Ecotourism and Environmental Sustainability - Tim Gale 2016-04-29

This book offers conceptual and practical insights into the complex interactions between ecotourism and the natural environment, with consideration given to government policy, marketing by suppliers, consumer behaviour and visitor/environmental management. Illustrated by international case studies the roles of and interplay between tour operators, their clients, resource managers and local communities are examined. This creates a comprehensive and insightful overview of the factors that work for and against the achievement of environmental sustainability in and through ecotourism. The result is a critical examination of ecotourism and environmental sustainability that highlights ideas for best practice and proposes new directions for future research

Tourism Management - David Weaver 2002-12-30

Tourism Management 2nd Edition introduces students to the complexities of the tourism system so that they will be better positioned to eventually assume the managerial challenges and responsibilities in a diverse and challenging industry. As with the first edition, the emphasis is on Australia, but numerous regional and global case studies and examples are included to provide an appropriately broad geographic context. The new edition has been updated to reflect the latest available advancements in tourism theory and thinking, retaining the thoroughness of content and diversity of applications and include more regional and international issues, economic significance, tourism operators and the role of technology in the tourism industry. New to this edition: * New "Technology in Tourism" features highlights the increasing role of technology tools and systems in the tourism industry * Up-to-date Australian and international statistics * Increased coverage of regional tourism issues and initiatives * More coverage of the key tourism players - government, industry and individuals Features: * A thorough discussion of the economic, sociocultural and environmental impacts of tourism * A chapter on sustainable tourism including ecotourism, sustainable mass tourism and industry responses and practices * A chapter on tourism research which introduces students to the function and scope of research in this area * Four practical features in each chapter to illustrate and reinforce the theory: -- Managing tourism: illustrates how a tourism-related process or company has been managed and the issues involved in doing so -- Contemporary issue: a brief case study which discusses a contemporary tourism issue such as the formation of strategic airline alliances, sex tourism, and the importance of international students as a component of Australian tourism -- Breakthrough tourism: discusses a leading edge company, destination or development in the tourism sector -- Technology in tourism: highlights the increasing role of technology tools and systems in the tourism industry * A chapter review which summarises the key points of each chapter and contains a summary of key concepts arranged to show the links between concepts and their subconcepts * Discussion questions, practical exercises and a case study in each chapter

Nature-Based Tourism, Environment and Land Management - Ralf C. Buckley 2008

Tourism based on natural environments is a huge international industry, requiring access to land with scenery, native plants, and wildlife. In turn, land managers need money to maintain the land and all its resources. Looking at the economic, social and environmental consequences of nature-based tourism, this book discusses the importance of links and partnerships, as well as the conflicts between commercial tourism interests and land management agencies.

Tourism Management - David Weaver 2016-06-10

In 2013 the World Tourism Organization reported that more than one billion international overnight tourist trips occurred globally during the previous year. Aside from the impressive number, the achievement was even more remarkable given the lingering effects of the global financial crisis.

Ecotourism - Stephen Wearing 2009

Explores the impact of mainstream tourism and the potential positive social and environmental benefits of ecotourism.

Marketing for Sustainable Tourism - Umberto Martini 2020-05-13

The aim of the Special Issue is to discuss the main current topics concerning marketing for sustainable tourism with reference to territories (i.e., tourism destinations, protected areas, parks and/or natural sites, UNESCO World Heritage Sites, rural regions/areas, etc.) and tourism enterprises and/or organisations (i.e., destination management organisations, hospitality enterprises, restaurant enterprises, cableway companies, travel agencies, etc.). In destinations where natural resources are pull factors for tourism development, the relationships among local actors (public, private, and local community), as well as marketing choices, are essential to develop sustainable tourism products. To this end, the Special Issue encourages papers that analyse marketing strategies adopted by tourism destinations and/or tourism enterprises to avoid overtourism, to manage mass sustainable tourism (as defined by Weaver, 2000), and to encourage and promote sustainable tourism in marginal areas or in territories suffering lack of integration in the tourism offer. Special attention will be given to contributions on the best practices to manage territories and/or enterprises adopting sustainable marketing strategies.

A Companion to Tourism - Alan A. Lew 2008-04-15

This groundbreaking Companion offers readers an opportunity to reassess key themes in contemporary tourism studies in the light of recent theoretical developments in tourism studies and the social sciences, as well as dramatic changes in the operating environment for tourism. A critical overview of current research in tourism studies. Offers readers an opportunity to reassess key themes in tourism studies in the light of recent developments, such as terrorist attacks, SARS and the financial failure of airlines. Comprises 48 specially commissioned essays, written by more than 50 acknowledged experts from around the world. Covers cutting-edge perspectives and topics, including tourism's role in globalization, sustainable tourism, and the state's role in tourism development. Sets an agenda for future tourism research. Includes a wealth of bibliographic references.

