**Globalization and Society** - Raymond Breton 2003

The studies presented in this volume argue that integration in the world system may benefit a given society or may harm it. It may entail changes to the culture of that society, but does not obliterate a society's distinctive characteristics.

How Societies Work, 5th Edition - Joanne Naiman 2020-04-28T00:00:00Z

In 2011, protesters around the world – including Canada – called for changes to the societies in which they live. Many observers were asking: “What do they want?” Some answers to this question can be found in *How Societies Work*, a unique and accessible introductory sociology textbook that introduces students to the structure of contemporary societies and the power relationships within them. In contrast to most introductory textbooks, *How Societies Work* explores a broad range of sociological concepts and theories while simultaneously creating a coherent picture of modern societies. Drawing on fields as diverse as anthropology, genetics, economics, social psychology, history and politics, this innovative and popular text looks at both the roots of modern societies and the current structures within them. This approach helps undergraduate students make sense of our complex social world and encourages them to

connect the social world to their own lived experiences. This extensively revised and updated fifth edition includes discussions of the roots of the recent global economic crisis and worldwide responses to it, growing social inequality, broader global struggles for change, the growth of the security state in Canada and the sudden resurgence of political protest in North America. The final chapter looks to the future, examining such issues as the possible consequences of climate change, increased forced migration of peoples and the changing dynamic of global power. More boxes, quotes and “think about it” elements have been added to the fifth edition, while the language, clarity of presentation and many examples make it even more accessible to readers. It is an introductory textbook that truly engages students in the “sociological imagination.” This fifth edition is presented in a large format, making it easier to read and even more student friendly. A testbank and power point presentation are available for instructors upon request.

**Female Well-Being** - Carolyn Fluehr-Lobban 2013-07-04

This global survey starts from the assumption that the significant transformations in women's lives deserve to be fully documented and interpreted. Janet Mancini Billson and Carolyn Fluehr-Lobban tackle the complexities of social change by using data from countries in every

world region to illustrate the most critical challenges that women faced during the last century - challenges that are also likely to shape the 21st century. Global knowledge and feminism dovetailed in the 20th century, fed by international air travel, telecommunications, the internet, and a growing awareness that solving female oppression would improve the lot of all humankind. The authors therefore adopt a strong international, comparative, cross-cultural, and feminist framework that uncovers the fundamental processes that promote, sustain, or degrade the female condition. At the heart of *Female Well-Being* are case studies written by country teams of scholars, educators, and policy analysts, in Canada, The United States, Colombia, Iceland, the United Kingdom, Croatia, Japan, Bangladesh, Thailand, South Africa, and Sudan. Female well-being is measured by analysing trends in infant mortality, maternal mortality, literacy, life expectancy, education, work, income, family structure, and political power. These trends are contextualised in the light of the century's major events, legislative initiatives, social policies, and leadership, to illustrate the processes that enhance, sustain, or detract from the female condition. This book will be a critical resource for academics, development experts and policy analysts.

*Small Town in Modern Times* - David Morton Rayside 1991

Alexandria -- a town of about 3,500 people in Glengarry County in Eastern Ontario -- conforms in some respects to the stereotype of small towns as friendly communities without the strains of city life. Although David Rayside found Alexandria to be a pleasant town, in this penetrating study he reveals that this community, which includes an almost equal mix of anglophones and francophones, is also marked by social inequalities and divisions that parallel those in urban centres.

