Die Geschichtsbilder historischer Romane - Stefanie von Räden 2018-01-04

Historische Romane waren und sind in der Öffentlichkeit erstaunlich konstant präsent - und das trotz konkurrierender, populärer Medien wie Kinofilmen, Serien oder Spielen. Durch historische Romane werden Geschichten erzählt und inszeniert und (sehr wahrscheinlich) historische Vorstellungen geprägt. Aber wie geschieht das genau? Welche Geschichtsbilder werden vermittelt? Und wer sind engagierte Akteure auf dem wirtschaftlich orientierten Buchmarkt? Mithilfe empirischer Verfahren nimmt diese Studie das geschichtskulturelle, kommerzielle Medium "Historischer Roman" in den Blick, lässt sich nicht von den gängigen Kanonlisten leiten, sondern blickt auf jene 'Schmöker', deren Anspruch auf Ästhetik schwerer wiegt als auf wissenschaftlich korrekte Historiographie. Diese Studie ist eine Produkt- und keine Rezeptionsanalyse. Diese Produktanalyse kann aber historisch kontextualisiert

werden. Der diachrone Vergleich der in den Romanen vorwaltenden Geschichtsbilder zeigt nicht nur in einem wichtigen Segment die Dynamiken und Konjunkturen deutschsprachiger Geschichtskultur auf, sondern weist auch auf Korrespondenzen mit gesellschaftspolitischen Entwicklungen der Jahre 1913 bis 1933 hin. Der potentielle Dialog zwischen Roman und Publikum, oder genauer gesagt: die Marktantizipation von Publikumsverlagen und ihrer literarischen Produzenten, lässt für den untersuchten Zeitraum erkennen, dass Medien der Geschichtskultur auf eine seismographische Weise Verschiebungen im kollektiven Bewusstsein ihrer Nutzerinnen und Nutzer dokumentieren.

Unasyuva 250 - Food and Agriculture Organization of the United Nations 2018-09-13

Cities need forests. The network of woodlands, groups of trees and individual trees in a city and on its fringes performs a huge range of functions – such as regulating climate; storing carbon; removing air pollutants;

reducing the risk of flooding; assisting in food, energy and water security; and improving the physical and mental health of citizens. Forests enhance the look of cities and play important roles in social cohesion; they may even reduce crime. This edition of *Unasylva* takes a close look at urban and peri-urban forestry – its benefits, pitfalls, governance and challenges.

Networked Music Cultures - Raphaël Nowak 2016-09-16

This collection presents a range of essays on contemporary music distribution and consumption patterns and practices. The contributors to the collection use a variety of theoretical and methodological approaches, discussing the consequences and effects of the digital distribution of music as it is manifested in specific cultural contexts. The widespread circulation of music in digital form has far-reaching consequences: not least for how we understand the practices of sourcing and consuming music, the political economy of the music industries, and the relationships between format and aesthetics. Through close empirical engagement with a variety of contexts and analytical frames, the contributors to this collection demonstrate that the changes associated with networked music are always situationally specific, sometimes contentious, and often unexpected in their implications. With chapters covering topics such as the business models of streaming audio, policy and professional discourses around the changing digital music market, the creative affordances of format and circulation, and local practices of accessing and engaging with music in a range of distinct cultural contexts, the book presents an overview of the themes, topics and approaches found in current social and cultural research on the relations between music and digital technology.

Collectively, the essays also engage diverse theoretical approaches to demonstrate the multi-vocal nature of studying the past. Governance and Service Delivery - Anna Wetterberg 2016-09-25

RTI International has extensive experience implementing international donor-funded programs and projects, including single-sector and multisector policy and service-delivery improvement efforts, as well as governance and public management reforms. Drawing on that experience, this collection examines six recent RTI International projects, funded mostly by the United States Agency for International Development, that pursued several different paths to integrating service delivery and governance through engaging citizens, public officials, and service providers on issues related to accountability and sectoral services. The six cases illustrate the multiple ways in which citizen participation in accountability, called social accountability, can lead to positive effects on governance, citizen empowerment, and service delivery. The analysis focuses on both the intended and actual effects, and unpacks the influence of context on

implementation and the outcomes achieved.

