Trust, Tourism Development and Planning - Robin Nunkoo 2014-08-07

The dynamics of trust and distrust are central to understanding modern society, social relations, and development processes. However, numerous studies suggest that societal trust and citizen's trust in government and its institutions are on the decline, challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development. Recognizing its importance, the authors for the first time situate trust within the context of tourism development and planning. This volume discusses trust in tourism from different yet intrinsically connected perspectives. Chapters review how diminishing societal trust may have adversely affected tourism planning systems, the role of trust in good tourism governance and sustainable tourism, how trust can be used as a facilitator of participatory tourism planning, political trust in tourism institutions, power and how tourism development can be a basis for trust creation among society members by using social capital theory. In addition, a final section on 'Researching Trust in Tourism Development' means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector, but also methodological aspects of research on trust in the context of tourism development and planning. This significant volume is valuable reading for students, academics and researchers interested in tourism development and planning.

Tourism in Pacific Islands - Stephen Pratt 2015-02-20

Pacific Island Countries have been shown to be especially vulnerable to such external influences as natural disasters, political unrest and downturns in the global economy and their tourism industries have been notably affected. In particular, they typically have a narrow resource base and a fragile and often

vulnerable natural environment. While there is some research on islands and small states, there is a dearth of information on the South Pacific and very little research is being undertaken in the region compared to other geographical regions in the world. This volume brings together current work in Pacific Island tourism. In this collection, three main themes arise: Images of the South Pacific; Socio-economic Impacts of Tourism; and Pacific Island Countries and the Outside World. The first focus is on the question of image, namely, stereotypes of a destination held by tourists and potential tourists, the extent to which residents, for their part, really welcome visitors, and the role tourism might play in changing pre-established images. The second theme is tourism's impacts, notably the economic and socio-cultural effects of international tourism's intrusion in the region which, though often hotly debated, have attracted relatively little empirical research. The third focus is on the challenges of how PICs articulate with their external geo-political and physical environment. These involve existing relations with formal colonial centres, geographical isolation, the need for greater air access to the outside world and for more tourists, and the continuing threat to several PICs of global warming, which increased air travel will inevitably exacerbate. This text will be of interest to tourism students, researchers and academics in the fields of tourism, development studies and cultural studies.

**Cultural Tourism** - Hilary du Cros 2014-12-05

Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management. The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to

produce sustainable cultural tourism. The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management (CM and CHM), under the understanding that for tourism to thrive, a balanced approach to the resource base it uses must be maintained. An 'umbrella approach' to cultural tourism represents a unique feature of the book, proposing solutions to achieve an optimal outcome for all sectors. Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways: • New sections on tangible and intangible cultural heritage and world heritage sites. • Expanded material on cultural tourism product development, the cultural tourism market and consumer behaviour, planning and delivery of exceptional experiences • New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia, China, South Africa and the Pacific as well as from the developed world, particularly the United States, Britain, Japan, Singapore, Australia and Canada. Written by experts in both tourism and cultural heritage management, this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism. It provides a blueprint for producing top-quality, long-term cultural tourism products.

**Worldwide Destinations Casebook** - Brian G. Boniface 2009

The Politics and Power of Tourism in Palestine - Rami K. Isaac 2015-12-14

Tourism in Palestine has been receiving an increasingly important profile given its economic and religious importance and the significant role it plays in Israeli-Palestinian relations, representation of Palestinian statehood and identity, and wider Middle Eastern politics. Nevertheless, Palestine, like much of the Middle East as a whole, remains extremely underrepresented in tourism literature. This title aims to fill this void by being the first book dedicated to exploring the significance of tourism in relationship to Palestine. The book examines the role of tourism in Palestine at three main levels. First, it provides an overview of destination management and marketing issues for the tourism industry in Palestine and addresses not only the visitor markets and the economic significance of tourism but also the realities of the difficulties of destination management, marketing and promotion of the Palestinian state. Second, it provides a series chapters and case studies that interrogate not only the various forms of tourism in Palestine but also its economic, social, environmental and spiritual importance. This section also conveys a dimension to tourism in Palestine that is not usually appreciated in the Western mainstream media. The third section indicates the way in which tourism in Palestine highlights broader questions and debates in tourism studies and the way in which travel in the region is framed in wider discourses. A significant dimension of the book is the attention it gives to the different voices of stakeholders in Palestinian tourism at varying levels of scale. This timely volume will offer the reader significant insight into the challenges and issues of tourism in this area now and in the future. It will benefit those interested in tourism, Middle East studies, politics, economics, development studies and geography.