**Contingent Work, Disrupted Lives** - Belinda Leach 2002-11-23

*Contingent Work, Disrupted Lives* examines the repercussions of economic globalization on several manufacturing-dependent rural communities in Canada. Foregrounding a distinct interest in the 'grassroots' effects of such contemporary corporate strategies as plant closures and downsizing, authors Anthony

Winson and Belinda Leach consider the impact of this restructuring on the residents of various communities. The authors argue that the new rural economy involves a fundamental shift in the stability and security of people's lives and, ultimately, it causes wrenching change and an arduous struggle as rural dwellers struggle to rebuild their lives in the new economic terrain. Beginning with broader theoretical and empirical literature on global changes in the economy and the effects of these changes on labour, the text then focuses exploration on manufacturing in Ontario with an analysis of five community case studies. Winson and Leach give considerable attention to the testimony of numerous residents; they report on in-depth interviews with key respondents and blue-collar workers in five separate communities, ranging from diverse manufacturing towns to single-industry settlements. The result is an intimate contextual knowledge of the workers' lives and their attempts to adapt to the tumultuous economic terrain of 1990s rural Canada. Winner of the John Porter Prize for 2003, awarded by the Canadian Sociology and Anthropology Association.

**Canadian Society in the Twenty-First Century, Fourth Edition** - Trevor W. Harrison 2021-03-03

Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization,

Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history.

Recent Social Trends in Canada, 1960-2000 - Lance W. Roberts 2005-08-15

*Challenging the Market* - International Working Group on Labour Market Regulation and Deregulation 2004

For two decades economic and social policy in most of the world has been guided by the notion that economies function best when they are fully exposed to competitive market forces. In labour market policy, this approach is reflected in the widespread emphasis on "flexibility" - a euphemism for the retrenchment of income support and social security, the relaxation of labour market regulations, and the enhanced power of private actors to determine the terms of the employment relationship. These strategies have had marked effects on labour market outcomes, leading to greater vulnerability and polarization - and not always in ways that enhance worker-centred flexibility. The authors offer a more balanced analysis of the functioning and effects of labour market regulation and deregulation. By questioning the underpinnings of the "flexibility" paradigm, and revealing its often damaging impacts (on different countries, sectors, and constituencies), they challenge the conclusion that unregulated market forces produce optimal labour market outcomes. The authors conclude with several suggestions for how labour policy could be reformulated to promote both efficiency and equity.

**Computers on the Job** - Heather Menzies 1982-01-01

Written as the computer revolution dawned on Canadian society, *Computers on the Job*

introduces the effects of technological change on people in their homes and workplaces. Heather Menzies explains, in clear, nontechnical terms, how the microchip unleashes the full potential of computers, allowing employers to automate many routine jobs and transform others-- sometimes for the benefit of employees, sometimes not. She traces the effects of computerization on office work, on the service industry and on traditional blue-collar occupations, forecasting changes that, in many cases, have come to pass. *Computers on the Job* is a pioneering study of the impact of widespread computer use on Canadian society.

*Capital and Labour in the British Columbia Forest Industry, 1934-74* - Gordon Hak 2011-11-01

The history of British Columbia's economy in the twentieth century is inextricably bound to the development of the forest industry. In this comprehensive study, Gordon Hak approaches the forest industry from the perspectives of workers and employers, examining the two institutions that structured the relationship during the Fordist era: the companies and the unions. He relates daily routines of production and profit-making to broader forces of unionism, business ideology, ecological protest, technological change, and corporate concentration. The struggle of the small-business sector to survive in the face of corporate growth, the history of the industry on the Coast and in the Interior, the transformations in capital-labour relations during the period, government forest policy, and the forest industry's encounter with the emerging environmental movement are all considered in this eloquent analysis.

**Inside Capitalism; An Introduction to Political Economy** - Paul Phillips 2007

These Days Almost Anyone Is Bound To Be Depressed By The Litany Of Economic Woes Besieging Canada. Mainstream Economists, Politicians And Business Leaders Claim That Workers Wages Must Fall, That The Social Safety Net Must Be Stripped Away, That Taxes Must Be Cut And That Environmental Regulations Must Be Relaxed. There Is No Alternative, We Are Told, If Canada Is To Be Competitive. But Is This Really The Case? If We Are To Even Begin To Respond To This New Economic Mantra We Have To Know What Makes Our Economy Tick. In *InsideCapitalism*, Paul Phillips Introduces Us To Political Economic Analysis That Explains Why Firms Behave As They Do, Why We Have Such A High Level Of Economic Monopoly And Who Benefits From The Economic Structure Of Capitalism. In So Doing, Phillips Shows Us That Traditional Economic Analysis Is Mainly Ideology. Clearly, The Dismal Prospects That Average Canadians Face Are Not The Result Of Immutable Economic Laws But Rather Due To The Political And Economic Power That Business Has Amassed With The Aid Of Successive Governments And The Bank Of Canada.