Advanced Introduction to Sustainable Tourism - David Weaver 2020-07-31

This critical review of sustainable tourism, from its beginnings in the late 1980s to the present, examines the pressing challenges posed by the effects of global warming and the persistence of deep poverty and social unrest in many regions. David Weaver explores the convergence of mass and 'alternative' tourism as a dominant theme. Originally perceived as two incompatible forms of tourism, they are positioned in this book through enlightened mass tourism as unified components of a single global 'tourisystem' with the power to achieve sustainable tourism.

Berkshire Encyclopedia of Sustainability 4/10 - Daniel E. Vasey 2011-12-08

Natural Resources and Sustainability explores how human needs and desires, from sustenance and shelter to recreation and travel, have spurred the consumption of Earth's material resources. Scientists, ecologists, and other expert authors present the historical impact of commercial activities (in industries as varied as

fisheries, agriculture, energy, and mineral extraction), discuss the global distribution and use of renewable and nonrenewable resources, and focus on innovative approaches for the future. Readers will learn why renewal doesn't necessarily put a resource beyond harm and why the no-free-lunch adage applies to all natural resources.

Tourism and National Parks - Stephen W. Boyd 2000-06-22

Tourism and National Parks Issues and Implications Edited by Richard W. Butler, Professor of Tourism, School of Management Studies, University of Surrey, UK and Stephen W. Boyd, Senior Lecturer in the Geography Division, Staffordshire University, UK. National Parks have played a significant role as tourist attractions in many countries since their establishment in the nineteenth century. In some countries they are the major set of tourist attractions and the foundation of small but often important tourism industries. Despite this, the relationship between tourism and national parks is not always a satisfactory one, and there is often considerable and vocal opposition to the continuance, and particularly expansion of, tourism in many national parks. The key focus of this book is the special relationship between national parks and tourism - how national park systems relate to tourism in a variety of contexts - from the historical development through to the role that they play today. International contributions from leading thinkers in the area raise issues such as, park origins and functions, management issues and future problems.

Sustainable Tourism - David Bruce Weaver 1999

Tourism, Recreation, and Sustainability - Stephen F. McCool 2008

This book is designed to illustrate many of the issues and approaches associated with sustainable tourism development, policy and research. Included are case studies of tourism development using both quantitative and qualitative methods, analytical frameworks for managing tourism and chapters addressing critical questions about the relationship between tourism and sustainability goals. As a whole, the book demonstrates the many dimensions and topics associated with attempts to address the complex issues associated with sustainability and tourism. Added in this second edition, are several new chapters that address emerging issues in management of tourism. Part I (Frameworks and Approaches) discusses the need for integration of social and environmental issues in tourism development. Part II (Tourism and Place) explicitly recognizes the importance of understanding the values and attributes of areas that become tourist destinations. Part III (Emerging Issues in Culture and Tourism) illustrates that we live in a dynamic world, that what was once acceptable is no longer, that our mental models of tourism development are in constant change and that researchers and policy makers must be alert to shifting public values and beliefs. This part includes material on local attitudes, poverty alleviation, indigenous people and tourism, and a discussion about culture and tourism. The book has 16 chapters and a subject index.

Writing Papers in the Biological Sciences - Victoria E. McMillan 2020-08-26

Writing in the Biological Sciences is a handy reference that new to advanced students can readily use on their own. A variety of student models prepare you for the most common writing assignments in undergraduate biology courses.

Tourism Geography - Stephen Williams 2009-06-02

Tourism is an intensely geographic phenomenon. It stimulates large-scale, global movement of people and forges distinctive relationships between people and the places they visit. It shapes processes of physical development and resource exploitation, whilst the presence of visitors exerts a range of economic, social,

cultural and environmental impacts that often have important implications for local geographies. This second edition of *Tourism Geography* develops a critical understanding of how different geographies of tourism are created and maintained. Drawing on both historical and contemporary perspectives, the discussion - which is in three main parts - connects tourism to key geographical concepts relating to globalization, mobility, new geographies of production and consumption, and post-industrial change. Part one examines how spatial patterns of tourism are formed and evolve through time. Part two offers an extended discussion of how tourism relates to places that are toured, examining physical and economic development, socio-cultural and environmental relations and the role of tourism planning. Part three develops a range of new material for this second edition that considers important contemporary influences upon tourism geographies, including place promotion, new forms of urban tourism, heritage, identity and embodied forms of tourism. Featuring international case studies and supported by up-to-date statistics, the text offers a concise yet comprehensive review of tourism geography and how geographers can interpret this important contemporary process. Written primarily as a student text, each chapter includes guidance for further study and summary bibliographies that form the basis for independent work.