**The Routledge Handbook of Tourism in Asia** - C. Michael Hall 2016-09-13

Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social and environmental importance of tourism in the region, there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism, which is marked by a high proportion of intra-regional travel. The book is divided into five sections. This first section provides an introduction to the region and context to the nationally focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South-East Asia, South and Central Asia, and East and North-East Asia, providing readers with a valuable snapshot of tourism at various scales, and from various approaches and positions. The concluding section considers future prospects for tourism in Asia. The handbook is interdisciplinary in coverage and is also international in scope through its authorship and content. It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism. This is essential reading for students, researchers and academics interested in tourism in the growth region of Asia now and in the future.

**Political Ecology of Tourism** - Mary Mostafanezhad 2016-01-08

Why has political ecology been assigned so little attention in tourism studies, despite its broad and critical interrogation of environment and politics? As the first full-length treatment of a political ecology of tourism, the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield. Drawing on recent trends in geography, anthropology, and environmental and tourism studies, *Political Ecology of Tourism: Communities, Power and the Environment* employs a political ecology approach to the analysis of tourism through three interrelated themes: Communities and Power, Conservation and Control, and Development and Conflict. While geographically broad in scope—with chapters that span Central and South America to Africa, and South, Southeast, and East Asia to Europe and Greenland—the collection illustrates how tourism-related environmental challenges are shared across prodigious geographical distances, while also attending to the nuanced ways they materialize in local contexts and

therefore demand the historically situated, place-based and multi-scalar approach of political ecology. This collection advances our understanding of the role of political, economic and environmental concerns in tourism practice. It offers readers a political ecology framework from which to address tourism-related issues and themes such as development, identity politics, environmental subjectivities, environmental degradation, land and resources conflict, and indigenous ecologies. Finally, the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield: Rosaleen Duffy (foreword) and James Igoe (afterword). This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism, politics and the environment

**Inclusive Community Development Through Tourism and Hospitality Practices** - Nadda, Vipin 2023-04-24

Sustainable tourism should not be limited to environmental preservation; the sociocultural and economic sides should also be considered. There is a need for an integrated approach recognizing the resources, facilities, and infrastructures that are interrelated with the social, cultural, and natural environment. Community development becomes a reality only by merging the principles of sustainability with growth objectives. Even though investments in environmentally friendly infrastructure and related services are fundamental, there is a need to address gender inequalities, exploitation, and commercialization of culture. Further, there is a need to prioritize the link between tourism and poverty reduction. *Inclusive Community Development Through Tourism and Hospitality Practices* explores various viable strategies for the adoption of sustainable approaches that can eventually boost economic growth and poverty reduction all over the world. Covering topics such as international tourism, sustainable development, and tourism reinforcement, this premier reference source is an excellent resource for business leaders and managers, students and educators of higher education, community leaders, government officials, librarians, researchers, and academicians.

*Tourism, Religion and Pilgrimage in Jerusalem* - Kobi Cohen-Hattab 2014-08-07

Jerusalem is a city with a singular nature. Home to three religions, it contains spiritual meaning for people the world over; it is at once a tourist destination and a location with a complex political reality. Tourism, therefore, is an integral part of Jerusalem's development and its political conflicts. The book traces tourism and pilgrimage to Jerusalem from the late Ottoman era, through the British Mandate, during the period of the divided city, and to the reunification of the city under Israeli rule. Throughout, the city's evolution is shown to be intertwined with its tourist industry, as tourist sites, accommodations, infrastructure, and services transform the city's structures and open spaces. At the same time, tourism is wielded by various parties in an effort to gain political recognition, to bolster territorial control, or to garner support. The city's future and the role tourism can play in it are examined. While the construction of a "security fence" will have many implications on Jerusalem's tourist industry, steps are proposed to minimize the effects of the security fence and optimize tourism. Written by leading academics, this title will be valuable reading for students, academics, and researchers in the fields of tourism, religious studies, geography, history, cultural studies, and anthropology.