Twelve Years a Slave - Solomon Northup 2021-01-01

Necroperformance - Dorota Sajewska 2019

La 4e de couverture indique : "Dorota Sajewska proposes an innovative perspective for looking back at the formative process of Polish modernity, and delves into repressed areas of experience connected with World War I and the ensuing emancipatory movements. The book shows that underpinning modern Polish nationhood, is both a romantic myth of independence and a horror of fratricidal war. Searching for traces of memory in precarious bodies inflicted with the violence of war, Necroperformance asks us to acknowledge the fragility of life as it actively reinforces an attitude of respect for the right to live. Sajewska's chief objective is to understand the social impact of remains - of the abject body (dead, wounded, disfigured, despoiled by violence) - its place in culture and its agency. These are remains like the body of Rosa Luxemburg, which opens the book's narrative - a woman, a Jew, a Polish-German communist activist who was imprisoned, persecuted, murdered, and desecrated after death. This alternative archive becomes a basis for thought on a new anthropology rooted in the experience of the Great War and recorded in the form of modern theatre."

The Lords of Tikal - Peter D. Harrison 1999

The Maya metropolis of Tikal was once one of the greatest cities in the world, its skyline dominated by huge temple-pyramids. In ad 750 over 100,000 people lived here, in the heart of the Guatemalan rainforest. Today Tikal is a popular site on the Maya tourist itinerary. But why did the city flourish? What does its history reveal about Maya civilization? And why did Tikal collapse? Drawing upon over 30 years of excavation and research, some of it his own, Peter D. Harrison gives a vivid account of the turbulent story of Tikal from 800 bc to the late 9th century ad. Strategically located, the city was a trade centre, an architectural pioneer and a focal point of warfare. The apogee of power and wealth was achieved during the reign of the Jaguar Claw clan, who built the Great Temples, some with tombs of treasures that hint at the richness of life of the lords of Tikal. Illustrated with photographs of artefacts and objects found at the site, remaining structures and a reconstruction of a Tikal king in full regalia, Peter D. Harrison offers a summary of what is known to date of this romantic, mysterious city and its rulers.

Higher Education Pathways - Ashwin, Paul 2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the

public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Doctoral Education in South Africa - Cloete, Nico
2015-12-08

Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education - and, particularly, high-level skills - is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the

world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

The Geography of Gandhāran Art - Wannaporn Rienjang
2019-03-15

Gandhāran art is usually regarded as a single phenomenon – a unified regional artistic tradition or 'school'. Indeed it has distinctive visual characteristics, materials, and functions, and is characterized by its extensive borrowings from the Graeco-Roman world. Yet this tradition is also highly varied. Even the superficial homogeneity of Gandhāran sculpture, which constitutes the bulk of documented artistic material from this region in the early centuries AD, belies a considerable range of styles, technical approaches, iconographic choices, and levels of artistic skill. The geographical variations in Gandhāran art have received

less attention than they deserve. Many surviving Gandhāran artefacts are unprovenanced and the difficulty of tracing substantial assemblages of sculpture to particular sites has obscured the fine-grained picture of its artistic geography. Well documented modern excavations at particular sites and areas, such as the projects of the Italian Archaeological Mission in the Swat Valley, have demonstrated the value of looking at sculptures in context and considering distinctive aspects of their production, use, and reuse within a specific locality. However, insights of this kind have been harder to gain for other areas, including the Gandhāran heartland of the Peshawar basin. Even where large collections of artworks can be related to individual sites, the exercise of comparing material within and between these places is still at an early stage. The relationship between the Gandhāran artists or 'workshops', particular stone sources, and specific sites is still unclear. Addressing these and other questions, this second volume of the Gandhara Connections project at Oxford University's Classical Art Research Centre presents the proceedings of a workshop held in March 2018. Its aim is to pick apart the regional geography of Gandhāran art, presenting new discoveries at particular sites, textual evidence, and the challenges and opportunities of exploring Gandhāra's artistic geography.

The Meaning of Color in Ancient Mesopotamia - Shiyanthi Thavapalan 2019-10-21

"In The Meaning of Color in Ancient Mesopotamia, Shiyanthi Thavapalan offers the first in-depth study of the words and expressions for colors in the Akkadian language (c. 2500-500 BCE). By combining philological analysis with the technical investigation of materials, she debunks the misconception that people in Mesopotamia had a limited sense of color and convincingly positions the development of Akkadian color language as a corollary of the history of materials and techniques in the ancient Near East"--