Sustainable Tourism - David Weaver 2007-03-30

Sustainable Tourism comprehensively examines the theoretical and applied dimensions of contemporary sustainable tourism from a global perspective. Using international case studies and examples, it provides cutting edge coverage of the latest developments in the area, both theoretically and practically. It takes the reader through all aspects of sustainable tourism from the emergence of the paradigm to sustainability issues in all types of tourism and all components of the industry. Divided into 11 chapters it covers* ?Alternative tourism? (AT), or small-scale tourism and its associated pros and cons * Sustainable tourism within the conventional ?mass? tourism sector: the ?green consumer?, transportation, accommodation, attractions and tour operator considering issues and developments in quality control * Destination sustainability: issues of community empowerment and ideal sustainability models * Conclusions for the future of sustainable tourism The wide variety of international case studies used include: backpacking in Australia and Spain, Volunteer tourism in the US, Six Continents and Marriott hotels, Disney World, the Grand Prix, the Grand Canyon, mountain gorilla parks in Uganda and many more. Specifically written for courses in the specific topic area of sustainable tourism, this textbook considers the needs of both students and lecturers as follows: * Ideal for a semester course (or a 42-hour course) * Global perspective throughout the chapters and in the breadth of illustrative boxed case studies; * Chapters exceptionally well-integrated through frequent cross-references * End-of-chapter questions that prompt deeper integrative thinking on the part of the reader. * Online resources for the lecturer, including PowerPoint presentations and multiple choice exercises

Adventure Tourism Management - Ralf Buckley 2011-01-03

The academic study of adventure tourism is rapidly increasing in popularity, with research beginning to focus on it heavily. This book is a cohesive and comprehensive look at this multi-million dollar industry sector from a variety of perspectives relevant to the teaching of tourism. Ideal for the undergraduate student taking adventure tourism as a single subject degree, or as part of their tourism management studies, this book documents, analyses and offers insight into the latest research in the area. Includes analysis of products, trends, climate change, risk management and environmental management and many others. The Subsectors section within the book offers an overview of the twenty or more definable sectors within the adventure tourism industry considering their origins and history, latest trends and demographic groups. The author then goes on to look in more detail at: Wildlife Tourism, Marine Tourism, Helitourism, and Boardsports. Each chapter will include seven pedagogical elements: * introduction - what the chapter does and doesn't cover * plain-language review of the chapter topic with minimal referencing - essentially like lecture notes * concluding paragraph to the review section explaining how it leads to the next chapter(s) * review of recent research, condensed into tables where possible * revision notes - a few pages of bullet points summarising the review and research * a sample set of assignment questions, three to six per chapter in some cases * readings on relevant topics, condensed from previous publications.

Fundamentals of Geomorphology - Richard John Huggett 2011-03-15

This extensively revised, restructured, and updated edition continues to present an engaging and

comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. *Fundamentals of Geomorphology* begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. *Fundamentals of Geomorphology* provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

Natural Area Tourism - David Newsome 2012-12-21

Natural Area Tourism provides a comprehensive description of tourism in natural areas allowing readers to understand the scope of, complexities arising from, and possibilities of undertaking successful tourism developments in natural areas. Furthermore, the second edition contains an overview of recent developments, such as mountain biking, adventure activities in protected areas and geotourism. There is new content and examples from the Asian region on managing the tourism industry and management effectiveness. The book also considers important new developments in monitoring, such as remote sensing and the use of GIS, as well as the use of electronic educational resources in delivering interpretation. Attention is given to the implications of climate change, inadequate protected area security and the ever-increasing influence of the landscape matrix. Moreover, the second edition includes a comprehensive review of the new literature that has emerged since the publication of the first edition more than a decade ago. Accordingly this book will remain an invaluable resource and account of natural area tourism for many years to come.