**Scientific Tourism** - Susan Slocum 2015-05-15

As researchers in emerging economies, scientists are often the first foreign visitors to stay in remote rural areas and, on occasion, form joint venture ecotourism and community tourism projects or poverty alleviation schemes between local agencies or NGOs, the local community, and their home institution or agency. They therefore can contribute to avenues for the conservation of natural resources and the development of rural communities as well as influencing the future tourism development through its perceived legitimacy and the destination image it promotes. This book for the first time critically reviews tourism debates surrounding this emerging market of scientific and research oriented tourism. It is divided into three inter-related sections. Section 1 sets the stage of the discourse of scientific research in tourism; Section 2 evaluates the key players of scientific tourism looking particularly at the roles of NGOs, government agencies and university academic staff and Section 3 contains case studies documenting the niche of researchers as travelers in a range of geographical locations including Tanzania, Australia, Chile, Peru and Mexico. The title's multidisciplinary approach provides an informed, interesting and stimulating addition to the existing limited literature and raises many issues and associated questions including the role of science tourism in tourism development and

expansion, the impacts of scientific and research-based tourism, travel behaviors and motivations of researchers to name but a few. This significant volume will provide the reader with a better understanding of scientists as travelers, their relationship to the tourism industry, and the role they play in community development around tourism sites. *Tourism Geography* - Stephen Williams 2014-09-16

For human geographers, a central theme within the discipline is interpreting and understanding our changing world – a world in which geographic patterns are constantly being reworked by powerful forces of change. These forces include population shifts, new patterns of economic production and consumption, evolving social and political structures, new forms of urbanism, and globalisation and the compressions of time and space that are the product of the ongoing revolutions in information technology and telecommunications. This book attempts to show how tourism has also come to be a major force for change as an integral and indispensable part of the places in which we live, their economies and their societies. When scarcely a corner of the globe remains untouched by the influence of tourism, this is a phenomenon that we can no longer ignore. Tourism is also an intensely geographic phenomenon. It exists through the desire of people to move in search of embodied experience of other places as individuals and en masse and at scales from the local to the increasingly global. Tourism creates distinctive relationships between people (as tourists) and the host spaces, places and people they visit, which has significant implications for destination development and resource use and exploitation, which are exhibited through a range of economic, social, cultural and environmental impacts that have important implications for local geographies. This third edition of *Tourism Geography: critical understandings of place, space and experience* presents an essential understanding of critical perspectives on how tourism places and spaces are created and maintained. Drawing on the holistic nature of geography, a range of social science disciplinary views are presented, including both historical and contemporary perspectives. Fundamentally, however, the book strives to connect tourism to key geographical concepts of globalisation, mobility, production and consumption, physical landscapes, and post-industrial change. The book is arranged in five parts. Part I provides an overview of fundamental tourism definitions and concepts, along with an introduction to some of the major themes in contemporary geographic research on tourism, which are further developed in subsequent chapters of this book. In Part II the discussion focuses on how spatial patterns of modern tourism have evolved through time from regional to global geographies. Part III offers an extended discussion of how tourism relates to places that are toured through their economic landscape, contemporary environmental change and socio-cultural relations. Part IV explores a range of major themes in the geographies of tourism, including place creation and promotion, the transformation of urban tourism, heritage and place identity, and creating personal identity through consumption, encounters with nature and other embodied forms of tourism experience. Part V turns to applied geography with an overview of the different roles of planning for tourism as a means of spatial regulation of the activity, and a look at emerging themes in the critical geography of contemporary and future geographies of tourism. This third edition has been revised by Dr Alan A. Lew, who becomes the new co-author of *Tourism Geography*. Some of the major revisions that I have incorporated include moving most of the case study boxes to the website <http://tourismgeography.com>, which will provide a growing wealth of new case studies, over time. I have also incorporated new material, reorganised some of the content to balance the topics covered, created a new concluding chapter that

explores some recently emerging perspectives in critical tourism geography, and re-written the text to make it more accessible to a global English-speaking world. That said, the book is still very much the work of Dr Stephen Williams. As such, it maintains its original concise yet comprehensive review of contemporary tourism geography and the ways in which geographers critically interpret this important global phenomenon. It is written as an introductory text for students, and includes guidance for further study in each chapter that can form the basis for independent work. Lecturers using this textbook are welcome to contribute to the book's content developing through the supporting website by contacting me at any time.

Understanding and Managing Tourism Impacts - Colin Michael Hall 2009

This book discusses the complexity of understanding how tourism impacts the world and how the world impacts tourism - from the global scale to the local and individual scale.

