL." --THE TIMES "REWARDING AND WHOLLY ENGAGING." --HISTORICAL NOVEL SOCIETY "ONE OF THE MOST IMPORTANT AND POWERFUL NOVELS OF RECENT GERMAN LITERATURE." --DEUTSCHLANDRADIO KULTUR Hypnotically lyrical and intensely moving, Steven Uhly's epic novel set in the wake of World War II is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. Kingdom of Twilight follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a

former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it.