The Palgrave Handbook of Volunteering, Civic Participation, and Nonprofit Associations - David

Horton Smith 2017-01-18

Written by over 200 leading experts from over seventy countries, this handbook provides a comprehensive, state-of-the-art overview of the latest theory and research on volunteering, civic participation and nonprofit membership associations. The first handbook on the subject to be truly multinational and interdisciplinary in its authorship, it represents a major milestone for the discipline. Each chapter follows a rigorous theoretical structure examining definitions, historical background, key analytical issues, usable knowledge, and future trends and required research. The nine parts of the handbook cover the historical and conceptual background of the discipline; special types of volunteering; the major activity areas of volunteering and associations; influences on volunteering and association participation; the internal structures of associations; the internal processes of associations; the external environments of associations; the scope and impacts of volunteering and associations; and conclusions and future prospects. This handbook provides an essential reference work for third-sector research and practice, including a valuable glossary of terms defining over eighty key concepts. Sponsored by the International Council of Voluntarism, Civil Society, and Social Economy Researcher Associations (ICSERA; www.icsera.org), it will appeal to scholars, policymakers and practitioners, and helps to define the emergent academic discipline of voluntaristics.

Ecotourism - Ralf Buckley 2009

"Focusing on fundamental ecotourism concepts, this broad-based textbook provides a basis for studies into environmental-based tourism. It covers key topics such as the management, economics, and potential environmental impacts, both positive and negative, of this popular and growing sector"--Publisher description.

Critical Issues in Ecotourism - James E. S. Higham 2007

Identifies and addresses critical issues in ecotourism. This book provides the reader with contributions from international scholars that address issues of relevance; incorporating scientific insights in specialised fields of research, for example, identifying and protecting critical habits where tourists engage with endangered species.

International Handbook on Ecotourism - Roy Ballantyne 2013-01-01

Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourism's fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be. The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers.

Challenges in Tourism Research - Tej Vir Singh 2015

In this volume leading experts from different disciplines and diverse geographic regions discuss fundamental, often controversial topics in the field of tourism studies. The debates include subjects such as the concept of the 'tourist', the long-term sustainability of tourism development, the growth of volunteer tourism and the vulnerability of tourism.

Native Tours - Erve Chambers 2019-06-20

Previous editions of Native Tours provided a much-needed overview and analysis of anthropology's contributions to tourism as an emerging field of study. Such a cultural perspective illuminated key ideas surrounding worldwide host-guest relations and informed discussions of political and economic influences and the impacts, both negative and positive, of tourism as one of the world's largest industries. Applying a characteristically uncluttered, authoritative writing style alongside an exceptional command of the relevant literature, Chambers updates, refines, and extends his earlier work. He retains a focus on the social, cultural, economic, and environmental consequences of tourism, and provides a framework for understanding tourism initiatives in their particular circumstances. Three detailed case studies originating in the American Southwest, the Tirolean Alps, and Belize illustrate the varied costs and benefits of tourism.

Ecotourism - David Weaver 2008-03-31

This book reflects contemporary developments in the field. Building on the strengths of the first edition, the text discusses the significance of ecotourism in the domestic and international tourism sectors. The origins, markets, venues and impact of ecotourism form the basis of the first part of the book. Business aspects of ecotourism, external environments, organisations and policies are examined in the second part of the book, along with special environments, such as islands, polar regions and indigenous territories, and distinctive activities, such as whale-watching and penguin-watching. The management of ecotourism is covered comprehensively and is illustrated by extensive industry and destination examples derived mainly from the peer-reviewed literature. A highlight of the book is a regional survey of ecotourism that offers comparative insights into ecotourism in Australia, the South Pacific, Asia, Europe, the Americas and Africa.

21st Century Homestead: Sustainable Agriculture I - Marlon Henkel 2015

Career Opportunities in Conservation and the Environment - Paul R. Greenland 2007

Provides information on the duties, salaries, employment prospects, and skills, training, or education necessary for more than sixty-five jobs that focus on nature and the environment.

Ecotourism in Scandinavia - Stefan Gössling 2006-01-01

Ideal for researchers and students of ecotourism, this text comprehensively describes, analyses and evaluates aspects of Scandinavian ecotourism.

Global Climate Change Impacts in the United States - U.S. Global Change Research Program 2009-08-24

Summarizes the science of climate change and impacts on the United States, for the public and policymakers.

Hydrology and the Management of Watersheds - Kenneth N. Brooks 2012-10-01

This new edition is a major revision of the popular introductory reference on hydrology and watershed management principles, methods, and applications. The book's content and scope have been improved and condensed, with updated chapters on the management of forest, woodland, rangeland, agricultural urban, and mixed land use watersheds. Case studies and examples throughout the book show practical ways to use web sites and the Internet to acquire data, update methods and models, and apply the latest technologies to issues of land and water use and climate variability and change.