*Touring Beyond the Nation* - Eric G. E. Zuelow 2011

From the Grand Tour to nudist beaches, this volume investigates the rise of modern tourism in Europe and highlights the many connections between European countries in their approach to and development of a transnational tourist industry. This is an essential addition to the library of those studying the history of tourism, popular culture and leisure in Europe, and will also provide interest to scholars of transnational topics, including Europeanization and globalization.

**Peer-to-peer Accommodation and Community Resilience** - Anna Farmaki 2022-03-16

The growth of peer-to-peer (P2P) accommodation has been remarkable. However, the rapid expansion of the phenomenon has yielded several concerns over its potentially negative economic, social and environmental impacts. These impacts are highlighted in policy agendas as an emerging problem encountered by many local communities in destinations experiencing a boom in P2P accommodation.

Specifically, concerns have been raised over the impact of the growth of P2P accommodation on local housing markets, residents' well-being and the environment as a result of the touristification of residential areas. In fact, many observers accuse P2P accommodation of fuelling the 'overtourism' problem that several destinations face. This edited book addresses the need to examine the P2P accommodation phenomenon from a community resilience lens. In particular, through a collection of chapters presenting a range of empirical and conceptual perspectives from urban and rural communities, the book considers the implications of P2P accommodation growth on the resilience of local communities and the sustainable development of places.

*Understanding and Managing Tourism Impacts* - C. Michael Hall 2009-09-10

As one of the world's largest industries, tourism carries with it significant social, environmental, economic and political impacts. Although tourism can provide significant economic benefits for some destinations, the image of tourism as a benign and environmentally friendly industry has often been challenged. There is a clear and growing body of evidence that suggests that the effects of tourism development are far more complex than policy-makers usually suggest and that the impacts of tourism occur not just at the destination but at all stages of a tourist's trip. Furthermore, tourism does not exist in a vacuum. Broader social and environmental changes also shape the form, growth and experience of tourism development. This text provides a clear, accessible and up-to-date synthesis of tourism's role in our contemporary world, both as an agent of change, and as a response to it. Tourism-related change is approached from a framework that illustrates the changing environments in which they occur, including the spatial

scale of such impacts and the effects of these impacts over time. This framework is then applied to the economic, socio-cultural and physical dimensions of tourism. After examining the different forms of tourism-related impacts, the book then discusses the role of planning as part of an integrated approach to the mitigation of undesirable impacts and the maximization of the desirable benefits of tourism development. Case studies and illustrations from a variety of locations from around the world are used throughout the book to exemplify key themes and issues; additionally figures and tables serve to elucidate statistical data. *Understanding and Managing Tourism Impacts* illustrates that when well managed tourism can make a positive contribution to destinations. The book's use of issues of scale, time and form to illustrate the effects of tourism provide an accessible and significant reminder that tourism's impacts vary over time and space, affects both the visitor and the host community, and can be unpredictable in its consequences. Chapter objectives, recommended readings, and links to web-based material help students, practitioners and researchers to grasp the broader implications of tourism development in today's world. With tourism increasingly being implicated as a factor in climate and environmental change, and with the benefits and costs of tourism as a form of economic development being examined more closely than ever, this book provides a timely contribution to help clarify the potentials and pitfalls of contemporary tourism.

**The Business of Tourism** - J. Christopher Holloway 2022-09-07

Tourism as an industry is constantly evolving. Trends and attitudes are susceptible to changes in what people look for in a holiday, which can change within different economic contexts; generational shifts; the political landscape; and most recently, the Covid-19 global pandemic. This popular and comprehensive textbook helps students to not only understand these changes but study them with a critical mindset and historical perspective, desirable for success in assessments. The text also continues to retain its focus on 'business' and the operational aspects of tourism, making it especially useful for students considering a career and/or short term placement in the tourism industry. This 12th edition of *The Business of Tourism* includes updates to take in changes to the tourism industry and consumption behaviours as a result of: Brexit (the UK's decision to leave the European Union) the pandemic and its impacts on nature; the operation of attractions; event tourism; hotel chains; transport; and governmental support Sustainability and the reduction of the negative impacts caused by tourism Chris Holloway was a former Professor of Tourism Management at the University of the West of England. Claire Humphreys is a former Head of Department and Principal Lecturer at the University of Westminster.

