The Planet Factory - Elizabeth Tasker 2017-09-07

Forget about rockets to Mars – the future of space science lies with the search for exoplanets. Twenty years ago, the search for planets outside the Solar System was the preserve of science-fiction writers. Now it's one of the fastest-growing fields in astronomy, with thousands of exoplanets discovered to date, and the number rising fast. These new-found worlds are more alien than anything in fiction. Planets larger than Jupiter with years lasting a week; others with two suns lighting their skies, or with no sun at all. Planets with diamond mantles supporting oceans of tar; possible Earth-sized worlds with split hemispheres of perpetual day and night; waterworlds drowning under global oceans and volcanic lava planets awash with seas of magma. The discovery of this diversity is just the beginning. There is a whole galaxy of possibilities. The Planet Factory tells the story of these exoplanets. What can we learn about these faraway surface environments and planetary atmospheres? And do the results hint at the tantalising possibility of alien life?

**The Tsarina's Lost Treasure** - Gerald Easter 2020-09-01

A riveting history and maritime adventure story about priceless masterpieces originally destined for Catherine the Great. In October 1771, a merchant ship out of Amsterdam, the *Vrouw Maria*, crashed off the stormy Finnish coast, taking her wonderous cargo to the depths of the Baltic Sea. The vessel was delivering a dozen Dutch masterpiece paintings to Europe's most voracious collector: Catherine the Great, Empress of Russia. Among the lost treasures was *The Nursery*, an oak-paneled triptych by Leiden fine painter Gerrit Dou, Rembrandt's most brilliant student and Holland's first international superstar artist. Dou's triptych was long the most beloved and most coveted painting of the Dutch Golden Age, and its loss in the shipwreck was mourned throughout the art world. The *Vrouw Maria*, meanwhile, became a maritime legend, confounding would-be salvagers for more than two hundred years. In July 1999, a daring Finnish wreck hunter found *Vrouw Maria*, upright on the sea floor and perfectly preserved. *The Tsarina and the Lost Treasure* masterfully recounts the fascinating tale of *Vrouw Maria*—her loss and discovery—weaving together the rise and fall of the artist whose priceless masterpiece was the jewel of the wreckage. Gerald Easter and Mara Vorhees bring to vivid life the personalities that drove (and still drive) Russian high politics, her art and her culture. And in the spirit of Gary Kinder and Robert Kurson, they show how these personalities intersect with the danger and adventure out on the beguiling Archipelago Sea.

**Sea of Glory** - Nathaniel Philbrick 2004-10-26  
"A treasure of a book."—David McCullough  
The harrowing story of a pathbreaking naval expedition that set out to map the entire Pacific Ocean, dwarfing Lewis and Clark with its discoveries, from the New York Times bestselling author of *Valiant Ambition* and *In the Hurricane's Eye*. A New York Times Notable Book  
America's first frontier was not the West; it was the sea, and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick. In his bestselling *In the Heart of the Sea* Philbrick probed the nightmarish dangers of the vast Pacific. Now, in an epic sea adventure, he writes about one of the most ambitious voyages of discovery the Western world has ever seen—the U.S. Exploring Expedition of 1838–1842. On a scale that dwarfed the journey of Lewis and Clark, six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and ended up naming the newly discovered continent of Antarctica, collecting what would become the basis of the Smithsonian Institution. Combining spellbinding human drama and meticulous research, Philbrick reconstructs the dark saga of the voyage to show why, instead of being celebrated and revered as that of Lewis and Clark, it has—until now—been relegated to a footnote in the national memory. Winner of the Theodore and Franklin D. Roosevelt Naval History Prize

**Longitude** - Dava Sobel 2010-07-05

The dramatic human story of an epic scientific quest and of one man's forty-year obsession to find a solution to the thorniest scientific dilemma of the day—"the longitude problem." Anyone alive in the eighteenth century would have known that "the longitude problem" was the thorniest scientific dilemma of the day—and had been for centuries. Lacking the ability to measure their longitude, sailors throughout the great ages of exploration had been literally lost at sea as soon as they lost sight of land. Thousands of lives and the increasing fortunes of nations hung on a resolution. One man, John Harrison, in complete opposition to the scientific community, dared to imagine a mechanical solution—a clock that would keep precise time at sea, something no clock had ever been able to do on land. *Longitude* is the dramatic human story of an epic scientific quest and of Harrison's forty-year obsession with building his perfect timekeeper, known today as the chronometer. Full of heroism and chicanery, it is also a fascinating brief history of astronomy, navigation, and clockmaking, and opens a new window on our world.

**Age of Discovery** - Ian Goldin 2016-05-24

The present is a contest between the bright and dark sides of discovery. To avoid being torn apart by its stresses, we need to recognize the fact—and gain courage and wisdom from the past. Age of Discovery shows how. Now is the best moment in history to be alive, but we have never felt more anxious or divided. Human health, aggregate wealth and education are flourishing. Scientific discovery is racing forward. But the same global flows of trade, capital, people and ideas that make gains possible for some people deliver big losses to others—and make us all more vulnerable to one another. Business and science are working giant revolutions upon our societies, but our politics and institutions evolve at a much slower pace. That's why, in a moment when everyone ought to be celebrating giant global gains, many of us are righteously angry at being left out and stressed about where we're headed. To make sense of present shocks, we need to step back and recognize: we've been here before. The first Renaissance, the time of Columbus, Copernicus, Gutenberg and others, likewise redrew all maps of the world, democratized communication and sparked a flourishing of creative achievement. But their world also grappled with the same dark side of rapid change: social division, political extremism, insecurity, pandemics and other unintended consequences of discovery. Now is the second Renaissance. We can still flourish—if we learn from the first.