The Encyclopedia of Ecotourism - David Bruce Weaver 2001-01-01

The Encyclopedia of Ecotourism provides an expert, state-of-the-art and comprehensive knowledge base of the rapidly growing global ecotourism sector. It is divided into eight major sections, and contains 41 chapters, individually authored by international researchers and practitioners in ecotourism. Each chapter combines theory and practice in a complementary way. The scope of the encyclopedia includes definitions and other contextual material, regional perspectives, venues, impacts, planning and management considerations, and issues associated with ecotourism businesses, research and training.

The Geography of Tourism and Recreation - C. Michael Hall 2002-06-01

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Ecotourism and Conservation in the Americas - Amanda Stronza 2008

Ecotourism has been credited with conserving biological and cultural diversity, alleviating rural poverty, increasing public awareness of environmental concerns and strengthening ties between tourism operators and local populations. For these reasons, ecotourism has grown in popularity with tourists as well as governmental development agencies and conservation organizations. Over twenty years after its inception, it now needs to be asked: Does ecotourism measure up to its environmental, social and economic ideals? Using detailed case studies, regional overviews and thematic analyses, *Ecotourism and Conservation in the Americas* evaluates the pros and cons of ecotourism for communities and ecosystems. Focusing particularly on the Americas, perspectives are drawn from private tour operators, non-governmental conservation and development organizations, local and indigenous communities and tourism researchers. Chapters discuss local benefits and conservation value through discussions of social impacts, the assessment of conservation potential, environmental education and the setting and maintaining of standards.

Ecotourism in the Less Developed World - David Bruce Weaver 1998

By defining and analyzing ecotourism in the less developed countries, and its effects, in all parts of the world, this book sets the broader industry in context and includes country case studies, and common themes and patterns which emerge.

Tourism in National Parks and Protected Areas - Paul F. J. Eagles 2002

This book describes the state of the art of tourism planning and management in national parks and protected areas. It also provides guidelines for best practice in tourism operations. Other objectives are to: Describe case studies and guidelines that contribute to conservation of biological diversity; consider the role of local communities within or near these areas; outline the development of tourism infrastructure and services; discuss visitor management; provide guidelines to enhance the quality of the tourism experience. The focus is global and the book will appeal to both academics and practitioners.

Trees of Alabama - Lisa J. Samuelson 2020-02-04

An easy-to-use guide to the most common trees in the state From the understory flowering dogwood presenting its showy array of white bracts in spring, to the stately, towering baldcypress anchoring swampland with their reddish buttresses; from aromatic groves of Atlantic white-cedar that grow in coastal bogs to the upland rarity of the fire-dependent montane longleaf pine, Alabama is blessed with a staggering diversity of tree species. *Trees of Alabama* offers an accessible guide to the most notable species occurring widely in the state, forming its renewable forest resources and underpinning its rich green blanket of natural beauty. Lisa J. Samuelson provides a user-friendly identification guide featuring straightforward descriptions and vivid photographs of more than 140 common species of trees. The text explains the habitat and ecology of each species, including its forest associates, human and wildlife uses, common names, and the derivation of its botanical name. With more than 800 full-color photographs illustrating the general form and habitat of each, plus the distinguishing characteristics of its buds, leaves, flowers, fruit, and bark, readers will be able to identify trees quickly. Colored distribution maps detail the range and occurrence of each species grouped by county, and a "Quick Guide" highlights key features at a glance. The book also features a map of forest types, a chapter on basic tree biology and terminology (with illustrative line drawings), a spotlight on the plethora of oak species in the state, and a comprehensive index. This is an invaluable resource for biologists, foresters, and educators and a great reference for outdoorspeople and nature enthusiasts in Alabama and throughout the southeastern United States.

Ecotourism - Weaver 2002-04-01

Ecotourism - David A. Fennell 2004-03-01

Using a wealth of international case studies and photos, *Ecotourism: An Introduction* provides an accessible and comprehensive introduction to the key foundations, concepts and issues related to Ecotourism, the fasted growing segment of the global tourism industry. Among the topics covered are: * the foundations of ecotourism * tourism and ecotourism policy * the economics, marketing and management of ecotourism * the social and ecological impacts of tourism * ecotourism and development * the role of ethics in ecotourism The book includes case studies from Scotland, Austria, the USA, Canada, Mexico and Australia. *Journal of Travel Research* - 2010-02