**Tourism, Resilience and Sustainability** - Joseph M. Cheer 2017-08-07

In a world increasingly faced with, and divided by, regional and global crises, resilience has emerged as a key concept with significant relevance for tourism. A paradigmatic shift is taking place in the long-term planning of tourism development, in which the prevailing focus on sustainability is being enhanced with the practical application of resilience planning. This book provides a critical appraisal of sustainability and resilience, and the relationship between the two. Contributions highlight the complexity of addressing social change with resilience planning in a range of tourism contexts, from islands to mountains, from urban to remote environments, and in a range of international settings. Case studies articulate how tourism is both an agent of social change and a victim of larger change processes, and provide important lessons on how to deal with increasingly unstable economic, social and environmental systems. This is the

first book to specifically examine social change and sustainability in tourism through a resilience lens. This much-needed contribution to the literature will be a key resource for those working in tourism studies, tourism planning and management, social geography, and development studies, among others.

*Tourism and Leisure Mobilities* - Jillian Rickly 2016-07-15

This book reframes tourism, as well as leisure, within mobilities studies to challenge the limitations that dichotomous understandings of home/away, work/leisure, and host/guest bring. A mobilities approach to tourism and leisure encourages us to think beyond the mobilities of tourists to ways in which tourism and leisure experiences bring other mobilities into sync, or disorder, and as a result re-conceptualizes social theory. The proposed anthology stretches across academic disciplines and fields of study to illustrate the advantages of multi-disciplinary conversation and, in so doing, it challenges how we approach studies of movement-based phenomena and the concept of scale. Part One examines the ways in which mobility informs and is informed by leisure, from everyday practices to leisure-inspired mobile lifestyles. Part Two investigates individuals and communities that become entrepreneurial in the face of changing tourism contexts and reflects on the performance of work through multiple mobilities. Part Three turns to issues of development, with attention to the cultural politics that frame development encounters in the context of tourism. The varied ways that people move into and out of development projects is mediated by geopolitical discourses that can both challenge and perpetuate geographic imaginations of tourism destinations.

**Imagining the American West through Film and Tourism** - Warwick Frost 2015-06-05

The West is one of the strongest and most enduring place images in the world and its myth is firmly rooted in popular culture – whether novels, film, television, music, clothing and even video games. The West combines myth and history, rugged natural scenery and wide open spaces, popular culture and promises of transformation. These imagined places draw in tourists, attracted by a cultural heritage that is part fictional and mediated. In turn, tourism operators and destination marketing organisations refashion what they present to fit these imagined images. This book explores this imagining of a mythic West through three

key themes, travel, film and frontiers to offer new insight into how the imagination of the West and popular culture has influenced the construction of tourism. In doing so, it examines the series of paradoxes that underlie the basic appeal of the West: evocative frontier, a boundary zone between civilisation and wilderness and between order and lawlessness. It draws on a range of films and literature as well as varying places from festivals to national parks to showcase different aspects of the nexus between travel, film and frontiers in this fascinating region. Interdisciplinary in character, it includes perspectives from cultural studies, American studies, tourism and film studies. Written by leading academics, this title will be valuable reading for students, researchers and academics in the fields of cultural studies, tourism, film studies and media studies and all those interested in film tourism.

**Global Tourism and COVID-19** - Alan A. Lew 2021-11-30

This comprehensive book focuses on how the COVID-19 pandemic is transforming travel and tourism, globally. Despite the devastation caused by COVID-19, authors argue that within the ongoing crisis, there is also an opportunity to positively transform the tourism sector in ways that contribute to a more hopeful future for tourism practitioners, tourists and host communities. As the world emerges from the shadow of COVID-19 there will not be a return to the "normal". Rather, the volume shares a vision of global transformation that is driven at least in part by the changing ways people in the post-COVID-19 era may travel and encounter each other and their environments. Individual chapters explore topics such as: regenerative economies, transformational travel, critical perspectives on pandemics and tourism, sustainable development and resilience post-COVID-19, re-discovering and re-localising tourism, global (im)mobilities, transforming tourism management, as well as new value systems for travel and tourism including the chance to strengthen social equity and social justice as tourism returns after COVID-19. In this edited volume, a series of senior and emerging scholars engage with debates on how to best contribute to more substantial, meaningful, and positive planetary shifts within the tourism industry. The chapters in this book were originally published as a special issue of the journal *Tourism Geographies*.