**The Oxford Handbook of Job Quality** - Chris Warhurst 2022-05-26

The aim of this Handbook is to produce an interdisciplinary and international benchmark text for anyone wanting to understand job quality. Job quality matters and has long and continually done so, even if the terminology used to describe it has, and continues, to vary. Debate about the future of work and job quality in the twenty-first century centres on the impact of the new digital technologies of the putative fourth industrial revolution. This debate compounds existing concerns about the restructuring of employment and, importantly, a worrying proliferation of poor-quality jobs, often within the context of neo-liberal political-economic hegemony since the early 1980s or the economic crisis that followed the Global Financial Crisis of the late 2000s. Job quality is offered as a solution to challenges such as health, welfare, productivity, innovation, economic competitiveness, democracy and democratic participation, Bildung/cultivation, societal equality, individual and collective quality of life, and environmental sustainability. As job quality is a key factor in addressing these and the other challenges, it needs to be understood in all its complexity in terms of what it affects as well as

what affects it. This Handbook draws together into a single volume: first, an explicit focus on job quality both as a significant factor in and of itself and as producing instrumental effects on a range of other processes and outcomes; second, a catalogue of the diverse range of multiple contributions and applications related to job quality; and third, the complexity and multiple interpretations of the concept of job quality. Each chapter provides distinct responses to the question of why job quality matters, coupled to a contention about for whom or for what job quality matters most. As the chapters with their respective answers and arguments attest, there are a range of ways in which job quality is relevant to an equally broad range of social, economic, and political concerns.

Ageism at Work - Ellie D. Berger 2021-04-07

The Canadian population is aging, bringing with it an increasing number of social and economic challenges. With the aging of the workforce, the reconceptualization of older workers and retirement, the increasing share of women in the labour force, the elimination of mandatory retirement, the fluctuating economy, and the changes to the pension system, barriers to employment for older workers, such as ageism, need to be of central concern. *Ageism at Work* examines the subjective experiences of older workers in Canada and explores how they negotiate ageism and manage their interactions in the employment setting. Further, this book looks at the intersection between age and gender and the pervasiveness of gendered ageism in the labour market. Finally, this book examines employers' attitudes towards older workers quantitatively, while also exploring their first-hand accounts about them through qualitative inquiry. Understanding how ageism plays out in the labour market, how it intersects with sexism, and its consequences on a personal level are critical to moving the discussion on discrimination and human rights forward in Canada.

The book paints an optimistic picture of the future of work by addressing job stress, work-life balance, skill use and engagement.

Choosing to Labour? - Wolfgang Lehmann  
2014-05-14

Young people about to leave high school argue that they are determining their own destinies. Scholarly debates also suggest that the influence of structural factors such as social class on an individual's life course is decreasing. Wolfgang Lehmann challenges this view and offers a detailed comparative analysis of the inter-relationships between social class, institutional structures, and individual educational and career choices. Through a qualitative study of academic-track high school students and participants in youth apprenticeships in Germany and Canada, Lehmann shows how the range of available school-work transition options are defined by both gender and social class. Highlighting the importance of the institutional context in understanding school-work transitions, particularly in relation to Germany's celebrated apprenticeship system, which rests on highly streamed secondary schooling and a stratified labour market, Lehmann argues that social inequalities are maintained in part by the choices made by young people, rather than simply by structural forces. *Choosing to Labour?* concludes with an exploration of how public policy can meet the dual challenge of providing young people with meaningful and equitable educational experiences, while simultaneously fulfilling the need for a skilled workforce.