Boy-Wives and Female Husbands - Stephen O. Murray
2021-04-01

A significant contribution to anthropology, history, and gender studies that reveals the denials of homosexuality in traditional and contemporary African societies to be rooted in colonialist ideologies. Among the many myths created about Africa, the claim that homosexuality and gender diversity are absent or incidental is one of the oldest and most enduring. Historians, anthropologists, and many contemporary Africans alike have denied or overlooked African same-sex patterns or claimed that such patterns were introduced by Europeans or Arabs. In fact, same-sex love and nonbinary genders were and are widespread in Africa. Boy-Wives and Female Husbands documents the presence of this diversity in some fifty societies in every region of the continent south of the Sahara. Essays by scholars from a variety of disciplines explore institutionalized marriages between women, same-sex relations between men and boys in colonial work settings, mixed gender roles in east and west Africa, and the emergence of LGBTQ activism in South Africa, which became the first nation in the world to constitutionally ban discrimination based on sexual orientation. Also included are oral histories, folklore,

and translations of early ethnographic reports by German and French observers. *Boy-Wives and Female Husbands* was the first serious study of same-sex sexuality and gender diversity in Africa, and this edition includes a new foreword by Marc Epprecht that underscores the significance of the book for a new generation of African scholars, as well as reflections on the book's genesis by the late Stephen O. Murray. Stephen O. Murray (1950–2019) was an independent scholar who held a PhD in Sociology from the University of Toronto. Will Roscoe is an independent scholar, with a PhD in History of Consciousness from the University of California, Santa Cruz. They are the coeditors of *Islamic Homosexualities: Culture, History, and Literature*.

Introduction to the Dinaric Karst - Nadja Zupan Hajna 2010-01-01

Dinarski kras je obsežno, 800 km dolgo in do 150 km široko kraško območje, ki zavzema večji del Dinarskih gora in zavzema zahodni del Slovenije. Dinarski kras se odlikuje po velikih sklenjenih površinah, izjemni pestrosti reliefnih oblik, izjemnih jamah, velikih rekah ponikalnicah in kraških izviri. Zaradi izrazitih oblik in pojavov so se tu že zgodaj pojavili opisi krasa pa tudi znanstvena raziskovanja. V 19. stoletju, je iz imena pokrajine Kras nastal termin karst, domača imena za reliefne oblike, dolina, polje, uvala, ponor pa so postali znanstveni termini. Tu so bile odkrite in opisane tudi prve jamske živali. Kljub odkritju številnih novih kraških območij v drugačnih geoloških ali klimatskih pogojih ostaja Dinarski kras še vedno svetovno pomembno kraško področje. Dinarski kras je locus typicus za številne oblike in pojave, je mesto intenzivnega raziskovanja, pa tudi mesto, kjer se srečujejo krasoslovci s celega sveta. Knjiga na poljudnoznanstven način opisuje osnovne karakteristike Dinarskega krasa ter karakteristične primere tipov površja z Dinarskega krasa.

Myanmar's Education Reforms - Marie Lall 2020-11-02

This book reviews the state of education in Myanmar over the past decade and a half as the country is undergoing profound albeit incomplete transformation. Set within the context of Myanmar's peace process and the wider reforms since 2012, Marie Lall's analysis of education policy and practice serves as a case study on how the reform programme has evolved. Drawing on over 15 years of field research carried out across Myanmar, the book offers a cohesive inquiry into government and non-government education sectors, the reform process, and how the transition has played out across schools, universities and wider society. It casts scrutiny on changes in basic education, the alternative monastic education, higher education and teacher education, and engages with issues of ethnic education and the debate on the role of language and the local curriculum as part of the peace process. In so doing, it gives voice to

those most affected by the changing landscape of Myanmar's education and wider reform process: the students and parents of all ethnic backgrounds, teachers, teacher trainees and university staff that are rarely heard.

Jewish Refugees in Shanghai 1933–1947 - Irene Eber 2018-11-12

Around 20,000 Jews, mostly from Germany and Austria, managed to escape Nazi persecution in the late 1930s and fled to Shanghai, where they found a safe refuge despite the increasing harassment of the Japanese authorities. In the face of difficult conditions, the Jewish refugees tried to arrange for both their material needs and the continuation of their communal cultural life. The 184 sources collected in the present volume document not only these efforts, but also the support of the local Jewish aid committees and other, mostly Jewish international aid organizations. The reactions of Nazi authorities in Germany and their representatives in Shanghai are included as well, as are impressions from the Japanese and Chinese sides. The documents – in German, English, Yiddish, Hebrew, Russian, and Chinese – are annotated, partially translated, and accompanied by introductions, maps, and photographs.

CAPS LOCK: How Capitalism Took Hold of Graphic Design, and How to Escape from It - Ruben Pater 2021-09-21

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language

and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own

way, hoping to inspire a more socially aware graphic design.
